Kremer, Katharina Kronenberg**

Of Fears And Foes Security And Insecurity In An Evolving Global Political Economy:

Of Fears and Foes Jose V. Ciprut, 2001-09-30 At the end of the deadliest century known to mankind the world still finds itself mired in bloodshed In addition to formal inter state conflict we see an increase in other forms of organized violence including ethnic warfare terrorism civil conflict and internationally necessitated police actions Cornered by these powerful global forces nation states continue their quest for security Theirs is a search plagued by futility since the very meaning of the word security is being eroded by the pace and tenor of change in an evolving international environment more complex and confusing than ever The explanatory power of traditional notions of international security which has provided a cornerstone for international relations theory as a whole seems increasingly inadequate in helping to understand the makings of global security A novel approach is needed one that integrates discerning insights from the study of language history geography religion economics and technology with more traditional understandings of the workings of power on an international level and on an intranational scale *Of Fears and Foes* presents just this kind of innovative thinking by some of the most creative scholars working on these issues today Ciprut invites us to consider a fundamental reassessment of what constitutes security and insecurity in an emerging global environment Power and Security in the Information Age Myriam Dunn Cavelty, Victor Mauer, 2016-03-23 The marriage of computers and telecommunications the global integration of these technologies and their availability at low cost is bringing about a fundamental transformation in the way humans communicate and interact But however much consensus there may be on the growing importance of information technology today agreement is far more elusive when it comes to pinning down the impact of this development on security issues Written by scholars in international relations this volume focuses on the role of the state in defending against cyber threats and in securing the information age The manuscript is captivating with the significance and actuality of the issues discussed and the logical knowledgeable and engaged presentation of the issues The essays intrigue and provoke with a number of fresh hypotheses observations and suggestions and they contribute to mapping the diverse layers actors approaches and policies of the cyber security realm Power in the 21st Century Enrico Fels, Jan-Frederik Kremer, Katharina Kronenberg, 2012-04-12 The study of power is the nucleus of political science and international relations As a shift of power from traditional industrial countries to emerging powers has been perceived since the turn of the century this book aims to present innovative theoretical and empirical approaches that can increase our understanding of this transition Scholars from the fields of international relations international political economy economics and security studies not only explore current theoretical debates on power and power shifts among entities but also provide fresh insights into relevant aspects of international power in the 21st century With a particular focus on aspects of international security trade and production new methods of identifying power and its sources are presented and their potential implications and challenges are discussed

Security-Based Approach to Development Upali M. Sedere, 2005 Security Based Approach to Development SBA is a

new vision to development by addressing security and development issues simultaneously It merges the global security issues with the Rights Based and Needs Based approaches The book provides an in depth analysis of Identity and Power In today s context identity and security issues are two sides of the coin SBA has recognized the issue of personal identification as a pre requisite to empowerment Analysis attributes the deteriorating law and order rigged elections corruption socioeconomic disparity harboring of terrorists lack of transparency and poor governance to lack of personal identification systems The book stresses that unless the development investments and insecurity issues are addressed simultaneously the global development agenda will be further delayed Information Technologies and Global Politics James N. Rosenau,J. P. Singh,2012-02-01

Returning to the fundamentals of political science namely power and governance this book studies the relationship between information technologies and global politics Key issue areas are carefully examined security including information warfare and terrorism global consumption and production international telecommunications culture and identity formation human rights humanitarian assistance the environment and biotechnology Each demonstrates the validity of the view now prevalent within international relations research the shifting of power and the locus of authority away from the state Three major conclusions are offered First the nation state must now confront support or coexist with other international actors non governmental and intergovernmental organizations multinational corporations transnational social movements and individuals Second our understanding of instrumental and structural powers must be reconfigured to account for digital information technologies Finally and perhaps most importantly information technologies are now reconstituting actor identities and issues **Migration, Regional Integration and Human Security** Harald Kleinschmidt,2017-03-02 This

original and timely book is the first to analyze the interconnectedness of migration regional integration and the new security studies Exploring the conflict between the actions of transnational migrants and state government policy in a series of theoretical chapters and regional case studies the book includes theoretical chapters which look at three key facets of the nation state population territory and government discussing the ways in which migration regional integration and new security thinking challenge the accepted role and responsibilities of the state Regional case studies are also included which explore the specific challenges faced in regions including Central America Asia and the Pacific and Central and Eastern Europe As a book that asks crucial questions about the formulation of migration policies and the consequences of that success of failure it will be essential reading for students and scholars of migration in sociology politics and international relations and also for those with professional interests in the area Environmental Change and Security Project Report ,1999

Globalisation and Economic Security in East Asia Helen E. Nesadurai,2012-09-11 What is the relationship between globalization and economic security Globalisation and Economic Security in East Asia is an incisive new engagement with this important question that uses detailed conceptual exploration and fresh empirical analysis Viewing traditional neorealist conceptions of economic security as overly narrow this new study suggests that any conception of economic security in the

contemporary era needs to also pay close attention to the nature of global capitalism and the insecurities it generates for societies and individuals This uniquely open ended approach to conceptualizing economic security is supported by the East Asian experience The country case studies included here reveal that while economic security has largely been posed as one of ensuring sustainable economic growth and equitable social development particularly following the 1997 to 1998 Asian financial crisis other more realist conceptions of economic security have not become irrelevant This is also an exploration of whether and how national regional and multilateral institutions as well as non state regional mechanisms help policy makers meet the task of governing in the interests of economic security This book will be of great interest to all students and scholars of international relations international political economy of East Asia globalization and security studies

