New England **Animals in Literary Education** John Drew, 2025-09-24 This book examines the complicated place of animals in literary analysis and education and shows how an ethically engaged approach to animals representation could be pursued to challenge anthropocentrism and cultivate multispecies empathy Other species are represented in the literary education canon including farmed animals Yet the animals are typically anthropomorphized to guide students toward humanist readings and away from consideration of animals experiences or subjectivities This reproduces the idea that animals are mere objects meant to be exploited for human purposes even metaphorical and educational ones John Drew develops the term anthropo allegory to capture and critique the process through which students are taught to read animal literary representations exclusively as symbolic analogues for humans and human themes The concept serves as an analytical lens for critically interrogating significant texts taught across educational levels and exposing the deeply engrained educational anthropocentrism that silences animal issues even when animals are represented Crucially Drew identifies texts and pedagogical strategies that can help cultivate a literary educational animal ethic that simultaneously encourages analytical rigour and multispecies concern The Rights of Nature Roderick Frazier Nash, 1989-01-17 Charting the history of contemporary philosophical and religious beliefs regarding nature Roderick Nash focuses primarily on changing attitudes toward nature in the United States His work is the first comprehensive history of the concept that nature has rights and that American liberalism has in effect been extended to the nonhuman world A splendid book Roderick Nash has written another classic This exploration of a new dimension in environmental ethics is both illuminating and overdue Stewart Udall His account makes history come alive Sierra So smoothly written that one almost does not notice the breadth of scholarship that went into this original and important work of environmental history Philip Shabecoff New York Times Book Review Clarifying and challenging this is an essential text for deep ecologists and ecophilosophers Stephanie Mills Utne Reader *Animal Nature and Human Nature* William Homan Thorpe, 1974 **Your Brain On Nature** Eva M. N. Shuker,2001 *Animals, Nature & Albert Schweitzer* ANN COTTRELL. FREE,2000 **Nature Stories** Jules Renard,2011-12-14 The natural world in all its richness glimpsed variously in the house the barnyard and the garden in ponds and streams and at large in the woods and the fields including old friends like the dog the cat the cow and the pig along with more unusual and sometimes alarming characters such as the weasel the dragonfly snakes of several sorts and even a whale not to mention ants in their seeming infinitude and a single humble potato all these and more are the subjects of what may well be the most deft and delightful book of literary miniatures ever written In Jules Renard s world plants and animals not only feel but speak one species the swallow appears to write Hebrew and yet for all the anthropomorphic wit and whimsy the author indulges in they guard their mystery too Sly funny and touching Nature Stories here beautifully rendered into English by Douglas Parm e and accompanied by the wonderful ink brush images of Pierre Bonnard with which the book was originally published is a literary classic of inexhaustible freshness *Nature* Sir Norman Lockyer,1919 The Intrinsic Value of Nature Leena Vilkkä,1997 What is intrinsic value What is the origin of value Are people always superior to nature This book is a philosophical analysis of the human relationship to the non human world It is a pioneering study of the philosophy of nature conservation in relation to the discussion of intrinsic value Vilkkä develops a naturalistic or naturocentric theory of value that is based on ethical extensionism and pluralism Vilkkä analyzes natural values and environmental attitudes zoocentrism biocentrism and ecocentrism This book forms a taxonomy for nature having intrinsic value The theory of intrinsic value is based on naturocentric and naturogenic values The book questions the thesis of weak anthropocentrism that denies the existence of naturogenic values In Vilkkä s theory animals and nature are the origin of value She defends the existence of zoogenic and biogenic values in the non human world and discusses the possibility of ecogenic value nature as a whole having value independent of human or animal minds Vilkkä analyzes the goodness and rights of nature the problem of priorities and ecological humanism A naturocentric recommendation is that the well being of animals and nature should have priority over human values at least in some real decision contexts Ecological humanism recommends an attitude of respect for people animals and nature The book includes an extensive glossary index and bibliography **Environmental Law and Contrasting Ideas of Nature** Keith H. embedded discrete constructions of nature helps in understanding how humans value their relationship with nature This book offers a scholarly examination of the manner in which nature is constructed through law both in the hard sense of directly regulating human activities that impact nature and in the soft manner in which law's ideas of nature influence and are influenced by behaviors values and priorities Traditional accounts of the intersection between law and nature generally focus on environmental laws that protect wilderness This book will build on the constructivist observation that when considered as a culturally contingent concept nature is a self-perpetuating and self-reinforcing social creation
