Naval Aristocracy Of Hellenistic Rhodes:

The Naval Aristocracy of Hellenistic Rhodes Vincent Gabrielsen, 1997 This study posits that the distinction of Hellenistic Rhodes exemplified by economic prosperity internal stability military might and high political esteem among foreign powers can be directly linked to the naval aristocracy The book contends that a constantly publicised pride in naval experience was paramount to the self perception of the upper class It was the basis of their role in the military political and commercial infrastructure By analysing the role of the wealthy who personally owned the ships used both for warfare and commerce their financial responsibility for personnel and the ramifications of this power Gabrielsen explains the organisation of the society as a whole By providing economic security the aristocracy promoted domestic peace that in turn allowed for expansion overseas thereby re securing their own power and labour forces The navy safeguarded mercantile routes

Byzantium and the Bosphorus Thomas James Russell, 2017 In 330 AD the Emperor Constantine consecrated the new capital of the eastern Roman Empire on the site of the ancient city of Byzantium Its later history is well known yet comparatively little is known about the city before it became Constantinople and then Istanbul Although it was just a minor Greek polis located on the northern fringes of Hellenic culture surrounded by hostile Thracian tribes and denigrated by one ancient wit as the armpit of Greece Byzantium did nevertheless possess one unique advantage control of the Bosphorus strait This highly strategic waterway links the Aegean to the Black Sea thereby conferring on the city the ability to tax maritime traffic passing between the two Byzantium and the Bosphorus is a historical study of the city of Byzantium and its society epigraphy culture and economy which seeks to establish the significance of its geographical circumstances and in particular its relationship with the Bosphorus strait Examining the history of the region through this lens reveals how over almost a

millennium it came to shape many aspects of the lives of its inhabitants illuminating not only the nature of economic exploitation and the attitudes of ancient imperialism but also local industries and resources and the genesis of communities local identities Drawing extensively on Dionysius of Byzantium's Anaplos Bosprou an ancient account of the journey up the Bosporus and on local inscriptions what emerges is a meditation on regional particularism which reveals the pervasive influence that the waterway had on the city of Byzantium and its local communities and illustrates how the history of this region cannot be understood in isolation from its geographical context This volume will be of interest to all those interested in classical history more broadly and to Byzantinists seeking to explore the history of the city before it became Constantinople
