American Aircraft Development Second World War Legacy William J. Norton, 2021-12-02 This volume focuses on the influence of America's Second World War aviation development and experience subsequent aviation technological advances and world events in shaping American choices in military aircraft and associated weapons development during the few years following the war. It shows how air warfare weapons from the last conflict were carried forward and altered how new systems evolved from these and how the choices fared in the next war Korea. The period was one of remarkable progress in a short span of time via a great many aircraft and weapons programs and associated technological progress. These systems were of immense importance influencing and growing the engineering production and operational capabilities to be exploited for the next generation of weapons that soon followed. Emphasized is the innovative features or new technology and how these contributed to advancing American military aviation influencing the evolution of follow-on models or types. Included are military prototype experimental and research aircraft that are equally important in understanding the history of American aircraft development. Combat employment progress and equipment adaptation during the Korean Conflict is then highlighted. Tabulated characteristics are provided of those aircraft that entered production or represented significant technological advances influencing others that follow. *Dictionary of American Naval Aviation Squadrons* Roy A. Grossnick, Naval Historical Center (U.S.), 1995

Essex-Class Aircraft Carriers 1945-91 Mark Stille, 2022-09-15 A history of the enduring Essex class ships the US Navy's finest and most numerous fleet carrier during World War II which were modernized repeatedly and served with distinction. The Essex class was the USN's war-winning ship class of the Pacific War. Of the 24 ships completed 14 saw action making the Essex class the largest class of fleet aircraft carriers ever built. These ships had a fine balance of striking power, protection and speed and were modernized during and after the war. There were five distinct programs carried out adding not only angled flight decks for jet operations but repeated upgrades to sensors, weapons and equipment. Essex class carriers were used in a number of roles and provided the vast majority of US Navy air power in the Korean War and a sizeable proportion of air power in the Vietnam conflict. However as the super carriers began to enter service in the early 1960s the Essex class was relegated to secondary roles. A single Essex carrier served until 1991 as the US Navy's training carrier. Using detailed artwork and photos this book provides an in-depth portrait of this important and enduring class of ship and looks at its development and modifications while considering the many and varied actions it took part in.

RA-5C Vigilante Units in Combat Robert R Powell, 2012-10-20 Developed from the A-5 nuclear bomber and used in a reconnaissance role the RA-5C Vigilante was the largest and fastest aeroplane ever to operate from the deck of an aircraft carrier. During the Vietnam War it sustained the highest loss ratio of any American aircraft in that conflict. This volume includes compelling accounts of combat missions over key communist targets where crews dodged Surface to Air Missiles, SAMs and anti-aircraft fire to secure all important mission photographs. Written by a Vigilante combat veteran this book is

