Naval Weapons Of World War Two:

Naval Weapons of World War Two N. J. M. Campbell, John Campbell, 1985 *British Naval Weapons of World War Two* Norman Friedman, 2020-07-30 John Lambert was a renowned naval draughtsman whose plans were highly valued for their accuracy and detail by modelmakers and enthusiasts By the time of his death in 2016 he had produced over 850 sheets of drawings many of which have never been published These have now been acquired by Seaforth and this is the third of a planned series of albums on selected themes reproducing complete sheets at a large page size with an expert commentary and captioning The initial volumes concentrate on British naval weaponry used in the Second World War thus completing the project John Lambert was working on when he died His interest was always focused on smaller warships and his weapons drawings tend to be of open mountings the kind that present a real challenge to modelmakers rather than enclosed turret guns but he also produced drawings of torpedo tubes underwater weapons fire control directors and even some specific armament related deck fittings Following the earlier volumes on destroyer and escort armament this one covers the multitude of weapons carried by Coastal Forces many of which were improvised ad hoc or obsolescent but eventually leading to powerful purpose designed weaponry An appendix covers the main deck guns carried by British submarines of this era The drawings are backed by introductory essays by Norman Friedman an acknowledged authority on naval ordnance while a selection of photographs adds to the value of the book as visual reference Over time the series will be expanded to make this unique technical archive available in published form a move certain to be welcomed by warship modellers enthusiasts and the many fans of John Lambert's work *Secret Weapons and World War II* Walter E. Gruenden, 2005 Gruenden's analysis of this fundamental flaw in the Japanese war effort seamlessly weaves together science technology and military history to provide an entirely unique look at a crucial but understudied aspect of World War II Comparing the science and weapons programs of all the major combatants he demonstrates that Japan's failure was nearly inevitable given its paucity of strategic resources an inadequate industrial base the absence of effective centralized management to coordinate research military hostility toward civilian scientists and bitter interservice rivalries In the end Japan could not overcome these obstacles and thus failed to make the transition to the kind of Big Science it needed to ward off its enemies and dominate the Far East

BOOK JACKET *World War Two in Europe* David T. Zabecki, 1999 First Published in 1999 Routledge is an imprint of Taylor Francis an informa company **The U.S. Navy's "Interim" LSM(R)s in World War II** Ron MacKay, Jr., 2016-05-03 The Interim LSM R or Landing Ship Medium Rocket was a revolutionary development in rocket warfare in World War II and the U S Navy's first true rocket ship An entirely new class of commissioned warship and the forerunners of today's missile firing naval combatants these ships began as improvised conversions of conventional amphibious landing craft in South Carolina's Charleston Navy Yard during late 1944 They were rushed to the Pacific Theatre to support the U S Army and Marines with heavy rocket bombardments that devastated Japanese forces on Okinawa in 1945 Their primary mission was to deliver

maximum firepower to enemy targets ashore Yet LSM R s also repulsed explosive Japanese speed boats rescued crippled warships recovered hundreds of survivors at sea and were deployed as antisubmarine hunter killers Casualties were staggering enemy gunfire blasted one while kamikaze attacks sank three crippled a fourth and grazed two more This book provides a comprehensive operational history of the Navy s 12 original Interim LSM R s Imperial Japanese Navy Heavy Cruisers 1941-45 Mark Stille,2012-05-20 Designed with little more than a passing nod to the international naval treaties of the inter war period the Imperial Japanese Navy s heavy cruisers were fast and heavily armed Like the other vessels of the Japanese Navy the heavy cruisers were technologically superior to and far more innovative than their Allied rivals whom they met in many of the major Pacific Theatre battles including Midway and Leyte Gulf Mark Stille continues his study of the IJN of WWII with this fascinating topic addressing the design and development of all 18 ships in the six heavy cruiser classes from pre war construction and mid war alterations to their operational histories and eventual fates The Royal Navy, 1930-2000 Richard Harding,2005 This book explores innovation within the Royal Navy from the financial constraints of the 1930s through to the refocusing of the Royal Navy after 1990 **The Royal Navy 1930-1990** Richard Harding,2004-11-25 This new book explores innovation within the Royal Navy from the financial constraints of the 1930s to World War Two the Cold War and the refocusing of the Royal Navy after 1990 Successful adaptation to new conditions has been critical to all navies at all times **US Navy Light Cruisers 1941-45** Mark Stille,2016-07-28 During World War II the United States built 72 light cruisers of various classes In response to the severe air threat that surface ships faced new cruisers were designed with increasingly heavy antiaircraft weaponry as well as the traditional 6in guns With the speed and range to keep up with aircraft carriers and their considerable antiaircraft capability they were a mainstay of the carrier escorts This book examines every US light cruiser produced including those of the Fargo and Worcester classes which were actually complete after World War II had ended tracing their design development and evolution throughout the war and beyond

