Navigating The Terrain Of Childhood:

Navigating the Terrain of Childhood Jack Petrash, 2009 A parent's journey through his or her child's early years is inevitably filled with both precious moments and difficult situations. The unavoidable challenges test us to the limit and either consume or enlighten us as parents. If we can see these events approaching on the horizon and prepare for them in advance, the results will be beneficial for both parent and child. This book is designed to help parents map the terrain that we all travel when raising children and prepare for the mountains and valleys ahead. [You Are Your Child's First Teacher, Third Edition](#)

Rahima Baldwin Dancy, 2012-08-14 The first book in America to popularize the insights of Rudolf Steiner, founder of the Waldorf schools, regarding the developmental needs of young children, this revised and updated edition offers new ways for parents and educators to enrich the lives of children from birth to age six. Today's society often pressures us into overstimulating young children with flashcards, workbooks, videos, and electronic gadgets in a well-meaning attempt to give them a head start. But children are not little adults; they learn and grow in radically different ways at different ages, and what we do to help could actually hurt instead. Some of the most important learning years happen before your child reaches school. In *You Are Your Child's First Teacher*, respected Waldorf educator Rahima Baldwin Dancy explains the different stages of learning that children go through from birth to age six, giving you the wisdom and understanding to enrich your child's natural development in the right way at the right time. A trusted classic for over twenty years, this newly revised edition contains updated resources and additional information on discipline, early childhood programs, toilet training, using home life as curriculum, and more. From language and cognitive development to appropriate toys and nourishing your child's artistic abilities, Dancy speaks up for a rational approach to child rearing, one that helps children be children while we fulfill our important role as parents and first teachers. *Research Handbook on Child Soldiers* Mark A. Drumbl, Jastine C.

Barrett, 2019 Child soldiers remain poorly understood and inadequately protected despite significant media attention and many policy initiatives. This *Research Handbook* aims to redress this troubling gap. It offers a reflective, fresh, and nuanced review of the complex issue of child soldiering. The Handbook brings together scholars from six continents, diverse experiences, and a broad range of disciplines. Along the way, it unpacks the life cycle of youth and militarization, from recruitment to demobilization to return to civilian life. The overarching aim of the Handbook is to render the invisible visible, map the unmapped, and chart new directions. Challenging prevailing assumptions and conceptions, the *Research Handbook on Child Soldiers* focuses on adversity but also capacity, emphasising the resilience, humanity, and potentiality of children affected rather than afflicted by armed conflict. **Capturing Children's Meanings in Early Childhood Research and Practice** Ann Marie Halpenny, 2020-11-26

Capturing Children's Meanings in Early Childhood Research and Practice draws together contemporary research and established theories to produce a unique take on the meanings children express through a range of creative tools. Drawing on Reggio Emilia and the Mosaic approach, this book

provides readers with a range of strategies for accessing recording and interpreting young children's perceptions of and responses to their experiences. Providing a synthesis of the multiple imaginative ways we can capture young children's meanings through observations, art, photo elicitation, mindfulness, music, and other creative methods, Halpenny covers topics such as Negotiating challenges presented by researching with children, Frameworks for seeing and hearing children's intentions, Accurately documenting and interpreting research findings, Promoting children's meanings and their performance of them, Moving forward with new understandings. This book is an indispensable resource for students of early childhood education, especially for courses focusing on the lived experiences of children from early to middle childhood. It is also a useful reference for those working with young children in educational and caregiving settings and for those advocating for young children.

Navigating Terrains of War Henrik Vigh, 2006. Through the concept of social navigation, this book sheds light on the mobilization of urban youth in West Africa. Social navigation offers a perspective on praxis in situations of conflict and turmoil. It provides insights into the interplay between objective structures and subjective agency, thus enabling us to make sense of the opportunistic, sometimes fatalistic, and tactical ways in which young people struggle to expand the horizons of possibility in a world of conflict, turmoil, and diminishing resources.

Portrayals of Children in Popular Culture Vibiana Bowman Cvetkovic, Debbie C. Olson, 2012-12-21. Portrayals of Children in Popular Culture: Fleeting Images, edited by Vibiana Bowman Cvetkovic and Debbie Olson, is a collection which examines images of children and childhood in popular culture, including print, online, television shows, and films. The contributors to this volume explore the constructions of children and childhood rather than actual children or actual childhoods. In the chapters that are concerned with depictions of actual individual children, the authors investigate how the images of those children conform or trouble current notions of what it means to be a child engaged in a contemporary childhood. This is a unique volume because of the academic discourse which is employed, that of Childhood Studies. The Childhood Studies scholars represented in this collection utilize an interdisciplinary approach which draws upon various academic fields, their methodologies, theoretical approaches, and scholarly conventions for the scholarly research in this collection. Together, the contributions to this collection interrogate classic notions of childhood, innocence, knowledge, agency, and the fluid position of the signifier child within contemporary media forms. These interdisciplinary works function as a testament to the infectiousness of the child image in print, television, and cinematic contexts and represent a new avenue of discursive scholarship. The questions raised and connections made provide fresh insights and unique perspectives to topics regarding children and childhood and their representation within multiple media platforms. The growing field of Childhood Studies is enriched by the intellectual originality represented by this volume's authors, who ask new questions about the enduring and captivating image of the child.

Pugh,2009-02-02 Even as they see their wages go down and their buying power decrease many parents are still putting their kids material desires first These parents struggle with how to handle children s consumer wants which continue unabated despite the economic downturn And indeed parents and other adults continue to spend billions of dollars on children every year Why do children seem to desire so much so often so soon and why do parents capitulate so readily To determine what forces lie behind the onslaught of Nintendo Wiis and Bratz dolls Allison J Pugh spent three years observing and interviewing children and their families In *Longing and Belonging* Parents Children and Consumer Culture Pugh teases out the complex factors that contribute to how we buy from lunchroom conversations about Game Boys to the stark inequalities facing American children Pugh finds that children s desires stem less from striving for status or falling victim to advertising than from their yearning to join the conversation at school or in the neighborhood Most parents respond to children s need to belong by buying the particular goods and experiences that act as passports in children s social worlds because they sympathize with their children s fear of being different from their peers Even under financial constraints families prioritize children feeling normal Pugh masterfully illuminates the surprising similarities in the fears and hopes of parents and children

from vastly different social contexts showing that while corporate marketing and materialism play a part in the commodification of childhood at the heart of the matter is the desire to belong