crammed full of action packed first hand accounts *History of Acquisition in the Department of Defense, Volume 1* Elliott V. Converse, 2012-06-12 This volume is a history of the acquisition of major weapon systems by the United States armed forces from 1945 to 1960 the decade and a half that spanned the Truman and Eisenhower administrations following World War II These instruments of warfare aircraft armored vehicles artillery guided missiles naval vessels and supporting electronic systems when combined with nuclear warheads gave the postwar American military unprecedented deterrent and striking power 1 They were also enormously expensive The volume is organized chronologically with individual chapters addressing the roles of OSD the Army Navy and Air Force in two distinct periods The first roughly coinciding with President Truman s tenure covers the years from the end of World War II through the end of the Korean War in 1953 The second spans the two terms of the Eisenhower presidency from 1953 through early 1961 The year 1953 marked a natural breakpoint between the two periods The Korean War had ended President Eisenhower and his defense team began implementing the New Look a policy and strategy based on nuclear weapons which they believed would provide security and make it possible to reduce military spending The New Look s stress on nuclear weapons along with the deployment of the first operational guided missiles and the rapid advances subsequently made in nuclear and missile technology profoundly influenced acquisition in the services throughout the 1950s and the remainder of the century As used in this study the term acquisition encompasses the activities by which the United States obtains weapons and other equipment In surveying the history of acquisition between 1945 and 1960 this study discusses or refers in passing to many of the hundreds of weapon system programs initiated by the services in that period but it is not a weapons encyclopedia Instead it investigates a few major programs in depth in the belief that such detailed examination best reveals the evolution of acquisition policies organizations and processes and the various forces influencing weapons programs *United States Naval Aviation 1910-2010: Naval Aircraft Bureau (Serial) Numbers* Mark Llewellyn Evans, Roy A. Grossnick, 2015 [U. S. Naval Aviation in Camera, 1946-1999](#) Martin W. Bowman, 1999 This book is a pictorial account of the changing role of US naval aircraft since the end of World War II from protector of the United States forces and symbol of American power throughout the world to international avenger and peacekeeper Focusing on the aircraft and the personnel who fly and service them the book features a range of different aircraft types This text contains more than 200 photos from official US Navy archives and private collections many of which are previously unpublished **Pushing the Envelope** Marion Carl, Barrett Tillman, 2014-03-15 First published in 1994 this stirring autobiography of a fighter and test pilot takes readers full throttle through Carl s imposing list of firsts Beginning with his World War II career he gained such commendations as first Marine Corps ace among the first Marines ever to fly a helicopter and first Marine to land aboard an aircraft carrier His combat duty included the momentous battles at Midway and Guadalcanal Not one to rest on his laurels however he participated in photoreconnaissance operations over Red China in 1955 and flew missions in Vietnam In peacetime he gamed fame for pushing the envelope as a test pilot adding the

world's altitude and peace records to his wartime feats and becoming the first U.S. military aviator to wear a full pressure suit. Such achievements also led to Carl's being the first living Marine admitted to the Naval Aviation Hall of Honor as well as the first Marine to be named to the Navy Carrier Aviation Test Pilots Hall of Honor. This very readable memoir is as forthright and compelling as the man it chronicles. [Building a Strategic Air Force](#) Walton S. Moody, 1996 **Naval Aviation News**, 1957 **Phantom** Francis K. The work is suitable for anyone from advanced undergraduates to experts in the field. *Strategy Bridge In To Kill Nations* Edward Kaplan traces the evolution of American strategic airpower and preparation for nuclear war from this early air atomic era to a later period 1950-1965 in which the Soviet Union's atomic capability accelerated by thermonuclear weapons and ballistic missiles made American strategic assets vulnerable and gradually undermined air atomic strategy. Kaplan throws into question both the inevitability and preferability of the strategic doctrine of MAD. He looks at the process by which cultural, institutional, and strategic ideas about MAD took shape and makes insightful use of the comparison between generals who thought they could win a nuclear war and the cold institutional logic of the suicide pact that was MAD. Kaplan also offers a reappraisal of Eisenhower's nuclear strategy and diplomacy to make a case for the marginal viability of air atomic military power even in an era of ballistic missiles.

History of Acquisition in the Department of Defense: Rearming for the Cold War, 1945-1960 Elliott Vanveltner Converse, 2012 **Rearming for the Cold War, 1945-1960** Elliott Vanveltner Converse, 2012 Book Description The first publication in a multivolume series on the history of the acquisition of major weapon systems by the Department of Defense, author Elliott Converse presents a meticulously researched overview of changes in acquisition policies, organizations, and processes within the United States military establishment during the decade and a half following World War II. Many of the changes that shaped the nature and course of weapons research and development, production, and contracting through the end of the century were instituted between 1945 and 1960; many of the problems that have repeatedly challenged defense policymakers and acquisition professionals also first surfaced during these years. This study is the first to combine the histories of the Office of the Secretary of Defense (OSD) and the military services into one account. The volume is organized chronologically with individual chapters addressing the roles of OSD, the Army, Navy, and Air Force in two distinct periods.

