Statistical Sources for Social Research on Western Europe 1945-1995 Franz Rothenbacher,2013-11-11 The intention of this book is to give a picture of the complex material that has been published in the field of social and economic statistics in Western Europe Although there are many guides bibliographies and reference books on special topics of this broad theme a general overview has been missing With this book I hope to fill this gap The frame of reference is a scientific one enabling and facilitating comparative social research on Western Europe In some respect this book enlarges and updates the bibliography written by Peter Flora Quantitative Historical Sociology published in Current Sociology in 1975 In principle this guide is an annotated bibliography of the most important printed material in the field of official statistics The legitimacy of such an approach lies in the fact that even today printed statistics are the most important form of dissemination of statistical results although microcomputers CD ROMs and the Internet have changed this situation In any case a special section on statistical databases is included for every country describing the main databases of the statistical offices Furthermore the Internet address of each international or national statistical institute is provided in the introductory paragraph This enables the reader to get fast access to online databases and supplementary online information on statistics via the Internet

Varieties of Capitalism Peter A. Hall,David W. Soskice,2001 What are the most fundamental differences among the political economies of the developed world How do national institutional differences condition economic performance public policy and social well being Will they survive the pressures for convergence generated by globalization and technological change These have long been central questions in comparative political economy This book provides a new and coherent set of answers to them Building on the new economics of organization the authors develop an important new theory about which differences among national political economies are most significant for economic policy and performance Drawing on a distinction between liberal and coordinated market economies they argue that there is more than one path to economic success Nations need not converge to a single Anglo American model They develop a new theory of comparative institutional advantage that transforms our understanding of international trade offers new explanations for the response of firms and nations to the challenges of globalization and provides a new theory of national interest to explain the conduct of nations in international relations The analysis brings the firm back into the centre of comparative political economy It provides new perspectives on economic and social policy making that illuminate the role of business in the development of the welfare state and the dilemmas facing those who make economic policy in the contemporary world Emphasizing the institutional complementarities that link labour relations corporate finance and national legal systems the authors bring

interdisciplinary perspectives to bear on issues of strategic management economic performance and institutional change This pathbreaking work sets new agendas in the study of comparative political economy As such it will be of value to academics and graduate students in economics business and political science as well as to many others with interests in international relations social policy making and the law

Models of Capitalism Evelyne Huber, 2002 Latin American societies have undergone fundamental changes in the past two decades moving from capitalist economies with very wide ranging state intervention to more market driven systems After a prolonged period of recession these changes produced some successes in economic growth in the 1990s but they also exacerbated many problems especially poverty and inequality Models of Capitalism examines why some societies with market economies perform much better than others in combining growth and equity and what the less successful countries can learn from the more successful ones The contributors look at different models of capitalism in Latin America Northeast and Southeast Asia and advanced industrial countries asking which patterns of economic and social policies governments in the more successful societies pursued and which configurations of institutions made pursuing such policies possible The investigation focuses on economic policies designed to stimulate growth on labor market policies designed to promote a qualified labor force and increase productivity and wages and on social policies designed to improve general human capital and to distribute life chances in an equitable way The volume is innovative in explicitly connecting the discussion of growth policies with an analysis of labor market and social policies and in going beyond comparison of Latin American with East Asian approaches to include reference to equity oriented policies in North America and Western Europe as well This approach helps demonstrate how important policy design is in determining distributive outcomes at any given level of development The contributors are Antonio Alas Renato Baumann Ha Joon Chang Carlos H Filgueira Fernando Filgueira Robert Grosse Thomas Janoski John Myles T J Pempel Wilson Peres David Brian Robertson John Sheahan John D Stephens Victor E Tokman and Bridget Welsh Sponsored by the Joint Committee on Latin American Studies of the Social Science Research Council and the American Council of Learned Societies

The New Politics of the Welfare State Paul Pierson, 2001 The welfare states of the affluent democracies now stand at the centre of political discussion and social conflict In these path breaking essays an international team of leading analysts rejects simplistic claims about the impact of economic

globalization Economic demographic and social pressures on the welfare state are very real but many of the most fundamental challenges have little to do with globalization Nor do the authors detect signs of a convergence of national social policies towards an American style lowest common denominator The contemporary politics of the welfare state takes shape against a backdrop of both intense pressures for austerity and enduring popularity Thus in most of the affluent democracies the politics of social policy centre on the renegotiation restructuring and modernization of the post war social contract rather than its dismantling The authors examine a wide range of countries and public policies arenas including health care pensions and labour markets They demonstrate how different national settings affect whether and on what terms centrist efforts to restructure the welfare state can succeed *Competitiveness, Localised Learning and Regional*

Development Heikki Eskelinen, Ingjaldur Hannibalsson, Anders Malmberg, Peter Maskell, Eirik Vatne, 2002-03-11 Drawing on a rich literature and case study material from selected industries and elaborating on key concepts such as firms and competencies industries and industrial systems and competitiveness and prosperity this book sets out to answer three broad research questions What is competition about in today s economy Why do geographical areas local milieus cities regions countries specialize in particular types of economic activity and why do patterns of specialization once in place tend to be so tremendously durable How can high cost regions in general and small industrialized countries in particular sustain competitiveness and prosperity in an increasingly globally integrated world economy This book points the way out of a dilemma created by recent industrial theory and policy is it possible for countries which are not destined to be leading high tech powers to take advantage of the current conjuncture of increasingly open markets **Economic Surveys by the**

Bermeo, 2001-08-27 This book examines the consequences and interconnections between unemployment and European unification *Research in Social Stratification and Mobility* Kevin T Leicht, 2005-06-04 Research in Social Stratification and Mobility continues its tradition of publishing the best and most innovative research on the changing landscape of social inequality the world over This issue focuses on different dimensions of social closure and their relationship to social inequality processes including the changing role that education plays in sorting people into favorable and unfavorable labor market positions across a global diversity of cultural settings This issue also examines the fluid boundaries of race and ethnicity in contentious political settings relationships between attitudes and collective action and the role that technology and political context plays in promoting economic development and well being These topics and the research methodologies

Britain and Germany in Europe, 1949-1990 Jeremy Noakes, Peter Wende, Jonathan Wright, 2002 Anglo German relations since 1945 have been generally cordial but subject to bouts of acute tension This volume by leading historians from both countries examines major political issues and broader contacts between the two societies It suggests that British perceptions have remained coloured by fears of German dominance aggravated by the success of the Federal Republic and the relative decline of Britain in the post war period

Debating Varieties of Capitalism Bob Hancké, 2009-09-03 Peter Hall and David Soskice's *Varieties of Capitalism* has become a seminal text and reference point across the social sciences generating debate and research around political economic models Here Bob Hanck presents the key readings on *Varieties of Capitalism* including the original Hall and Soskice introduction which encompass the key issues in the study of capitalism and capitalist diversity its origins and the debates that followed it Beginning with the broad theoretical arguments around the idea of *Varieties of Capitalism* the book then goes on to focus on specific empirical controversies before finally considering recent attempts at rethinking this influential framework The *Debating Varieties of Capitalism* Reader is the perfect guide to understanding this set of ideas that have changed the way we look at comparative political economy
