**Losing Our Heads** Regina Janes, 2005-08 What is the fascination that decollation holds for us as individuals and as a culture Why does the idea make us laugh and the act make us close our eyes *Losing Our Heads* explores in both artistic and cultural contexts the role of the chopped off head It asks why the practice of decapitation was once so widespread why it has diminished but not as scenes from contemporary Iraq show completely disappeared and why we find it so peculiarly repulsive that we use it as a principal marker to separate ourselves from a more barbaric or primitive past Although the topic is grim Regina Janes's treatment and conclusions are neither grisly nor gruesome but continuously instructive about the ironies of humanity's cultural nature Bringing to bear an array of evidence the book argues that the human ability to create meaning from the body motivates the practice of decapitation its diminution the impossibility of its extirpation and its continuing fascination Ranging from antiquity to the late nineteenth century passion for Salome and John the Baptist and from the enlightenment to postcolonial Africa's challenge to the severed head as sign of barbarism *Losing Our Heads* opens new areas of investigation enabling readers to understand the shock of decapitation and to see the value in moving past shock to analysis Written with penetrating wit and featuring striking illustrations it is sure to captivate anyone interested in his or her head

**The Dark Side of Nature** Barbara Jean Larson, 2005 The artist will always be a special isolated solitary

agent with an innate sense of organising matter Odilon Redon Disturbing hallucinatory words that evoke pathology rather than history have long framed our understanding of Odilon Redon 1840 1916 a French artist admired by the Surrealists as a precursor in their exploration of the irrational In this book Barbara Larson takes a radically different view of Redon one that does not attempt to deny him melancholia but does go a long way toward dismantling the paradigm that treats the cult of the irrational as the essential condition of his work Larson instead contends that Redon should be seen as a gifted mediator of a context in which new scientific ideas mingled with the fears of social and racial decadence widespread in France after the debacle of the Franco Prussian War Larson begins by investigating Redon s early years in the Bordeaux region where he met Armand Clavaud a botanist who encouraged his interest in the mixture of botany geology zoology and landscape studies then called Naturalism Subsequent chapters integrate Redon s concentration upon black and white graphic media and his absorption of Darwin s teachings and new trends in physiology psychology and microbiology All this enables Larson to offer insightful readings of Redon s predilection for bizarre polymorphous forms The Dark Side of Nature demonstrates that at least insofar as Redon is concerned late nineteenth century science meant not positivistic engagement with a stable material world but rather the exploration of vast invisible realms from microbes to electricity With its clear exposition of scientific thought Larson s book will undoubtedly make a significant contribution not only to Redon studies but also to the interdisciplinary study of art and science

**Children's Culture and the Avant-Garde** Marilynn Strasser

Olson, 2013-03-05 This volume explores the mutual influences between children s literature and the avant garde Olson places particular focus on fin de si cle Paris where the Avant garde was not unified in thought and there was room for modernism to overlap with children s literature and culture in the Golden Age The ideas explored by artists such as Florence Upton Henri Rousseau Sir William Nicholson Paula Modersohn Becker and Marc Chagall had been disseminated widely in cultural productions for children their work in turn influenced children s culture These artists turned to children s culture as a new way of seeing allied to a contemporary interest in international artistic styles Children s culture also has strong ties to decadence and to the grotesque the latter of which became a distinctively Modernist vision This book visits the qualities of the era that were defined as uniquely childlike the relation of childhood to high and low art and the relation of children s literature to fin de si cle artistic trends Topics of interest include the use of non European figures the Golliwogg approaches to religion and pedagogy to oppression and motherhood to Nature in a post Darwinian world and to vision in art and life Olson s unique focus covers new ground by concentrating not simply on children s literature but on how childhood experiences and culture figure in art

*Potential Images* Dario Gamboni, 2002 In *Potential Images* Dario Gamboni explores ambiguity in modern art considering images that rely to a great degree on a projected or imaginative response from viewers to achieve their effect Ambiguity became increasingly important in late 19th and early 20th century aesthetics as is evidenced in works by such artists as Redon Cezanne Gauguin Ensor and the Nabis Similarly the Cubists subverted

traditional representational conventions requiring their viewers to decipher images to extract their full meanings The same device was taken up in the various experiments leading to abstraction For example it was Kandinsky s intention that his work could be interpreted in both figurative and non figurative ways and Duchamp s Readymades suggested the radical conclusion that it is the beholder who makes the picture These invitations to viewers to participate in the process of artistic communication had social and political implications as they accorded artist and beholder symmetrical almost interchangeable roles     *Art in America and Elsewhere* Frederick Fairchild Sherman,1924 An illustrated quarterly magazine     Master Drawings from the Woodner Collection George R. Goldner,1983