States of Global Insecurity Daniel Béland, 2007-06 Discusses the collective threats faced by the United States in the early twenty first century and how political sociology seeks to understand these matters

Simon Dalby: A Pioneer in International Relations Simon Dalby, Roger Boyd, 2025-06-11 This book profiles Simon Dalby's academic contributions in the fields of critical geopolitics environmental security and the intersection of international relations and the Anthropocene It includes reprints of key essays that highlight innovations in critical thought at the intersections between geopolitics environment and security Starting with an analysis of American reconstructions of the Soviet threat in the 1970s an early contribution to the emerging field of critical geopolitics subsequent papers focus on the emergent formulations of environmental security in the aftermath of the Cold War and the environmental costs of globalization Focusing on the implicit geographical framing in discourses of globalization offered a critique that extended the ambit of critical geopolitics to grapple with the issues of environmental security and the rising concern with climate change as well as the political identities invoked in that debate In the aftermath of 9 11 similar arguments about contextualization applied to the American global war on terror and the revival of discussions of empire and its geographies both in arguments for invading Iraq as well as the wider discussions in policy discourse and popular culture Simultaneously the emergence of earth system science and the concept of the Anthropocene offered another way to highlight the dangers of fossil fueled economic activities The necessity of fundamentally rethinking the premises of security policy in light of this recontextualization is emphasized in more recent contributions on climate security and the current ecological crisis Critical geopolitics Environmental security Global war on terror Firepower in the Anthropocene

Environmental Security Simon Dalby, 2002 Since the end of the Cold War environmental matters especially the international implications of environmental degradation have figured prominently in debates about rethinking security But do the assumptions underlying such discussions hold up under close scrutiny In this first treatment of environmental security from a truly critical perspective Simon Dalby shows how attempts to explain contemporary insecurity falter over unexamined notions of both environment and security Adding environmental history aboriginal perspectives and geopolitics to the analysis explicitly suggests that the growing disruptions caused by a carbon fueled and expanding modernity are at the

root of contemporary difficulties Environmental Security argues that rethinking security means revisiting the question of how we conceive identities as endangered and how we perceive threats to these identities The book clearly demonstrates that the conceptual basis for critical security studies requires an extended engagement with political theory and with the assumptions of the modern subject as progressive political agent Viewed thus on a global scale the environmental security discourse raises profoundly troubling political questions as to who we are and what kind of world we are collectively making in our efforts to be secure

Federalism Doomed? Andreas Heinemann-Grüder, 2002-01-01 The conceptual uncertainty when dealing with processes of integration and disintegration in Europe is striking because traditional notions of the nation state constitutionalism sovereignty and federalism do not account for emerging realities in either Western or Eastern Europe This volume explores the complex inter relationship between federal arrangements and their effects on integrating multi ethnic societies in Europe and takes stock of current debates on the effects of federalism on integration and disintegration in Eastern and Western Europe For the first time federalism is addressed in a pan European context and an attempt is made to look for remedies to overcome nationalism in both East and West within a federalist institutional framework

Against Islamophobia Arno Tausch, 2007 In this book the author presents optimistic socio liberal conclusions about Islam in the world system Countering some alarmist voices in the West neither migration nor Muslim culture are to be blamed for the contemporary crisis but the very nature of unequal capitalist accumulation and dependency that is at the core of the world capitalist system For one the analysis is based on current thinking on Kondratiev waves of world political development inherent in recent work by IIASA and the NATO Institute for Advanced Studies Analyses are also presented on the framework of the debate on cross national determinants of human well being in the world system While the author is cautiously optimistic about a socio liberal non interventionist policy alternative he has come to the conclusion that present patterns of global governance modeled around the neo liberal Washington Consensus and American hyperpower are doomed for failure A new socio liberal global consensus on global migration global order and global governance could emerge instead

Globalization and Social Inequality John Chidubem Nwaogaidu, 2013 Globalization tends to promote global homogenization of cultures but its integration processes and interaction systems are hampered by unequal participation governed by the ethos of capitalism This ethos promotes instead individual interests against societal interests As the danger of individualism increasingly constitutes a fundamental community burden it significantly compromises the nation state threatening the social formation and relational outcomes Therefore socially integrated societies with collective initiatives managed by interventionist public institutions with regulative mechanisms and good governance have more potential for equitable development and economic growth This book examines the impact of globalization and social inequality through an analysis of the impact on society in Nigeria Series Sociology Soziologie Vol 80