Autocannon Anthony G Williams,2022-08-02 Autocannon is a comprehensive history of the development of automatic cannon and their ammunition from the end of the nineteenth century up to the present day A brief history of their development is followed by sections examining the basic principles of gun and ammunition design including various unconventional systems Next comes a survey of cartridges in calibre order from 20mm to 57mm including not only ammunition that has seen service but also a wide range of experimental types Finally there is a survey of the cannon grouped by nationality which again includes many experimental models The book includes data on about 200 different cartridges and 400 cannon and has nearly 500 illustrations It is the culmination of decades of research and is unmatched in its coverage of this subject *US Standard-type Battleships 1941-45 (2)* Mark Stille,2015-12-20 This book completes an authoritative two part study on the Standard type US battleships of World War II ships that were designed to fight a different type of war than the one that unfolded It gives precise technical details of the design history and features of the Tennessee Colorado and the

unfinished South Dakota and Lexington classes whilst providing an operational history of the former two Written by a leading expert on the US Navy in World War II and augmented by contemporary photographs and specially commissioned illustrations this is the other half of the story of the US Standard type battleships from the terrible damage they sustained at Pearl Harbor to their support of the war winning landings of the US Marine Corps and US Army **The Bullet , World War II US Fast Carrier Task Force Tactics 1943-45** Brian Lane Herder,2020-02-20 Drawing on difficult to access wartime documents and other contemporary sources this is the first compact illustrated study of the tactics and techniques of the US fast carriers of Task Forces 50 58 and 38 during the naval war against Japan in 1943 45 This title concentrates on exactly how these highly successful forces actually operated their composition in ships aircraft and men the essential technology at their disposal the evolving doctrine for their employment the opposition and dangers they faced and how they overcame them at the tactical level It explains in straightforward terms the intricate details of topics such as how ships manoeuvred how aircraft were deployed and recovered the formations and approaches used by fighters dive bombers and torpedo bombers against naval and land targets and how Task Forces defended themselves The text is supported by a wide range of wartime photos and full colour illustrations showing for example the formations employed by ships and aircraft with altitudes and ranges throughout the course of attacks **Cape Matapan 1941** Angus Konstam,2023-12-21 The first ever illustrated study of the largest and most significant clash between the Royal Navy and the Italian Regia Marina The Battle of Matapan witnessed the first use of decisive new technologies to bring about a stunning British victory over the Italian Navy The Allies had tapped into the Ultra coded messages sent by the Axis powers and the battle witnessed the use of radar and carrier based air strikes to bring about a critical night action The result was the most decisive engagement of the Mediterranean naval war Written by renowned naval historian Angus Konstam this book offers for the first time a unique and fully illustrated exploration of the battle It also examines why despite the emphatic and decisive Royal Navy victory the Allies failed to capitalize on the strategic advantage earned in the months that followed Battlescene artworks bring to life the cruiser clashes early on 28 March off Gavdos the Fleet Air Arm attacks on the Italian fleet and the 28 29 March night action that resulted in the destruction of Admiral Carlo Cattaneo s ships Italy s worst naval defeat The progress of the action from the initial Operation Gaudio sweep by Italy s powerful battle fleet towards Crete aimed at disrupting Allied convoys to the events of the climactic battle itself is revealed in detailed maps **The Battle of Midway** Craig L. Symonds,2013-10-03 A close up look at the battle of Midway Island analyzes this crucial naval victory which marked the turning point for the American fleet in the Pacific theater of World War II **Kongo Class Battlecruisers** Steve Wiper,2008-05-30 The ShipCraft series provides in depth information about building and modifying model kits of famous warship types Lavishly illustrated each book takes the modeller through a brief history of the subject class highlighting differences between sister ships and changes in their appearance over their careers This includes paint schemes and camouflage featuring colour

profiles and highly detailed line drawings and scale plans The modelling section reviews the strengths and weaknesses of available kits lists commercial accessory sets for super detailing of the ships and provides hints on modifying and improving the basic kit This is followed by an extensive photographic gallery of selected high quality models in a variety of scales and the book concludes with a section on research references books monographs large scale plans and relevant websites The subject of this volume is the Japanese Kongo class four ships built during the First World War as battlecruisers but extensively modified and reconstructed between the wars as fast battleships so that each ship presented a different appearance They were the chosen escorts for the elite IJN carrier forces and saw much action during the Pacific War

