Although rarely seen in the wild the otter is admired for its playful character and graceful aquatic agility fixed in the popular imagination through books and films such as Tarka the Otter and Ring of Bright Water This is just a small part of its story however throughout history the otter has been hunted for its fur and to prevent it from killing fish Featuring numerous images from nature and culture as well as examples from folklore sports and literature this wide ranging book also explores the movement against otter hunting and the ongoing efforts promoting otter conservation A fittingly lively study of its subject Otter offers a new way of thinking about this much loved but endangered animal **Living with Animals** Michael Pomedli, 2014-02-24 Within nineteenth century Ojibwe Chippewa medicine societies and in communities at large animals are realities and symbols that demonstrate cultural principles of North American Ojibwe nations Living with Animals presents over 100 images from oral and written sources including birch bark scrolls rock art stories games and dreams in which animals appear as kindred beings spirit powers healers and protectors Michael Pomedli shows that the principles at play in these sources are not merely evidence of cultural values but also unique standards brought to treaty signings by Ojibwe leaders In addition these principles are norms against which North American treaty interpretations should be reframed The author provides an important foundation for ongoing treaty negotiations and for what contemporary Ojibwe cultural figures corroborate as ways of leading a good integrated life Sea Otters Isabelle Groc, 2020-04-07 Sea otters once ruled the Pacific Ocean but the fur trade of the eighteenth and nineteenth centuries brought this predator to near extinction Today they re slowly coming back from the brink and scientists are learning more about their pivotal role as one of nature s keystone species This book looks at the history biology behavior and uncertain future of sea otters Author and photojournalist Isabelle Groc takes us into the field watching sea otter rafts off the British Columbia coast from a kayak exploring what makes their fur coats so special understanding how their voracious appetites are helping kelp forests thrive and ultimately learning how sea otters are leaving their mark or paws on every part of the ecosystem They might be one of the most adorable creatures in the ocean but kids will discover how their survival is key to a rich complex and connected ecosystem