Attack Aircraft of the U. S. Navy and Marine Corps Bert Kinzey, 2025-01-04 *Attack aircraft of the U.S. Navy and Marine Corps* covers the history of the U.S. Navy's attack category of carrier-based aircraft from its very inception shortly after the end of World War II through the present day. It follows on the heels of three prior *Detail Scale* books that present a historical look at the U.S. Navy's carrier-based aircraft over the last 80 years: *U.S. Navy and Marine Carrier-Based Aircraft of World War*

It covered every carrier based fighter scout dive bomber and torpedo bomber design that the Navy and Marine Corps brought to at least the flying prototype stage during the war. It was followed by two books that covered Navy jet fighter aviation history: *Jet Fighters of the U S Navy and Marine Corps Part 1 the First Ten Years* and *Jet Fighters of the U S Navy and Marine Corps Part 2 Mach 1 and Beyond*, which brought the reader up to the present day covering both fighters and the multi role fighter attack aircraft flown by the two services. This fourth volume in the *Detail Scale* series looks at U S Navy and Marine Corps carrier based aircraft, focusing on the attack aircraft types that came into being as World War II came to an end as the Navy combined the roles and capabilities of the scout dive bomber and the torpedo bomber into a single aircraft type. These attack aircraft continued to provide the Navy and Marines with their carrier capable striking ability until the mid 1990s. Thirteen different aircraft are covered in this publication, and among them are some of the most iconic aircraft in military aviation history. These include the Douglas AD Skyraider, which remains one of the most versatile aircraft ever produced; the diminutive Douglas A 4 Skyhawk; the Grumman A 6 Intruder, which provided the Navy and Marines with an all weather deep strike capability from Vietnam to Desert Storm; and the LTV A 7 Corsair II. The heavy attack aircraft in the form of the Douglas A 3 Skywarrior and the North American A 5 Vigilante are covered not only in their original attack versions but also in the later variants that performed other important missions for the Navy's carrier air wings. Lesser known types like the Vought AU 1 Corsair, the Martin AM Mauler, and the North American AJ Savage are covered, as is the Douglas A2D Skyshark, which never made it into operational service. The first truly successful S VTOL aircraft, the British designed Harrier, is also among the classic aircraft included in this publication. In the 1980s, the multi role F A 18 Hornets began replacing the Navy's attack aircraft. By the mid 1990s, the A 6 Intruder and A 7 Corsair II became the last U S Navy attack aircraft to be retired. Today, the F A 18E and F A 18F Super Hornets have even replaced the fighter aircraft with the last F 14 Tomcat, having been retired in 2006. As this book is released in 2022, only one aircraft, the AV 8B Harrier II, continues to serve the Marines as the last specific designed attack aircraft remaining in service, and it is in the process of being replaced by the F 35B Lightning II. *Attack Aircraft of the U S Navy and Marine Corps* is profusely illustrated with 237 pages, 243 high resolution photographs, 174 of which are in color, and 11 full color profiles.

American Military Technology by Barton C. Hacker, Margaret Vining, 2007-11-29. The growth of American engineering and science has affected military technology organization and practice from the colonial era to the present day, even as military concerns have influenced and often funded domestic engineering programs and scientific development. *American Military Technology* traces the interplay of technology and science with the armed forces of the United States in terms of what Hacker and Vining view as epochs: 1840-1865, the introduction of modern small arms, steam power, and technology; science and medicine, 1900-1914, the naval arms race, torpedoes, and submarines; and the signal corps and the airplane, 1965-1971. McNamara's Pentagon technology in Vietnam, guided missiles, and smart bombs. The book is an excellent springboard for understanding the complex relationship

of science technology and war in American history **United States Naval Aviation, 1910-1995** Roy A. Grossnick,1997

Baltimore Death from the Heavens Kenneth P. Werrell,2009 This book is the first to take a comprehensive look at the
history of strategic bombing from its beginnings to the present Written by a historian who is also an expert on the technology
of bombing and its application the work covers the theory the hardware and the operations of strategic bombing Although his
book is dominated by aircraft it also covers air to surface and surface to air missiles This study offers a critical analysis of
strategic bombing and concludes by calling into question the value of this type of warfare Dust jacket *Proceedings of the*
