Cultural Citizenship and Popular Culture Joke Hermes,2023-09-27 Written in an accessible and engaging style this book uses a series of case studies to show how popular media are important to us as a source of pleasure and entertainment but also in communicating about the world with others Social media platforms have changed how we talk about what we like and dislike in our popular media use Cultural citizenship shows how these discussions speak to belonging to what we feel our rights and responsibilities are in today's polarized world Cultural Citizenship and Popular Culture is based on audience led research and does not privilege textual analysis as a starting point for taking popular media use's measure Instead it offers research tools to listen to others This book offers scholars and students of media and creative industries a means to understand their professional position as one in which they engage with rather than assume to know what users of popular cultural texts and products think and feel Observing Theatre Daniel Meyer-Dinkgräfe,2013-12-01 Daniel Meyer Dinkgräfe and co authors take the exploration of the subjective dimension of theatre its spiritual context its relation to consciousness and natural law further than ever before thanks to the context provided by the thinking of German geobiologist Hans Binder We present relevant aspects of Binder's approach as precisely as possible then take Binder's approach for granted to tease out the implications of that approach to the issues of theatre including nostalgia intercultural theatre theatre criticism dealing with demanding roles the canon theatre and philosophy digital performance practice as research and applied theatre Overall the book proposes an overarching emphasis on the importance of living in the present and the concomitant need to abandon obsolete but still powerful patterns of the past In this context theatre according to Binder has a global responsibility for the new world in which humans are liberated from the scourge of the past Theatre has the power and thus the responsibility to be path breaking for a new fiction to show to people in a playful and creative manner the direction in which the new consciousness can move Daniel Meyer Dinkgräfe is Professor of Drama at the Lincoln School of Performing Arts

University of Lincoln He has numerous publications on the topic of Theatre and Consciousness to his credit and is founding editor of the peer reviewed web journal *Consciousness Literature and the Arts* and the book series of the same title with Rodopi

Gender and Environment in Science Fiction Bridgitte Barclay,Christy Tidwell,2020-07-07 *Gender and Environment in Science Fiction* focuses on the variety of ways that gender and nature interact in science fiction films and fictions exploring questions of different realities and posing new ones Science fiction asks questions to propose other ways of living it asks what if and that question is the basis for alternative narratives of ourselves and the world we are a part of What if humans could terraform planets What if we could create human nonhuman hybrids What if artificial intelligence gains consciousness What if we could realize kinship with other species through heightened empathy or traumatic experiences What if we imagine a world without oil The texts analyzed in this book ask these questions and others exploring how humans and nonhumans are connected how nonhuman biologies can offer diverse ways to think about human sex gender and sexual orientation and how interpretive strategies can subvert the messages of older films and written texts

Music and the Functions of the Brain: Arousal, Emotions, and Pleasure Mark Reybrouck,Tuomas Eerola,Piotr Podlipniak,2018-04-12 Music impinges upon the body and the brain As such it has significant inductive power which relies both on innate dispositions and acquired mechanisms and competencies The processes are partly autonomous and partly deliberate and interrelations between several levels of processing are becoming clearer with accumulating new evidence For instance recent developments in neuroimaging techniques have broadened the field by encompassing the study of cortical and subcortical processing of the music The domain of musical emotions is a typical example with a major focus on the pleasure that can be derived from listening to music Pleasure however is not the only emotion to be induced and the mechanisms behind its elicitation are far from understood There are also mechanisms related to arousal and activation that are both less differentiated and at the same time more complex than the assumed mechanisms that trigger basic emotions It is imperative therefore to investigate what pleasurable and mood modifying effects music can have on human beings in real time listening situations This e book is an attempt to answer these questions Revolving around the specificity of music experience in terms of perception emotional reactions and aesthetic assessment it presents new hypotheses theoretical claims as well as new empirical data which contribute to a better understanding of the functions of the brain as related to musical experience

Psychoanalysis as a navigation device for the cultural maze of the twenty first century Can Freud be updated in the twenty first century or is he a venerated but outmoded genius asks Jerry Aline Flieger In *Is Oedipus Online* Flieger stages an encounter between psychoanalysis and the new century testing the viability of Freud s theories in light of the emergent realities of our time Responding to prominent critics of psychoanalysis and approaching our current preoccupations from a Freudian angle she presents a reading of Freudian theory that coincides with and even clarifies new concepts in science and culture Fractals emergence topological modeling and other nonlinearities for example can be understood in light of both Freud s idea of the symptom as a nodal point and Lacan s concept of networks rather than sequential cause and effect that link psychic realities At the same time Flieger suggests how emerging paradigms in science and culture may elucidate Freud s cultural theory Like Slavoj Zizek editor of the *Short Circuits* series Flieger shifts effortlessly from field to field discussing psychoanalysis millennial culture nonlinear science and the landscape of cyberspace In the first half of the book *Re siting Oedipus* she draws on the work of Lyotard Zizek Deleuze Virilio Baudrillard Haraway and others to refute the assumption of Freud s outdatedness in the new century Then in *Freud Sitings in Millennial Theory* she recasts oedipal theory siting sighting citing Freud in a twenty first century context Thinking of Oedipus decipherer of enigmas wanderer as a navigator or search

engine allows us to see psychoanalysis as a navigation device for the cultural maze of the bimillennial era and Oedipus himself as a circuit of intersubjective processes by which we become human For humanity still needed in the posthuman century is at the core of Freud's theory Reading Freud today Flieger writes reminds us of the complications of the Sphinx's riddle the enigma that Oedipus only thought he solved the question of what it is to be human Psychoanalysis continues to pose that question at the crossroads between instincts and their vicissitudes
