**Ecopsychology, Phenomenology, and the Environment** Douglas A. Vakoch, Fernando Castrillón, 2014-02-17 This book seeks to confront an apparent contradiction that while we are constantly attending to environmental issues we seem to be woefully out of touch with nature The goal of Ecopsychology Phenomenology and the Environment is to foster an enhanced awareness of nature that can lead us to new ways of relating to the environment ultimately yielding more sustainable patterns of living This volume is different from other books in the rapidly growing field of ecopsychology in its emphasis on phenomenological approaches building on the work of phenomenological psychologists such as Maurice Merleau Ponty This focus on phenomenological methodologies for articulating our direct experience of nature serves as a critical complement to the usual methodologies of environmental and conservation psychologists who have emphasized quantitative research Moreover Ecopsychology Phenomenology and the Environment is distinctive insofar as chapters by phenomenologically sophisticated ecopsychologists are complemented by chapters written by phenomenological researchers of environmental issues with backgrounds in philosophy and geology providing a breadth and depth of perspective not found in other works written exclusively by psychologists Ontology and

Closeness in Human-Nature Relationships Neil H. Kessler, 2018-10-10 In *Ontology and Closeness in Human Nature Relationships* Neil H Kessler identifies the preconceptions which can keep the modern human mind in the dark about what is happening relationally between humans and the more than human world He has written an accessible work of environmental philosophy with a focus on the ontology of human nature relationships In it he contends that large scale environmental problems are intimate and relational in origin He also challenges the deeply embedded modernist assumptions about the relational limitations of more than human beings ones which place erroneous limitations on the possibilities for human more than human closeness Diverging from the posthumanist literature and its frequent reliance on new materialist ontology the arguments in the book attempt to sweep away what ecofeminists call human nature dualisms In doing so conceptual avenues open up that have the power to radically alter how we engage in our daily interactions with the more than human world all around us Given the diversity of fields and disciplines focused on the human nature relationship the topics of this book vary quite broadly but always converge at the nexus of what is possible between humans and more than human beings The discussion interweaves the influence of human nature dualisms with the limitations of Deleuzian becoming and posthumanism's new materialism and agential realism It leverages interhuman interdependence theory Charles Peirce's synechism of feeling and various treatments of Theory of Mind while exploring the influence of human nature dualisms on sustainability place attachment common worlds pedagogy emergence and critical animal studies It also explores the implications of plant electrical activity plant intelligence and plant neurobiology for possibilities of relational capacities in plants while even grappling with theories of animism to challenge the animate inanimate divide The result is an engaging novel treatment of human nature relational ontology that will encourage the reader to look at the world in a whole new way

*The Integral Nature of Things* Lata Mani, 2020-11-29 The world is an interdependent whole of which everything is an integral complexly related part Yet current ways of thinking and being persistently separate social phenomena and the individual self from the multiple dimensions with which they are interconnected *The Integral Nature of Things* examines this revealing paradox and its consequences in a variety of sites everyday language labour advertising technology post structuralist theory political rhetoric urban planning sex neoliberal globalisation Mani demonstrates how even though the interrelations between things are obscured by the ruling paradigm the facts of relationality and indivisibility continually assert themselves The book interweaves prose with poetry and sociocultural analysis with observational accounts to offer an alternative framework for addressing aspects of the cognitive cultural political and ethical crisis we face today

**The Genesis of Marriage: A Drama Displaying the Nature and Character of God** Richard Shenk, 2018-08-01 A theological exploration of Genesis 2 which renews our vision of the purpose of marriage as the central drama within God's salvation plan Marriage seems increasingly irrelevant to many people today But is this a true understanding of marriage Could it be that God may have expectations for marriage which are distinct from our own and wholly unaffected by our feelings or debates If God is the author and definer of marriage then we must look to the Author to discern its meaning rather than ourselves The Genesis of Marriage sets out a biblical theology of marriage grounded in the Marriage Text of Genesis 2:18-25 and investigates how it fits in its own context of Genesis 1:3 and the whole of Scripture Examining the Marriage Text exegetically and theologically Shenk shows this as the climax and conclusion of the two creation accounts and explores what this reveals about the nature and character of God The doctrinal implications of this are then explored answering such practical questions such as What are the ethics of marriage and How do we approach the real world concerns of separation divorce and remarriage Shenk's exploration helps dispel our modern disillusionment with marriage or at least our ideas and beliefs about marriage which may be at odds with God's to reveal deep truth about the nature and character of God