The British Battleship 1906-1946 Norman Friedman, 2015-09-30 The British battleship is one of the most intensely studied of all naval topics but it is also among the most popular Norman Friedman is one of the most highly regarded of all naval writers with an avid following for his work Therefore a new book on British battleships by Friedman is a major event and has been eagerly awaited ever since knowledge of the project began to circulate among enthusiasts Friedman has the ability to bring new ideas to even the most over worked subjects based on extensive original research and a talent for explaining technology in the wider context of politics economics and strategy His latest book covers the development of Royal Navy capital ships including battlecruisers from the pre history of the revolutionary Dreadnought of 1906 to the last of the line HMS Vanguard in 1946 Replete with original insights the story that emerges will enlighten and surprise even the most knowledgeable The attraction of the book is enhanced by sets of specially commissioned plans of the important classes by John Roberts and A D Baker III both renowned experts in their own right plus a colour section featuring the original Admiralty draughts including a spectacular double gatefold For many with an interest in warships this will be the book of the year

Warship 2022, 2022-05-26 A celebrated annual publication featuring the latest research on history development and service of the world's warships For 45 years Warship has been the leading annual resource on the design development and deployment of the world's combat ships Featuring a broad range of articles from a select panel of distinguished international contributors this latest volume combines original research new book reviews warship notes an image gallery and much more maintaining the impressive standards of scholarship and research with which Warship has become synonymous Detailed and accurate information is the keynote of all the articles which are fully supported by plans data tables and stunning photographs The varied topics in this year's annual includes articles on the Imperial Japanese Navy carriers Soryu and Hiryu post war radar development in the Royal Navy gunboats in the Imperial German Navy Soviet battleship designs of the early Second World War modern European frigates and the origins of the Yokosuka naval yard

The Battleship Builders Ian Johnston, Ian Buxton, 2013-05-08 How shipbuilders engine manufacturers and more united to build Britain's Grand Fleet Superbly written One of the best naval titles I have seen Marine News The launch in 1906 of HMS Dreadnought the world's first all big gun battleship rendered all existing battle fleets obsolete but at the same time it wiped out the Royal Navy's numerical advantage

so expensively maintained for decades Already locked in the same arms race with Germany Britain urgently needed to build an entirely new battle fleet of these larger more complex and costlier vessels In this she succeeded spectacularly in little over a decade fifty such ships were completed almost exactly double what Germany achieved It was only made possible by a vast industrial nexus of shipbuilders engine manufacturers armament fleets and specialist armor producers whose contribution to the Grand Fleet is too often ignored This heroic achievement and how it was done is the subject of this book It charts the rise of the large industrial conglomerates that were key to this success looks at the reaction to fast moving technical changes and analyzes the politics of funding this vast national effort both before and beyond the Great War It also attempts to assess the true cost and value of the Grand Fleet in terms of the resources consumed And finally by way of contrast it describes the effects of the postwar recession industrial contraction and the very different responses to rearmament in the run up to the Second World War Includes photographs

British Light Cruisers 1939-45 Angus Konstam, 2012-10-20 The light cruiser was a natural development of the sailing frigate a fast multi purpose warship that could patrol the sea lanes protect convoys and scout for enemy battle fleets By the inter war period the need for this type of ship was even more important given the increasing need for protection from aircraft and the need to screen the fleet from submarines or destroyers Wartime experience had shown that the British light cruiser was one of the most versatile types of ship in the Royal Navy able to protect other warships bombard enemy shores guard life saving convoys and intercept and destroy enemy warships These were truly the workhorses of the wartime Royal Navy While the battleships and carriers grabbed the headlines these sleek elegant warships quietly got on with the job of securing control of the seas
