The Canadian Patent Office Record and Register of Copyrights and Trade Marks, 1913 **Official Gazette of the United States Patent Office** United States. Patent Office, 1922 **Scientific Canadian Mechanics' Magazine and Patent Office Record** Canada. Patent Office, 1909 **Nature Revealed** Edward O. Wilson, 2006-03 Two time Pulitzer Prize winner Edward O Wilson is one of the leading biologists and philosophical thinkers of our time In this compelling collection Wilson s observations range from the tiny glands of ants to the nature of the living universe Many of the pieces are considered landmarks in evolutionary biology ecology and behavioral biology Wilson explores topics as diverse as slavery in ants the genetic basis of societal structure the discovery of the taxon cycle the original formulation of the theory of island biogeography a critique of subspecies as a unit of classification and the conservation of life s diversity Each article is presented in its original form dating from Wilson s first published article in 1949 to his most recent exploration of the natural world Preceding each piece is a brief essay by Wilson that explains the context in which the article was written and provides insights into the scientist himself and the debates of the time This collection enables us to share Wilson s various vantage points and to view the complexities of nature through his eyes Wilson aficionados along with readers discovering his work for the first time will find in this collection a world of beauty complexity and challenge *Modern Political Theory from Hobbes to Marx* Jack Lively, Andrew Reeve, 2013-12-16 This anthology offers students a carefully edited selection of the most influential and enduring interpretations of key political theorists There are sections on Hobbes Locke Rousseau Burke Bentham Mill and Marx Each section includes classic articles by leading critics a substantial introduction by the editors and a guide to further reading A general introduction to the volume as a whole is also provided This is an up to date and extensive guide to the key issues at stake in the interpretative debate and it provides an invaluable text for students and teachers of modern political thought *Like Cats and Dogs* Steven Heine, 2013-10-07 Koans are dialogues that stand at the center of Zen Buddhist literature and are often used to provoke the great doubt in testing a trainee s progress The Mu Koan consists of a brief conversation in which a monk asks Master Zhaozhou whether or not a dog has Buddha nature According to the main version the reply is Mu literally No but implying the philosophical notion of nothingness This case is widely considered to be the single best known and most widely circulated koan record of the Zen school that offers existential release from anxiety to attain spiritual illumination In a careful analysis of the historical and rhetorical basis of the literature Steven Heine demonstrates that the Mu version of the case preferred by advocates of the key phrase approach does not by any means constitute the final word concerning the meaning and significance of the Mu Koan He shows that another canonical version which gives both Yes and No responses must be taken into account Like Cats and Dogs offers critical insight and a new theoretical perspective on the koan of koans *The Creative Imagination* Jodie Lee Heap, 2021-06-17 By engaging with the notions of indeterminacy and embodiment within the writings of Immanuel Kant Johann Fichte and Cornelius Castoriadis this

book addresses and brings to the fore the significance of the creative imagination as an ontological source of human creation Principally inspired by Castoriadis revolutionary elucidation of the imagination and the imaginary this book actively contributes to this neglected line of enquiry by exposing deep lines of continuity and rupture both within and between the writings of Kant Fichte and Castoriadis Beginning with Kant s hesitation in describing the productive imagination as a creative and embodied power of the soul this book traces these lines of continuity and rupture through Fichte s innovative depiction of the creative imagination as an ontological power of creation and through Castoriadis radical extension of this idea into the social historical realm Given the notions of indeterminacy and embodiment actively inform these lines of continuity and of rupture this book contributes to the landscape of thinking by proposing the creative imagination must be envisaged an embodied power of the human soul

The Principle of Relativity with Applications to Physical Science Alfred North Whitehead,2012-09-20 The distinguished English mathematician philosopher presents an alternative rendering of the theory of relativity conceived long after Einstein s original groundbreaking papers appropriate for upper level

undergraduates and graduate students 1922 edition **Uncovering Calvin's God** Forrest H. Buckner,2020-08-20 Although God loves you is a common summary of the central message of Christian teaching and preaching a close reading of the Bible and attention to the Christian tradition will reveal passages of Scripture and Christian doctrines particularly John Calvin s doctrine of predestination that seem to undermine confidence in God s love for all people For numerous theologians including many within the Reformed tradition the secret decree of Calvin s God to save some and condemn others seems to undercut completely one s assurance of salvation along with one s ability to trust in and worship God However pastor and scholar John Calvin confidently spoke of God as a loving Father throughout his teaching and preaching In *Uncovering Calvin's God* Forrest H Buckner unearths Calvin s teaching about the God of love who reigns sovereign over predestination Drawing upon sources from across Calvin s corpus Buckner examines Calvin s teaching on the knowledge of God and the doctrine of predestination to provide a more robust and cohesive understanding of Calvin s theology which Buckner then confirms through an extensive examination of Calvin s preaching in Geneva He then offers a critical comparison of Calvin s approach with the teaching of Luther Zwingli Bullinger Arminius and Barth Using Calvin s system as a starting point this book helps readers perceive the essentials and trade offs of any doctrine of predestination that takes seriously both the Bible and the loving God revealed in Jesus Christ
