Naval Arms Control:

Peace and Disarmament Richard W. Fanning, Relations between China and Russia have evolved dramatically since their first diplomatic contact particularly during the twentieth century During the past decade China and Russia have made efforts to strengthen bilateral ties and improve cooperation on a number of diplomatic fronts The People s Republic of China and the Russian Federation maintain exceptionally close and friendly relations strong geopolitical and regional cooperation and significant levels of trade In The Future of China Russia Relations scholars from around the world explore the current state of the relationship between the two powers and assess the prospects for future cooperation and possible tensions in the new century The contributors examine Russian and Chinese perspectives on a wide range of issues including security political relationships economic interactions and defense ties This collection explores the energy courtship between the two nations and analyzes their interests and policies regarding Central Asia the Korean Peninsula and Taiwan

Naval Arms Control Sverre Lodgaard, 1990-11 Naval Arms Control examines the context for naval arms control in the ongoing restructuring of East West relations Current changes in naval force postures are reviewed and a special analysis is made of military developments in Northern waters Aims approaches and procedures of naval arms control are presented and discussed making clear the choice between negotiated arms control and unilateral changes of naval strategy The book also presents specific proposals making the arguments for and against clear and discussing them in relation to naval forces in general and to nuclear weapons at sea

Security at Sea Stockholm International Peace Research Institute, 1990 Since the Second World War five navies are known to have acquired nuclear weapons and naval forces and activities around the world have become increasingly important and dangerous However there has been no serious consideration of naval arms control for more than forty years SIPRI gathered together a group of experts from eight nations to consider the problems of naval forces and the possibilities for arms control This book is a product of that conference and it presents for the first time a broad and detailed assessment of the dangers of the naval arms race problems with arms control possible approaches confidence building measures and verification technologies

Superpowers at Sea Richard W. Fieldhouse, Shunji Taoka, 1989 The arms race at sea is a dangerous nuclear race which is causing growing international concern and must be brought under control What are the hard facts about the situation This book documents the realities of the competition especially the nuclearization of naval forces and dispels some of the myths surrounding the naval arms race This incisive analysis of naval forces of the East and West concludes that contrary to common perceptions the US and its allies have a considerable military advantage over the Soviet Navy a trend which is expected to continue for the foreseeable future The authors describe in detail the widespread nuclearization of naval forces of all five nuclear navies analyse the implications for security and arms control and conclude with suggestions for possible arms control measures

Naval Arms Control - Can the United States Continue to Just Say No? , 1990 We live in a world of change unmatched since

World War II Yesterday's impossible obstacle is today's accomplishment Communist governments are dropping like fall leaves with communism as we know it in desperate trouble even in the Soviet Union We are very close to reaching agreement on major strategic arms reduction and European conventional force treaties and are already witnessing the withdrawal of Soviet troops from Hungary and Czechoslovakia Amidst the obvious lessening of tensions and reductions in forces the Soviet Union presses for discussions on naval arms control At every turn the United States replies No The question is clear Is this stance which flies in the face of obvious trends justifiable and in the United States best interest Naval arms control like beauty is in the eye of the beholder The United States Navy intends to maintain its preeminence Shipbuilders fear reduction or elimination of business Ecologists see an opportunity to eliminate nuclear weapons at sea For budgeteers there is a chance to increase the peace dividend while diplomats hope to reduce world tensions and the chance of war Although the views of each group requires consideration our decision on naval arms control a little a lot or none should be based on the strategic interests of the United States Just what is this sea power that we're considering limiting Sea power is simply a measure of a country's ability to use the sea It is not about the direct military effect of fighting ships which is the realm of tactics it is about the use of maritime lines of communication for the effective interconnection organization and purposeful application of the economic and war making potential of many lands

Naval Arms Control William A. Pokorny, 1991 Naval arms control is one of the most highly controversial issues facing the United States government today The U S firmly supports arms control measures in all areas except those related to the high seas In this area alone the government and particularly the United States Navy has been unwilling to even address the issue This position is becoming so controversial that even members of the sister services of the United States armed forces find themselves wondering why the Navy continually escapes the arms control hatchet when the other services are not so fortunate This study begins by examining several arguments in support of naval arms control followed by the counter arguments A conclusion is then reached as to whether this issue is truly in the best interest of the United States The second half of the study closely examines several different individual naval arms control proposals and concludes with some new ideas on the subject These ideas not only represent a new proposal but more importantly are designed to demonstrate the level of strategic vision that the Navy must begin dedicating to this subject in order to avoid becoming a big loser in the long run

Europe and Naval Arms Control in the Gorbachev Era Andreas Fürst, Volker Heise, Steven E. Miller, 1992 For most of the Cold War naval arms control was the forgotten dimension of arms control Beginning in the late 1980s however it has become increasingly prominent in the East West dialogue But it is usually studied from the perspective of Soviet American relations This book examines the subject from a European perspective What role might naval arms control play in the European context What impact might naval arms control have on the interests and perceptions of European states What opportunities for and

obstacles to naval arms control exist in Europe The authors address these questions describing the naval interests and attitudes towards naval arms control of European coastal states as well as the Soviet Union and the United States in the Norwegian Baltic and Mediterranean seas **Naval Arms Control** William A. Naval Arms Control Robert L. Click,1992 Arms control initiatives have played an important role in American politics dating back to 1817 Naval arms control agreements made during the period between World War I and World War II may have indirectly led to the United States being outflanked in naval power by what would become its adversaries Germany and Japan These bloody lessons have not easily been forgotten Yet since the mid 1980s the Soviet Union has intensified political pressure to incorporate naval arms limitations into overall arms control negotiations This study explores the ongoing negotiations and the implications of future agreements given the unstable international security environment and the establishment of the Commonwealth of Independent States CIS In its final analysis this paper concludes that major concessions in naval arms control during this period of uncertainty is not in the best interest of U S national interest *Naval Arms Control Conference - "INF at Sea?"* ,1989 **Approaches to Naval Arms Control** United States. Lacy,1990 Naval Arms Control Ronald O'Rourke,Library of Congress. Congressional Research Service,1989 A New Case for Naval Arms Control James John Tritten,1992 This paper opens with an examination of existing legal restraints on naval forces and arms control agreements and concludes that the U S is already heavily engaged in naval arms control Given the new international security environment and the new U S regionally oriented national security and military strategies the author then recommends a series of additional naval arms control measures that should be taken exchanges of data transparency INCSEA cooperative measures an agreement on the laws of submarine warfare abolishing NCND no first tactical nuclear use at sea NWFZs advanced notification of operational level exercises environmental

protection measures controls over maritime technologies armed escorts of nuclear shipments new Roes PALs the resolution of outstanding political issues at sea deep cuts in nuclear forces CFE follow on limits on specific types of naval forces geographic limits expanded standing naval forces and a re negotiation of the ABM Treaty The paper then addresses verification and compliance issues Author concludes that since the U S Navy has already managed to avoid major arms control while balanced on the precarious slippery slope there is no reason to continue its stonewalling policies *Arms Control* Robert A.
