Rising's or Stiver's work you have a real treat ahead when reading this book. The publisher is William R. Parks, Hershey, PA. Dr. Gerald R. Rising, Sr., the author of these columns, is a Distinguished Teaching Professor Emeritus at the University at Buffalo. His day job at the university was working with school mathematics teachers and teaching mathematics and computer science. Rising is the author of over a dozen mathematics texts; the most recent include *Program Your Calculator* and *About Mathematics*, the latter written for college liberal arts students. Not a professional biologist, Professor Rising seeks to communicate to his readers his own involvement with and love of nature. He has explored the outdoors through hiking, canoeing, and biking. This year, at age 85, he plans to ride his motor scooter on a camping trip around Lake Michigan, completing his similar circumnavigations of all the Great Lakes. Rising lives with his wife Doris in Amherst, New York, a Buffalo suburb. He has two children, four grandchildren, and a great granddaughter. Harold Stiver is a partner in a financial services company who lives with his wife Elaine in Paris, Ontario. He has two daughters and one grandson whom he spoils relentlessly. He has long had a fascination with the natural world and has traveled widely, exploring and photographing it. You can see more of his images at <http://www.singularvideo.com>. He is the author of a series of eBook Guides for Photographers and Explorers covering subjects like Waterfalls, Old Mills, and Covered Bridges. They are available at Amazon and other popular distributors.

Book Reviews: I can't think of very many newspaper columns from two decades ago that I would think of buying and reading, but this book is an exception. Reading Gerry Rising's book of Nature Watch columns is like taking walks with a knowledgeable and genial friend, someone whose observations and comments let you see parts of the world around you with more clarity and appreciation. The writing style is informal but informative, with a descriptive skill that evokes a sense of being there.

Dwight Kauppi: This compilation represents the first full year of those informative, insightful, and interesting writings. Rising's work has broad appeal. Readers are treated to widely varied subject material, as exemplified in the following column titles: *Hiker's Log*, *Ladybird Johnson*, *Route 20*, *Maple Leaves*, *Charles Darwin*, *Our Deer Problem*, *Bluebird*, and *Frog Songs*. The author's approach to these weekly topics includes appreciation, comment, reflection, and scientific observation.

*Nature's Holism* Laurence Evans,1999-08-10 In the association of the bee and the flower is a very advanced reflection of the process of evolution through natural selection Nature s Holism explores the coevolution of long associated species arriving at a holistic view of nature where the compatibility between species is significant In nature there are two interacting forces There is the numerical increase in numbers of a species termed a force of perpetuity Increasing numbers of a single species have an inevitable impact on the environment However as each species survives within an ecological context there is a feedback from the ecosystem as numbers increase requiring a necessary compatibility with the ecosystem Fitness is therefore defined not only by quantitative representation of genes in the next generation perpetuity but also the qualitative condition of compatibility with the habitat or ecosystem that provided the conditions and resources for this success
