Transforming Socio-Natures in Turkey Onur İnal, Ethemcan Turhan, 2019-07-09 This book is an exploration of the environmental makings and contested historical trajectories of environmental change in Turkey Despite the recent proliferation of studies on the political economy of environmental change and urban transformation until now there has not been a sufficiently complete treatment of Turkey's troubled environments which live on the edge both geographically between Europe and Middle East and politically between democracy and totalitarianism The contributors to Transforming Socio Natures in Turkey use the toolbox of environmental humanities to explore the main political cultural and historical factors relating to the country's socio environmental problems This leads not only to a better grounding of some of the historical and contemporary debates on the environment in Turkey but also a deeper understanding of the multiplicity of framings around more than human interactions in the country in a time of authoritarian populism This book will be of interest not only to students of Turkey

from a variety of social science and humanities disciplines but also contribute to the larger debates on environmental change and developmentalism in the context of a global populist turn *Nature's End* S. Sörlin, P. Warde, 2009-07-23 Environmental History as a distinct discipline is now over a generation old with a large and diverse group of practitioners around the globe This book provides a reflection on the achievements diversity and direction of environmental history in its varied national international and continental contexts *Frontier Thinking and Human-Nature Relations* E. C. H. Keskitalo, 2024-06-12 Combining historical social and regulative analysis this book builds a compelling critique of frontier thinking as it continues to form our assumptions about social and environmental organisation in ways that impact not least the present environmental crisis This book systematically identifies the ways in which images of nature and society are formed by the historically developed frontier oriented narratives which have underpinned much Anglo American and Anglocentric thought The book confronts these conceptions at large showing that they never held empirically and contrasts them with the situation in northern Europe where diverging assumptions are integral to this day Through this juxtaposition this book illustrates not only the pervasiveness of structures of understanding in steering policy but also the varying traditions regarding how understandings of the environment can be formed This study highlights how historical thought patterns formed for very different reasons than exist today continue to shape our assumptions about nature the relation between urban and rural areas and our understanding of ourselves in relation to the environment This book will be of wide interest to a range of academics and students in the fields of geography anthropology environmental studies sociology political science and development studies amongst others The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

New Moral Natures in Tourism Bryan S. R. Grimwood, Kellee Caton, Lisa Cooke, 2018-04-17 How do we understand human nature relationships in tourism or determine the consequences of these relationships to be good bad right wrong fair or just What theoretical and philosophical perspectives can usefully orient us in the production and consumption of tourism towards living and enacting the good life with the more than human world This book addresses such questions by investigating relationships between nature and morality in tourism contexts Recognizing that morality much like nature is embedded in histories and landscapes of power the book engages with diverse theoretical and philosophical perspectives to critically review appraise and advance dialogue on the moral dimensions of natures Contributing authors explore the very foundations of how we make sense of nature in tourism and leisure contexts and how we might make sense of it differently The book will be essential reading for researchers students and practitioners grappling with questions about the moral values frameworks or practices best suited to mobilizing tourism natures What will the future of tourism hold in terms of sustainability justice resilience health and well being

Nature's Services Gretchen Cara Daily, 2012-09-26 Life itself as well as the entire human economy depends on goods and services provided by earth's natural systems The processes of cleansing recycling and renewal along with goods such as seafood forage and timber are worth many trillions of dollars annually and nothing could live without them Yet growing human impacts on the environment are profoundly disrupting the functioning of natural systems and imperiling the delivery of these services Nature's Services brings together world renowned scientists from a variety of disciplines to examine the character and value of ecosystem services the damage that has been done to them and the consequent implications for human society Contributors including Paul R Ehrlich Donald Kennedy Pamela A Matson Robert Costanza Gary Paul Nabhan Jane Lubchenco Sandra Postel and Norman Myers present a detailed synthesis of our current understanding of a suite of ecosystem services and a preliminary assessment of their economic value Chapters consider major services including climate regulation soil fertility pollination and pest control philosophical and economic issues of valuation case studies of specific ecosystems and services implication of recent findings and steps that must be taken to address the most pressing concerns Nature's Services represents one of the first efforts by scientists to provide an overview of the many benefits and services that nature offers to people and the extent to which we are all vitally dependent on those services The book enhances our understanding of the value of the natural systems that surround us and can play an essential role in encouraging greater efforts to protect the earth's basic life support systems before it is too late

Kant on the Frontier Geoffrey Bennington, 2017-05-01 Frontier the border between two countries the limits of civilization the bounds of established knowledge a new field of activity At a time when all borders boundaries margins and limits are being often violently challenged erased or reinforced we must rethink the concept of frontier itself But is there even such a concept Through an original and imaginative reading of Kant Geoffrey Bennington casts doubt upon the

conceptual coherence of borders The frontier is the very element of Kant's thought yet the permanent frustration of his conceptuality Bennington brings out the frontier's complex abyssal fractal structure that leaves a residue of violence in every frontier and complicates Kant's most rational arguments in the direction of cosmopolitanism and perpetual peace Neither a critique of Kant nor a return to Kant this book proposes a new reflection on philosophical reading for which thinking the frontier is both essential and a recurrent fruitful interruption

The Recreational Frontier Michael Kleinod, 2017 This study treats ecotourism in National Protected Areas of Lao PDR as a recreational frontier which instrumentalizes the recreation of human natures in capitalism's centers for that of nonhuman natures at capitalism's closing frontiers This world ecological practice of ecorational instrumentality i.e. of nature domination in the name of Nature presents a remedy for capitalism's crisis that is itself crisis ridden enacting a central tension of ecocapitalism that between conservation and development This epistemic institutional tension is traced through the preconditions modes and effects of ecotourism in Laos by gradually zooming from the most general scale of societal nature relations into the most detailed intricacies of ecotouristic practice The combination of Bourdieu Marx and Critical Theory enables a systematic analysis of the recreational frontier as enactment of various contradictions deriving from the false and real Nature Society dualism

The political ecology of colonial capitalism Bikrum Gill, 2024-11-05 This book situates the post financial crisis phenomenon of the global land grab within the longue duree of the capitalist world system It does so by advancing a theoretical and historical framework called the political ecology of colonial capitalism that clarifies the key role played by the co production of race and nature in provisioning the ecological surplus that has historically secured the emergence and reproduction of capitalist development The key premise of this book is that the global land grab constitutes another such attempted moment of re securing the cheap food premise through racialized frontier appropriation The argument advanced here is that within the neoliberal crisis conjuncture the hegemonic resolution of capital's escalating social ecological contradictions necessitates through the practice of global primitive accumulation the racialized construction of frontiers of unused nature in emergent zones of appropriation
