Huntington, Revival: Philosophy and the Physicists (1937) Lizzie Susan Stebbing, 2018-05-08 This book is written by a philosopher for other philosophers and for that section of the reading public who buy in large quantities and no doubt devour with great earnestness the popular books written by scientists for their enlightenment We common readers to adapt a phrase from Samuel Johnson are fitted neither to criticize physical theories nor to decide what precisely are their implications We are dependent upon the scientists for an exposition of those developments which so we find them proclaiming have important and far reaching consequences for philosophy Unfortunately however our popular expositors do not always serve us very well The two who are most widely read in this country are Sir Arthur Eddington and Sir James Jeans They are not always reliable guides Their influence has been considerable upon the reading public upon theologians and upon preachers they have even misled philosopher who should have known better Accordingly it has seemed to me to be worth while to examine in some detail the philosophical views that they have put forth and to criticize the grounds upon which these views are based *The Art of Photographing Nature* Martha Hill, 1993 The first how to book by Art Wolfe America's most renowned nature photographer written in collaboration with the former photography editor of Audubon magazine Together they help everyone from novice to experienced amateur to see like a photography professional Full color photographs **Mathematics in Nature** John Adam, 2011-10-02 From rainbows river meanders and shadows to spider webs honeycombs and the markings on animal coats the visible world is full of patterns that can be described mathematically Examining such readily observable phenomena this book introduces

readers to the beauty of nature as revealed by mathematics and the beauty of mathematics as revealed in nature Generously illustrated written in an informal style and replete with examples from everyday life Mathematics in Nature is an excellent and undaunting introduction to the ideas and methods of mathematical modeling It illustrates how mathematics can be used to formulate and solve puzzles observed in nature and to interpret the solutions In the process it teaches such topics as the art of estimation and the effects of scale particularly what happens as things get bigger Readers will develop an understanding of the symbiosis that exists between basic scientific principles and their mathematical expressions as well as a deeper appreciation for such natural phenomena as cloud formations halos and glories tree heights and leaf patterns butterfly and moth wings and even puddles and mud cracks Developed out of a university course this book makes an ideal supplemental text for courses in applied mathematics and mathematical modeling It will also appeal to mathematics educators and enthusiasts at all levels and is designed so that it can be dipped into at leisure *Hans Christian Ørsted* Dan Ch. Christensen,2013-05-30 Hans Christian Ørsted 1777 1851 is of great importance as a scientist and philosopher far beyond the borders of Denmark and his own time At the centre of an international network of scholars he was instrumental in founding the world picture of modern physics Ørsted was the physicist who brought Kant's metaphysics to fruition In 1820 his discovery of electro magnetism a phenomenon that could not possibly exist according to his adversaries changed the course of research in physics It inspired Michael Faraday's experiments and discovery of the adverse effect magneto electric induction The two physical phenomena were later described in mathematical equations by J C Maxwell Together these discoveries constitute the prerequisites for the overwhelming development of modern technology But Ørsted was also one of the cultural leaders and organizers of the Danish Golden Age together with Grundtvig Kierkegaard and Hans Christian Andersen his protegé and made significant contributions to aesthetics philosophy pedagogy politics and religion Ørsted remarkably bridged the gap between science the humanities and the arts *The Nature of Light & Colour in the Open Air.* Translation (By M.
