Gale, Jean V. McHale, 2015-04-10 The provision and use of traditional complementary and alternative medicine CAM has been growing globally over the last 40 years As CAM develops alongside and sometimes integrates with conventional medicine this handbook provides the first major overview of its regulation and professionalization from social science and legal perspectives The Routledge Handbook of Complementary and Alternative Medicine draws on historical and international comparative research to provide a rigorous and thematic examination of the field It argues that many popular and policy debates are stuck in a polarized and largely asocial discourse and that interdisciplinary social science perspectives theorising diversity in the field provide a much more robust evidence base for policy and practice in the field Divided into four sections the handbook covers analytical frameworks power professions and health spaces risk and regulation perspectives for the future This important volume will interest social science and legal scholars researching complementary and alternative medicine professional identity and health care regulation as well as historians and health policymakers and regulators      **Healing with water** Jane M. Adams, 2015-05-01 Healing with water provides a medical and social history of English spas and hydropathic centres from the early nineteenth to the mid twentieth centuries It argues that demand for healing rather than leisure drove the growth of a number of inland resorts which became renowned for expertise and treatment facilities These aspects were actively marketed to doctors and patients It assesses the influence of these centres on broader patterns of resort development leisure and sociability in Britain The study explores ideas about water's healing potential and the varied ways it was used to maintain good health and treat a

variety of illnesses Water cures were endorsed by both orthodox and unorthodox practitioners and attracted growing numbers of patients into the twentieth century It examines how institutions and skilled workers shaped the development of specialist resorts and considers why the NHS support for spa treatment declined from the 1960s *The Healing Powers of Herbs* Ranjit Roy Chaudhury, 2007-06-08 The stress and strain of modern day living takes its toll on our mind and body Lack of time and patience make us resort to methods which provide instant relief and often we forget that the answer to a problem is effective cure Modern medicine has made many discoveries yet the side effects of many of the wonder drugs cannot be ignored This book on medicinal plants and their healing powers is a compilation of articles written for Asian Age by the author The articles are interesting and informative and throw light on the little known facts about various herbs What makes this book stand out amongst countless number of books on alternative medicine is that the healing properties of each medicinal plant has been explained in detail and many of them are taken from ancient traditional books on medicine of the Indian as well as the Chinese culture The readers are also made aware about the importance of the many treasured herbs and also the issue of patent regarding the same A fountain of knowledge on medicinal plants this book is a must for professional as well as personal collection *Index-catalogue of the Library of the Surgeon General's Office, United States Army (Army Medical Library)* National Library of Medicine (U.S.), 1959 **The Health & Nature Cure Handbook**, 1934
