Personal

Information Management William P. Jones,Jaime Teevan,2011-07-01 In an ideal world everyone would always have the right information in the right form with the right context right when they needed it Unfortunately we do not live in an ideal world This book looks at how people in the real world currently manage to store and process the massive amounts of information that overload their senses and their systems and discusses how tools can help bring these real information interactions closer to the ideal Personal information management PIM is the study and practice of the activities people perform to acquire organize maintain and retrieve information for everyday use PIM is a growing area of interest as we all strive for better use of our limited personal resources of time money and energy as well as greater workplace efficiency and productivity Personal information is currently fragmented across electronic documents email messages paper documents

digital photographs music videos instant messages and so on Each form of information is organized and used to complete different tasks and to fulfill disparate roles and responsibilities in an individual's life Existing PIM tools are partly responsible for this fragmentation They can also be part of the solution that brings information together again A major contribution of this book is its integrative treatment of PIM related research The book grows out of a workshop on PIM sponsored by the National Science Foundation held in Seattle Washington in 2006 Scholars from major universities and researchers from companies such as Microsoft Research Google and IBM offer approaches to conceptual problems of information management In doing so they provide a framework for thinking about PIM as an area for future research and innovation
