Rights of Nature in Liberal Legal Systems and International Law Jasper Mührel,2024-12-19 Rights of nature are on the rise worldwide having already been recognized in several states especially in Latin America and Asia For the first time in a monograph this book offers answers to the questions of whether and how rights of nature can also be implemented in Western liberal legal systems and in international law It traces how the latter are characterized by a deeply rooted anthropocentrism While at first glance this seems to make the recognition of rights of nature difficult to conceive the book shows that in the 21st century this strong anthropocentrism is neither helpful nor irrevocable and that non anthropocentric approaches can already be found in liberal legal systems and in international law Against the backdrop of the pressing environmental crises of the Anthropocene it offers liberal and international approaches to rights of nature In doing so the book analyzes the compatibility of rights of nature with Western liberal and international law and deals comprehensively with the criticism and potential benefits of rights of nature in order to ultimately provide concrete proposals for their implementation
