Naval Warfare In The Eastern Mediterranean 1940 1945:

Naval Warfare in the Eastern Mediterranean Charles Koburger, 1993-03-30 The purpose of this book is two fold First it presents in a single place a coherent account of the tumultuous naval events that took place in the Eastern Mediterranean between 1940 and 1945 during World War II Second the book aims to demonstrate in an interesting fashion what naval warfare in the narrow seas is really like Koburger demonstrates that there was a definite Allied strategy in the Eastern Mediterranean during World War II He delineates that strategy showing its two halves and demonstrates the roles of Yugoslavia Greece and Turkey Koburger contends that the Eastern Mediterranean offers an excellent example of what warfare in the narrow seas is about He remains convinced that in the 1990s the narrow seas are where the wars are going to be This book will be of interest to policymakers the military and military historians

H. Thompson, 2014-08-15 The Anglo Italian campaign of 1940-41 resulted in one of the most lopsided operational victories of the entire Second World War Strategic misjudgement at the highest levels of British political and military leadership would discard the opportunities won by its fighting forces in North Africa and commit them to a catastrophic intervention in Greece In 1940 Italy fielded a numerically overwhelming but technologically deficient conscript military force on the continent of Africa Italy's political leaders expected her 500 000 strong North African army to quickly defeat the British troops stationed in the theater of operation The British forces though inferior in numbers were well trained regulars who possessed more superior weaponry than their Italian foes In the brief high intensity conflict waged in the North African deserts from December 1940 to February 1941 the British would annihilate an Italian army of 130 000 soldiers On the verge of complete victory in the North African theater the British would commit an act of extraordinary strategic misjudgement and divert their efforts to Greece in order to engage the Axis forces on the continent of Europe The discarded early victory in North Africa would lead Britain to catastrophe in Greece cost them the initiative in the war and nearly led to their defeat in North Africa

Sea Power in the Twenty-First Century Charles Koburger, 1997-09-16 As the U S Navy enters the twenty first century many of the ships aircraft weapons and tactics it employed so successfully during the Cold War will no longer be cost effective or even effective Future battlefields will shift the locus of naval action from the high seas into littoral waters demanding sustained operations in relatively narrow shallow waters Naval forces in the twenty first century must not only meet the traditional requirements of command of the sea ships planes troops and bases carrying out forward presence crisis response strategic deterrence and sealift They must now put these together to obtain the four key operational capabilities of

littoral warfare command control intelligence and surveillance and communication battlespace dominance power projection and force sustainment The core of the new U S strategic concept is power projection and it envisions naval forces directly leading Army and Air Force elements to influence events ashore most probably in the Third World And this navy must be cost effective

The Cinderella Front: Allied Special Air Operations In Yugoslavia During World War II Major Paul J. Freeman, 2014-08-15 This research paper examines how special operations were conducted in Yugoslavia during WWII how did the operational art conducted fit into Allied grand strategy and how effective were these operations These operations were conducted using multinational coalition forces and for this reason the lessons from this examination are relevant to warriors today Conducting military operations almost always involve a scarcity of forces This scarcity forces difficult decisions in development of strategic goals and conduct of operations This difficulty is further compounded when coalition forces involve multiple nations each with their own priorities This is the situation that existed in WWII The US wanted a concentrated invasion of NW Europe while Britain and Russia were interested in a multi front battle of attrition against the Axis featuring a Balkan invasion There were inadequate forces to commit to an invasion of the Balkans but there was an opportunity to divert Axis strength from other fronts This paper will look at Allied operations in Yugoslavia typical Balkan operations and analyze 1 the unique contextual factors influencing special operations in the Balkans during WWII 2 operational art factors of this unconventional employment of airpower in the politically divided region and 3 the success and or failure of military planners and commanders in deriving military from strategic objectives and in attaining these objectives The analysis and conclusions will examine the logic and congruence of these operations to the respective strategy and will highlight contextual influences aircraft and equipment capabilities weather logistics on the success of these operations to meet the strategic objective

