The Navajo Verb Leonard M. Faltz, 1998 For the first time students and scholars interested in the Navajo language have a book that presents the verb system in a step by step and thorough fashion By providing easy to follow descriptions with abundant examples this book unravels the complexity of Navajo and reveals its expressiveness *The Languages and Linguistics of Indigenous North America* Carmen Dagostino, Marianne Mithun, Keren Rice, 2023-12-18 This handbook provides broad coverage of the languages indigenous to North America with special focus on typologically interesting features and areal characteristics surveys of current work and topics of particular importance to communities The volume is divided into two major parts subfields of linguistics and family sketches The subfields include those that are customarily addressed in discussions of North American languages sounds and sound structure words sentences as well as many that have received somewhat less attention until recently tone prosody sociolinguistic variation directives information structure discourse meaning language over space and time conversation structure evidentiality pragmatics verbal art first and second language acquisition archives evolving notions of fieldwork Family sketches cover major language families and isolates and highlight topics of special value to communities engaged in work on language maintenance documentation and revitalization *The Oxford Handbook of Derivational Morphology* Rochelle Lieber, Pavol Stekauer, 2014-09-25 The Oxford Handbook of Derivational Morphology is intended as a companion volume to The Oxford Handbook of Compounding OUP 2009 Written by distinguished scholars its 41 chapters aim to provide a comprehensive and thorough overview of the study of derivational morphology The handbook begins with an overview and a consideration of definitional matters distinguishing derivation from inflection on the one hand and compounding on the other From a formal perspective the handbook treats affixation prefixation suffixation infixation circumfixation etc conversion reduplication root and pattern and other templatic processes as well as prosodic and subtractive means of forming new words From a semantic perspective it looks at the processes that form various types of adjectives adverbs nouns and verbs as well as evaluatives and the rarer processes that form function words The book also surveys derivation in fifteen language families that are widely dispersed in terms of both geographical location and typological characteristics **Native American Language Ideologies** Paul V. Kroskrity, Margaret C. Field, 2009-04-15 Beliefs and feelings about language vary dramatically within and across Native American cultural groups and are an acknowledged part of the processes of language shift and language death This volume samples the language

ideologies of a wide range of Native American communities from the Canadian Yukon to Guatemala to show their role in sociocultural transformation. These studies take up such active issues as insiderness in Cherokee language ideologies, contradictions of space time for the Northern Arapaho language socialization and Paiute identity and orthography choices and language renewal among the Kiowa. The authors, including members of indigenous speech communities who participate in language renewal efforts, discuss not only Native Americans' conscious language ideologies but also the often revealing relationship between these beliefs and other more implicit realizations of language use as embedded in community practice. The chapters discuss the impact of contemporary language issues related to grammar, language use, the relation between language and social identity, and emergent language ideologies themselves in Native American speech communities. And although they portray obvious variation in attitudes toward language across communities, they also reveal commonalities, notably the emergent ideological process of iconization between a language and various national, ethnic, and tribal identities. As fewer Native Americans continue to speak their own language, this timely volume provides valuable, grounded studies of language ideologies in action, those indigenous to Native communities as well as those imposed by outside institutions or language researchers. It considers the emergent interaction of indigenous and imported ideologies and the resulting effect on language beliefs, practices, and struggles in today's Indian Country as it demonstrates the practical implications of recognizing a multiplicity of indigenous language ideologies and their impact on heritage language maintenance and renewal.

Typology of Pluractional Constructions in the Languages of the World Simone Mattioli, 2019-04-24. The aim of this book is to give the first large scale typological investigation of pluractionality in the languages of the world. Pluractionality is defined as the morphological modification of the verb to express a plurality of situations that can additionally involve a plurality of participants and/or spaces. Based on a 246 language sample, the main characteristics of pluractionality are described and discussed throughout the book. Firstly, a description of the functions that pluractional markers cross linguistically express is presented, and the relationships occurring among them are explained through the semantic map model. Then, the marking strategies that languages display to express such functions are illustrated, and some issues concerning the formal identification are briefly discussed as well. The typological generalizations are corroborated, showing how pluractional markers work in three specific languages: Akawaio, Beja, and Maa. In conclusion, the theoretical conceptualization of pluractionality is discussed, referring to the Radical Construction Grammar approach.
