

f) Gradual regulation of asylum-seeker flows

After several years of uninterrupted growth, a trend reversal was observed in all member countries (see Figure I.5). The reason for this is that the main host countries have reacted to the rise in asylum applications by accelerating application review procedures and by introducing restrictive measures such as extended visa regimes or stricter appeal procedures. More recently, some countries have taken specific measures aimed at systematically deporting all rejected asylum applicants, as well as denying social benefits to applicants who fail to file an asylum application on arriving in the country (see Part I.C on migration policies). The decline observed in 2003 is also partly attributable to the easing of a number of conflicts (e.g. in the former Yugoslavia or Afghanistan) that in recent years have helped to swell flows of asylum seekers, particularly towards European OECD member countries.

The United Kingdom received the largest number of asylum applications in 2003, despite a decline of over 25% compared with the previous year. The United States ranked in second place with approximately 79 800 applications, followed by France and Germany with slightly over 50 000 applications each, a figure equivalent to that of 2002 in the case of France but down by around 27% in the case of Germany. The decline was also very marked in Denmark (-32.2%), Australia (-26.6%), Ireland (-26.2%) and the Netherlands (-24.8%). Apart from the Central European countries (e.g. the Czech Republic and Poland) and Greece, which all reported significant increases, the number of asylum applications declined more or less throughout the OECD area. A total of 502 000 asylum applications were registered in the OECD area as a whole in 2003, i.e. 80 000 fewer than in 2002 (see Box I.2).

Hard Choices, Soft Law John J. Kirton,Michael J. Trebilcock,2017-03-02 An important read for academics and policy makers alike Hard Choices Soft Law asserts that voluntary standards or soft law are an important supplement to international law in a number of areas This key work firstly outlines the approach taken to combining soft and hard law and trade environment and labour values in the WTO and NAFTA and in the prospective Millennium Round Then using the forestry sector a realm where formal international law remains largely absent the book provides a detailed examination of the role of soft law in action It demonstrates how soft and hard law can be combined to promote trade environmental and social cohesion in ways that also permit sustainable development The book presents a wealth of knowledge from a range of contributors familiar with the work of the G7 G8 the OECD the Biodiversity Convention and the Codex Alimentarius

Corporate DNA Arnold Kransdorff,2006 When the world emerges from the current recession will you be the poorer for lack of experience Having gone through your perceived necessary downsizing have you left yourself wide open for experience poor competitors to step into your experience rich shoes And if creeping uncompetitiveness is not to overtake you from where will your next round of productivity gains come Could it be that the developed world is wrecking its future for the lack of attention it is giving to preserving and applying its hard won and expensively acquired organisational memory OM Without its tried and tested experience the corporate body can't learn incrementally The result Having to re-invent the wheel risk repeating mistakes and even not learning from successes Corporate amnesia is the symptom Experiential non-learning is the problem And is not the current credit crunch a prime example Identifying some gaping holes in the way modern walkabout managers are taught to make decisions Corporate DNA outlines both the size of the problem and a solution and surprise surprise it's not rocket science or expensive *Value and Virtue in Public Administration* Michiel S. de Vries,P.

Trafficking in Women for Sexual Exploitation in the European Union Heli Askola, 2007-03-01 The phenomenon of trafficking in women for sexual exploitation which in the last decade has changed from a marginal non issue to a legitimate concern in many parts of the world has become familiar through newspaper coverage and now finally legislators and law enforcement agencies have begun to act In Europe many EU Member States now have or are developing at least some sort of anti trafficking policies with some of them in the forefront of global anti trafficking efforts Moreover the EU itself has become markedly more active with regard to curbing trafficking in human beings as part of its migration control and police and judicial co operation functions However even co ordinated efforts such as those being worked on by the EU tend to produce only short term cures to a problem that is in truth global and structural in nature and which cannot be eradicated or necessarily even significantly reduced through policing and migration control measures alone Too often there is little debate on broader measures which might be targeted to address the root causes of trafficking such as poverty under development general lack of economic and migration opportunities and above all gender inequality Against this background this book deals with present efforts to control trafficking in women for sexual exploitation In doing so it examines claims that what is needed effectively to prevent and tackle trafficking is a comprehensive approach and at the very least one that is far more wide ranging and coherent than what exists today and also analyses the assertion that destination countries and more specifically Member States of the EU could and perhaps should take more action against trafficking through regional co operation particularly in the framework of the EU rather than as individual Member States The book will be of interest to a wide range of scholars in EU law human rights comparative law sociology feminist theory and politics as well as policy makers practitioners and NGO activists in various European countries

The Impact of Globalization on the United States Michelle Bertho, Beverly Crawford, Edward A. Fogarty, 2008-09-30 Over the past decade a virtual cottage industry has arisen to produce books and articles describing the nature origins and impact of globalization Largely and surprisingly absent from this literature however has been extensive discussion of how globalization is affecting the United States itself Indeed it is rarely even acknowledged that while the United States may be providing a crucial impetus to globalization the process of globalization once set in motion has become a force unto itself Thus globalization has its own logic and demands that are having a profound impact within the United States often in ways that are unanticipated This set offers the first in depth systematic effort at assessing the United States not as a globalizing force but as a nation being transformed by globalization Among the topics studied are globalization in the form of intensified international linkages globalization as a universalizing and or Westernizing force globalization in the form of liberalized flows of trade capital and labor and globalization as a force for the creation of transnational and superterritorial entities and allegiances These volumes examine how each of these facets of globalization affects American government law business economy society and culture
