## **Nature Hunt:**

*Nature* Sir Norman Lockyer, 1917      **Civilizing Nature** Bernhard Gissibl, Sabine Höhler, Patrick Kupper, 2012-11-01

National parks are one of the most important and successful institutions in global environmentalism. Since their first designation in the United States in the 1860s and 1870s, they have become a global phenomenon. The development of these ecological and political systems cannot be understood as a simple reaction to mounting environmental problems, nor can it be explained by the spread of environmental sensibilities. Shifting the focus from the usual emphasis on national parks in the United States, this volume adopts an historical and transnational perspective on the global geography of protected areas and its changes over time. It focuses especially on the actors, networks, mechanisms, arenas, and institutions responsible for the global spread of the national park and the associated utilization and mobilization of asymmetrical relationships of power and knowledge contributing to scholarly discussions of globalization and the emergence of global environmental institutions and governance.

**Nature Sparks** Aerial Cross, 2011-10-11. Nature has monumental power on children's growth and development. Recent studies show that as children spend less time in nature, they miss out on the profound benefits that outdoor play and learning experiences provide. *Nature Sparks* is filled with inspiration and instruction to help educators and caregivers of children ages three to eight reclaim and strengthen connections to the outdoors. This resource supplies ideas to create a nature-oriented classroom and curriculum. It incorporates Howard Gardner's theory of multiple intelligences to encourage children's individual talents as they experience the natural world and includes more than fifty sensory-integrated activities, crafts, and instructional strategies.

**The Nature of Church Camp** Christopher W. Anderson, 2023-12-18. *The Nature of Church Camp: An Environmental History of Outdoor Ministry, 1945-1980* by Christopher W. Anderson explores the mid-twentieth-century history of religious camps and retreat centers to provide new insights into the history of environmentalism in the United States. Ecumenical Protestantism and the ecology movement both changed the calculus of American morality after World War II. Through archival material, case study visits, and oral histories, Anderson finds that these institutions often reacted to ecological critiques with temperate but gradual reforms. However, camps and outdoor ministries, by virtue of their natural settings and sizable acreage, soon provided a new way to explore the history of spirituality and ecology, moving away from the conference campus and using nostalgia for

the frontier instead to make arguments about the meaning of the American nation and the value of democracy This new way of thinking was reflected throughout the camps and enthusiastically endorsed decentralized small group camping By examining the conduct of church camps and conferences before during and after the ecological era Anderson shows how environmental stewardship became the dominant paradigm for Protestant environmentalism why that is a flawed and fractious model and why it has stalled *The Nature of Endangerment in India* Ezra Rashkow,2023-01-30 This book is a study of the concepts of endangerment and extinction Examining interlinking discourses of biological and cultural diversity loss in western and central India it problematizes the long history of human endangerment and extinction discourse

theologians and the spiritually inclined as well as all those concerned with humanity s increasingly widespread environmental impact are beginning to recognize that our ongoing abuse of the earth diminishes our moral as well as our material condition Many people are coming to believe that strengthening the bonds among spirituality science and the natural world offers an important key to addressing the pervasive environmental problems we face The Good in Nature and Humanity brings together 20 leading thinkers and writers including Ursula Goodenough Lynn Margulis Dorion Sagan Carl Safina David Petersen Wendell Berry Terry Tempest Williams and Barry Lopez to examine the divide between faith and reason and to seek a means for developing an environmental ethic that will help us confront two of our most imperiling crises global environmental destruction and an impoverished spirituality The book explores the ways in which science spirit and religion can guide the experience and understanding of our ongoing relationship with the natural world and examines how the

integration of science and spirituality can equip us to make wiser choices in using and managing the natural environment The book also provides compelling stories that offer a narrative understanding of the relations among science spirit and nature Grounded in the premise that neither science nor religion can by itself resolve the prevailing malaise of environmental and moral decline contributors seek viable approaches to averting environmental catastrophe and more positively to achieving a more harmonious relationship with the natural world By bridging the gap between the rational and the religious through the concern of each for understanding the human relation to creation The Good in Nature and Humanity offers an important means for pursuing the quest for a more secure and meaningful world      **The Nature Connection** Clare Walker
