OECD Economic Surveys: Norway 2019 OECD,2019-12-09 Wellbeing in Norway is high GDP per

capita is among the top ranking countries and the country scores well in measures of inclusiveness Several challenges must be addressed however if this good standing is to be sustained The economy is vulnerable to trade risks Also though property markets and related credit appear to be heading for a soft landing risks remain Norway has substantial opportunities for more effective public spending remain and exploiting these will become more important as fiscal space narrows Productivity growth remains low requiring attention to business policy

OECD Economic Surveys: Norway 2024 OECD,2024-06-20

Norway s economy is slowing as inflation and higher interest rates weigh on consumption and investment The labour market is tight and wage growth robust while labour shortages and job mismatches are high and rising Inflation is falling but still way above the target of 2% The fiscal stance is expansionary It should become contractionary to support monetary policy While Norway is one of the OECD s most productive countries productivity growth over the past decade has been weak Making skills more relevant notably by strengthening vocational education and training could help raise productivity and ease tight labour markets Higher and broader taxation of greenhouse gas emissions and investing in lower cost emission cuts would help achieve emission reductions more efficiently Public spending as a share of GDP is the highest in the OECD which brings important benefits in the form of high quality public services However oil revenues are set to decline and ageing costs to rise foreshadowing strains on public finances in the future Norway could benefit from applying a medium term expenditure framework introducing a spending rule and establishing a full fledged fiscal council Reforming the very generous sickness and disability scheme could help reduce spending pressures and increase employment Regional policy should become more cost conscious Infrastructure investment is very high and imposing a minimum benefit cost ratio on individual projects and strengthening ex post evaluations could help improve its effectiveness

Development and Crisis of the Welfare State Evelyne Huber,John D. Stephens,2010-04-15

Evelyne Huber and John D Stephens offer the most systematic examination to date of the origins character effects and

prospects of generous welfare states in advanced industrial democracies in the post World War II era They demonstrate that prolonged government by different parties results in markedly different welfare states with strong differences in levels of poverty and inequality Combining quantitative studies with historical qualitative research the authors look closely at nine countries that achieved high degrees of social protection through different types of welfare regimes social democratic states Christian democratic states and wage earner states In their analysis the authors emphasize the distribution of influence between political parties and labor movements and also focus on the underestimated importance of gender as a basis for mobilization Building on their previous research Huber and Stephens show how high wages and generous welfare states are still possible in an age of globalization and trade competition
