Reddy,1995-12-12 Since ocular therapeutics and drug delivery is a subject of interest to specialists from various disciplines such as chemical biochemical medical pharmaceutical and toxicological it truly presents a unique situation requiring a multi disciplinary approach in understanding and addressing various problems Yet we see that scientists associated with these areas are working by and large independently of one another thus limiting dissemination of knowledge experience and ideas that would greatly enhance the overall progress in this area of research Regrettably the information currently available in ocular therapeutics and drug delivery though extensive is still fragmented into various disciplines making meaningful synthesis difficult Several books are available that cover one or two aspects of the multi disciplinary fields on an individual basis however none is available that covers all of them The chapters contained in this book are specific to various interrelated areas of ocular therapeutics and drug delivery and are written by acknowledged experts from both academia and industry The book itself is divided into five parts namely I overview basic principles and methodology II pathopharmacology and clinical applications III chemical biochemical approaches to ocular drug delivery IV formulation and drug delivery considerations and V industrial and regulatory considerations Individual chapters in each section apart from presenting a concise text entail an extensive listing of references      [Clinical Ocular Toxicology E-Book](#) Frederick T.
