Metaphors of Depth in German Musical Thought Holly Watkins, 2011-09-01 What does it mean to say that music is deeply moving Or that music's aesthetic value derives from its deep structure This study traces the widely employed trope of musical depth to its origins in German language music criticism and analysis From the Romantic aesthetics of E T A Hoffmann to the modernist theories of Arnold Schoenberg metaphors of depth attest to the cross pollination of music with discourses ranging from theology geology and poetics to psychology philosophy and economics The book demonstrates that the persistence of depth metaphors in musicology and music theory today is an outgrowth of their essential role in articulating and transmitting Germanic cultural values While musical depth metaphors have historically served to communicate German nationalist sentiments Watkins shows that an appreciation for the broad connotations of those metaphors opens up exciting new avenues for interpretation *Proceedings of the EAA Joint Symposium on Auralization and Ambisonics 2014* Weinzierl, Stefan , Vorländer, Michael , Zotter, Franz, Maempel, Hans-Joachim , Lindau, Alexander , 2014 In consideration of the remarkable intensity of research in the field of Virtual Acoustics including different areas such as sound field analysis and synthesis spatial audio technologies and room acoustical modeling and auralization it seemed

about time to organize a second international symposium following the model of the first EAA Auralization Symposium initiated in 2009 by the acoustics group of the former Helsinki University of Technology now Aalto University Additionally research communities which are focused on different approaches to sound field synthesis such as Ambisonics or Wave Field Synthesis have in the meantime moved closer together by using increasingly consistent theoretical frameworks Finally the quality of virtual acoustic environments is often considered as a result of all processing stages mentioned above increasing the need for discussions on consistent strategies for evaluation Thus it seemed appropriate to integrate two of the most relevant communities i e to combine the 2nd International Auralization Symposium with the 5th International Symposium on Ambisonics and Spherical Acoustics The Symposia on Ambisonics initiated in 2009 by the Institute of Electronic Music and Acoustics of the University of Music and Performing Arts in Graz were traditionally dedicated to problems of spherical sound field analysis and re synthesis strategies for the exchange of ambisonics encoded audio material and more than other conferences in this area the artistic application of spatial audio systems This publication contains the official conference proceedings It includes 29 manuscripts which have passed a 3 stage peer review with a board of about 70 international reviewers involved in the process Each contribution has already been published individually with a unique DOI on the DepositOnce digital repository of TU Berlin Some conference contributions have been recommended for resubmission to Acta Acustica united with Acustica to possibly appear in a Special Issue on Virtual Acoustics in late 2014 These are not published in this collection

In the Process of Becoming Janet Schmalfeldt, 2017-02-03 With their insistence that form is a dialectical process in the music of Beethoven Theodor Adorno and Carl Dahlhaus emerge as the guardians of a long standing critical tradition in which Hegelian concepts have been brought to bear on the question of musical form Janet Schmalfeldt s ground breaking account of the development of this Beethoven Hegelian tradition restores to the term form some of its philosophical associations in the early nineteenth century when profound cultural changes were yielding new relationships between composers and their listeners and when music itself in particular instrumental music became a topic for renewed philosophical investigation Precedents for Adorno s and Dahlhaus s concept of form as process arise in the Athen um Fragments of Friedrich Schlegel and in the Encyclopaedia

Logic of Hegel The metaphor common to all these sources is the notion of becoming it is the idea of form coming into being that this study explores in respect to music by Beethoven Schubert Mendelssohn Chopin and Schumann A critical assessment of Dahlhaus's preoccupation with the opening of Beethoven's Tempest Sonata serves as the author's starting point for the translation of philosophical ideas into music analytical terms ones that encourage listening both forward and backward as Adorno has recommended Thanks to the ever growing familiarity of late eighteenth century audiences with formal conventions composers could increasingly trust that performers and listeners would be responsive to striking formal transformations The author's analytic method strives to capture the dynamic quasi narrative nature of such transformations rather than only their end results This experiential approach to the perception of form invites listeners and especially performers to participate in the interpretation of processes by which for example a brooding introduction like opening must inevitably become the essential main theme in Schubert's Sonata Op 42 or in which tremendous formal expansions in movements by Mendelssohn offer a dazzling opportunity for multiple retrospective reinterpretations Above all In the Process of Becoming proposes new ways of hearing beloved works of the romantic generation as representative of their striving for novel intensely self reflective modes of communication Musical Courier and Review of Recorded Music ,1919
