**The SAGE Encyclopedia of Social Science Research Methods** Michael Lewis-Beck, Alan E Bryman, Tim Futing Liao, 2004 This defining work will be valuable to readers and researchers in social sciences and humanities at all academic levels As a teaching resource it will be useful to instructors and students alike and will become a standard reference source Essential for general and academic collections CHOICE Appreciative users of this volume will be students faculty and researchers in academic special and large public libraries for whom it is recommended LIBRARY JOURNALS SAGE Reference is proud to announce The SAGE Encyclopedia of Social Science Research Methods a three volume resource that is a first of its kind developed by the leading publisher of social science research methods books and journals This unique multi volume reference set offers readers an all encompassing education in the ways of social science researchers Written to be accessible to general readers entries do not require any advanced knowledge or experience to understand the purposes and basic principles of any of the methods The Encyclopedia features two major types of entries definitions consisting of a paragraph or two provide a quick explanation of a methodological term and topical treatments or essays discussing the nature history application example and implication of using a certain method Also included are suggested readings and references for future study To help provide a more complete explanation than is often achieved within the scope of a single article key terms and concepts appear in SMALL CAPITAL LETTERS to refer readers to related terms explained elsewhere In addition to epistemological issues that influence the nature of research questions and assumptions The SAGE Encyclopedia of Social Science Research Methods tackles topics not normally viewed as part of social science research methodology from

philosophical issues such as poststructuralism to advanced statistical techniques. In covering the full range of qualitative and quantitative data analyses, this key reference offers an integrated approach that allows the reader to choose the most appropriate and robust techniques to apply to each situation. Many entries treat traditional topics in a novel way, stimulating both interest and new perspectives. One example is the entry *Econometrics* by Professor Damodar Gujarati. Following a process which many educators preach but seldom practice, Gujarati walks the reader twice through the research process: from economic theory to data and models to analysis, once in principle and a second time with an example. In using the ordinary process of economic research to achieve an extraordinary impact, he leaves the reader thinking not only about methods and models but also the fundamental purpose of econometrics.

**Topics Covered:** Analysis of Variance, Association and Correlation, Basic Qualitative Research, Basic Statistics, Causal Modeling, Structural Equations, Discourse, Conversation Analysis, Econometrics, Epistemology, Ethnography, Evaluation, Event History Analysis, Experimental Design, Factor Analysis, Related Techniques, Feminist Methodology, Generalized Linear Models, Historical Comparative, Interviewing in Qualitative Research, Latent Variable Model, Life History, Biography, Loglinear Models, Categorical Dependent Variables, Longitudinal Analysis, Mathematics and Formal Models, Measurement Level, Measurement Testing, Classification, Multiple Regression, Multilevel Analysis, Qualitative Data Analysis, Sampling in Surveys, Sampling in Qualitative Research, Scaling, Significance Testing, Simple Regression, Survey Design, Time Series.

**Key Features:** Over 900 entries arranged A to Z. Each entry is written by a leading authority in the field, covering both quantitative and qualitative methods. Covers all disciplines within the social sciences. Contains both concise definitions and in-depth essays. Three volumes and more than 1500 pages.

*Sport in Underdeveloped and Conflict Regions* Meredith A. Whitley, William V. Massey, Simon C. Darnell, Brett Smith, 2018-12-07

Over the past two decades, scholars and practitioners have taken a keen interest in the field of Sport for Development and Peace (SDP). These efforts have largely focused on and debated the merits of sport as a tool for development, diplomacy, and peacebuilding in under-resourced, underdeveloped, and conflict regions. Making sense of the positive contributions that sport can offer to such complex and multi-faceted issues requires understanding the various connections and meanings that individuals and communities ascribe to their sporting experiences. This book offers a unique outlet for research that engages with rather than makes claims about individuals and communities around the world. Diverse contemporary and thought-provoking examples of qualitative methods in the study of SDP are detailed along with rich, meaningful, and provocative insights from these studies. Readers are invited to think critically about the fields of enquiry, philosophical underpinnings, and methodologies utilised, as well as the audiences engaged and topics explored. We hope readers will join us in considering how these chapters can push the SDP field into more rigorous, methodologically innovative, and diverse approaches to research and evaluation while also engaging with actors who are still often spoken for or about rather than with. This book was originally published as a special issue of *Qualitative Research in Sport, Exercise and Health*.

Vedic Practice, Ritual Studies and Jaimini's Mīmāṃsāsūtras Samuel G. Ngaihte, 2019-06-27 Drawing on insights from Indian intellectual tradition this book examines the conception of dharma by Jaimini in his Mīmāṃsāsūtras assessing its contemporary

relevance particularly within ritual scholarship Presenting a hermeneutical re reading of the text it investigates the theme of the relationship between subjectivity and tradition in the discussion of dharma bringing it into conversation with contemporary discourses on ritual The primary argument offered is that Jaimini s conception of dharma can be read as a philosophy of Vedic practice centred on the enjoinder of the subject whose stages of transformation possess the structure of a hermeneutic tradition Offering both substantive and methodological insights into the contentions within the contemporary study of ritual this book will be of interest to researchers in the fields of Hindu studies ritual studies Asian religion and South Asian studies     The Qualitative Researcher's Companion Michael Huberman,Matthew B.
