Nature Of Perception:

The Nature of Existence: Volume 2 John McTaggart Ellis McTaggart, Ellis McTaggart, 1988-07-29 **The Nature of Perception** John Foster, 2000-03-09 John Foster presents a penetrating investigation of the question what is it to perceive a physical object Is perceptual contact with a physical object he asks something fundamental or does it break down into further factors If the latter what are these factors and how do they combine to secure the contact For most of the book Foster addresses these questions in the framework of a realist view of the physical world But the arguments which thereby unfold arguments which undermine direct realism and establish a version of the sense datum theory lead to the conclusion that we do not perceive physical objects at all The only way to avoid this conclusion is by abandoning physical realism for a form of idealism and this is the option which Foster finally embraces The Nature of Perception makes a valuable contribution to the ongoing debate it sheds light on the traditional issues and breathes new life into positions which most current philosophers assume to be dead **Tibetan Buddhist Philosophy of Mind and Nature** Douglas S. developed elements of a modern understanding of science that have remained of fundamental importance to this day **The Nature of Consciousness** Ned Block, Owen Flanagan, Guven Guzeldere, 1997-09-10 Intended for anyone attempting to find their way through the large and confusingly interwoven philosophical literature on consciousness this reader brings together most of the principal texts in philosophy and a small set of related key works in neuropsychology on consciousness through 1997 and includes some forthcoming articles Its extensive coverage strikes a balance between seminal works of the past few decades and the leading edge of philosophical research on consciousness As no other anthology currently does The Nature of Consciousness provides a substantial introduction to the field and imposes structure on a vast and complicated literature with sections covering stream of consciousness theoretical issues consciousness and representation the function of consciousness subjectivity and the explanatory gap the knowledge argument qualia and monitoring conceptions of consciousness Of the 49 contributions 18 are either new or have been adapted from a previous publication **The Works of**