Germany and the Axis Powers from Coalition to Collapse R. L. DiNardo, 2005 It seemed that whenever Mussolini acted on his own it was bad news for Hitler Indeed the Fuhrer's relations with his Axis partners were fraught with an almost total lack of coordination Compared to the Allies the coalition was hardly an alliance at all Focusing on Germany's military relations with Italy Romania Hungary and Finland Richard DiNardo unearths a wealth of information that reveals how the Axis coalition largely undermined Hitler's objectives from the Eastern Front to the Balkans Mediterranean and North Africa DiNardo argues that the Axis military alliance was doomed from the beginning by a lack of common war aims the absence of a unified command structure and each nation's fundamental mistrust

of the others Germany was disinclined to make the kinds of compromises that successful wartime partnerships demanded and because Hitler insisted on separate pacts with each nation Italy and Finland often found themselves conducting counterproductive parallel wars on their own DiNardo's detailed assessments of ground naval and air operations reveal precisely why the Axis allies were so dysfunctional as a collective force sometimes for seemingly mundane but vital reasons a shortage of interpreters for example His analysis covers coalition warfare at every level demonstrating that some military services were better at working with their allies than others while also pointing to rare successes such as Rommel's effective coordination with Italian forces in North Africa In the end while some individual Axis units fought with distinction if not on a par with the vaunted Wehrmacht and helped Germany achieve some of its military aims the coalition's overall military performance was riddled with disappointments Breaking new ground DiNardo's work enlarges our understanding of Germany's defeat while at the same time offering a timely reminder of the challenges presented by coalition warfare

The Mediterranean Air War Robert S. Ehlers, Jr., 2015-03-27 Without what the Allies learned in the Mediterranean air war in 1942 1944 the Normandy landings and so perhaps the Second World War II would have ended differently This is one of many lessons of The Mediterranean Air War the first one volume history of the vital role of airpower during the three year struggle for control of the Mediterranean Basin in World War II and of its significance for the Allied successes in the war's last two years Airpower historian Robert S Ehlers opens his account with an assessment of the pre war Mediterranean theater highlighting the ways in which the players strategic choices strengths and shortcomings set the stage for and ultimately shaped the air campaigns over the Middle Sea Beginning with the Italian invasion of Abyssinia Ehlers reprises the developing international crisis initially between Britain and Italy and finally encompassing France Germany the US other members of the British Commonwealth and the Balkan countries He then explores the Mediterranean air war in detail with close attention to turning points joint and combined operations and the campaign's contribution to the larger Allied effort In particular his analysis shows how and why the success of Allied airpower in the Mediterranean laid the groundwork for combined arms victories in the Middle East the Indian Ocean area North Africa and the Atlantic northwest Europe Of grand strategic importance from the days of Ancient Rome to the Great Power rivalries of the eighteenth and nineteenth centuries the Middle Sea was no less crucial to the Allied forces and their foes Here in the successful offensives in North Africa in 1942 and 1943 the US and the British learned to conduct a coalition air and combined arms war Here in Sicily and Italy in 1943 and 1944 the Allies mastered the logistics of providing air support for huge naval landings and opened a vital second aerial front against the Third Reich bombing critical oil and transportation targets with great effectiveness The first full examination of the Mediterranean theater in these critical roles as a strategic and tactical testing ground for the Allies and as a vital theater of operations in its own right The Mediterranean Air War fills in a long missing but vital dimension of the history of World War II

The Southern Flank of NATO, 1951-1959 Dionysios Chourchoulis, 2014-12-18 In 1951 52 the North Atlantic Treaty Organization established the Southern Flank a strategy for the defense of the eastern Mediterranean in the Cold War involving Italy Greece and Turkey Among its many aims the Southern Flank sought to mobilize these countries as allies and integrate them into the Western defense system Throughout the 1950s the alliance developed the Southern Flank and in 1959 it was finally stabilized as fractious Greek Turkish relations were improved by the temporary settlement over Cyprus The Southern Flank of NATO 1951 1959 Military Strategy or Political Stabilization examines among other things the initial negotiations of 1951 52 the Southern Flank s structure and function and relative value in NATO s overall policy and the alliance s response to the challenges in the eastern Mediterranean in the early Cold War It explores not only the military aspects of the Southern Flank but also the more controversial political aspects the admission of Greece and Turkey to NATO the short lived military cooperation between these states and Yugoslavia during 1953 55 and the effects of the deterioration in Greek Turkish relations from 1955 due to Cyprus It also focuses on the part played by other major members of the alliance principally the United States and Britain in Southern Flank politics and strategy Thus it considers how the United States and the U K viewed the power balance between the three Southern Flank members and how the Americans sought to influence affairs through financial military and technical assistance including the construction of U S bases in Italy Greece and Turkey The book also assesses the threat posed to the Southern Flank at various points by rising tensions in the Middle East More generally the book illuminates the complexities of intra alliance dynamics in a region full of Cold War tensions However in its Middle Eastern Eastern Mediterranean neighborhood it was not only the Cold War that provided tensions since the Arab

Israeli dispute and the tensions of decolonization further complicated the picture Thus the study of the Southern Flank is a test case of a Cold War theater which was subjected to additional historical pressures creating a nexus of problems which the Western Alliance needed to address within its effort to respond to the various challenges of the Cold War *World War II in Europe* David T.