Continental Divides Rachel Adams, 2010-06-15 North America is more a political and an economic invention than a place people call home Nonetheless

the region shared by the United States and its closest neighbors North America is an intriguing frame for comparative American studies *Continental Divides* is the first book to study the patterns of contact exchange conflict and disavowal among cultures that span the borders of Canada the United States and Mexico Rachel Adams considers a broad range of literary filmic and visual texts that exemplify cultural traffic across North American borders She investigates how our understanding of key themes genres and periods within U S cultural study is deepened and in some cases transformed when Canada and Mexico enter the picture How for example does the work of the iconic American writer Jack Kerouac read differently when his Franco American origins and Mexican travels are taken into account Or how would our conception of American modernism be altered if Mexico were positioned as a center of artistic and political activity In this engaging analysis Adams charts the lengthy and often unrecognized traditions of neighborly exchange both hostile and amicable that have left an imprint on North America s varied cultures

Gender, Power and Knowledge for Development Lata Narayanaswamy, 2016-12-08 Knowledge for development is under theorised and under researched within development studies but as a set of policy objectives it is thriving within development practice Donors and other agencies are striving to improve the flow of information within and between decision makers and so called poor and marginalized groups in order to promote economic and social development including the empowerment of women Gender Power and Knowledge for Development questions the assumptions and practice of the knowledge for development industry Using a qualitative multi site ethnographical study of a Northern based gender information service and its beneficiaries in India the book queries the utility of the knowledge paradigm itself and the underlying assumption that a knowledge deficit exists in the Global South It questions the value of practices designed to address this presumed deficit that seek to increase information without addressing the specific problems of the knowledge systems being targeted for support After reviewing the evidence the book recommends that international organisations governments and practitioners move away from the belief that information intermediaries can employ progressive correctives to tinker at the edges and thus resolve the shortcomings of on going attempts to use knowledge alone as a driver of development Gender Power and Knowledge for Development will be of great interest to researchers students in development studies gender studies and communication studies as well as INGOs donor agencies and groups engaged in information for development i4D ICT for development ICT4D Tech4Dev knowledge mobilization and knowledge for development K4D

The Routledge Handbook of Archaeology and Globalization Tamar Hodos, 2016-11-18 This unique collection applies globalization concepts to the discipline of archaeology using a wide range of global case studies from a group of international specialists The volume spans from as early as 10 000 cal BP to the modern era analysing the relationship between material culture complex connectivities between communities and groups and cultural change Each contributor considers globalization ideas explicitly to explore the socio cultural connectivities of the past In considering social practices shared between different historic groups and also the expression of their respective

identities the papers in this volume illustrate the potential of globalization thinking to bridge the local and global in material culture analysis The Routledge Handbook of Archaeology and Globalization is the first such volume to take a world archaeology approach on a multi period basis in order to bring together the scope of evidence for the significance of material culture in the processes of globalization This work thus also provides a means to understand how material culture can be used to assess the impact of global engagement in our contemporary world As such it will appeal to archaeologists and historians as well as social science researchers interested in the origins of globalization

The Prevention and Intervention of Genocide Samuel Totten, 2008-03-31 This volume is comprised of over 2 300 annotations on a wide array of issues and topics germane to the subject of preventing the atrocities of genocide and managing these conflicts when they do arise Samuel Totten brings together in one comprehensive collection the research and findings in various fields such as political science sociology history and psychology to enable specialists in genocide studies peace studies and conflict resolution to benefit from the insights of a diverse range of scholars and foster an understanding of how the various components of genocide studies connect Among the topics included are key conventions international treaties and covenants genocide early warning signals and forecasting risk data bases sanctions peacekeeping missions conflict resolution the International Criminal Court realpolitik vis vis the issue of genocide prevention and intervention key non governmental agencies key governmental and UN bodies working on these important issues In addition to the annotations Totten frames the bibliography with a major essay that introduces the reader to the subject of prevention and intervention of genocide raising a host of critical issues regarding the strengths weaknesses and limitations of various approaches germane to issues of managing these conflicts

On Communicating Klaus Krippendorff, 2010-07-01 Klaus Krippendorff is an influential figure in communication studies widely known for his award winning book Content Analysis Over the years Krippendorff has made important contributions to the ongoing debates on fundamental issues concerning communication theory epistemology methods of research critical scholarship second order cybernetics the social construction of reality through language design and meaning On Communicating assembles Krippendorff's most significant writings many of which are virtually unavailable today appearing in less accessible publications conference proceedings out of print book chapters and articles in journals outside the communication field In their totality they provide a goldmine for communication students and scholars Edited and with an introduction by Fernando Bermejo this book provides readers with access to Krippendorff's key works

Handbook of Research on Global Indicators of Economic and Political Convergence Das, Ramesh Chandra, 2016-07-27 The development of a nation can be influenced by a wide range of factors In the modern era of globalization under developed countries must strive to catch up to developed nations and establish themselves in the global market The Handbook of Research on Global Indicators of Economic and Political Convergence is a pivotal reference source for the latest scholarly research on social political and environmental variables that affect the ability of developing countries to reach an equal standing in the global

economy Highlighting theoretical foundations critical analyses and real world perspectives this book is ideally designed for researchers analysts professionals and upper level students interested in emerging convergence and divergence trends in modern countries
