Of Marriage And The Market:

Of Marriage and the Market Kate Young, Carol Wolkowitz, Roslyn McCullagh, 1981 Monograph of essays identifying elements and mechanisms of women's continuing subordination social status and sex discrimination examines sexual division of labour woman worker issues human relations homemaker tasks unpaid work and men domination in the household and in employment within capitalist and socialist societies Bibliography pp 203 to 220 and map Marriage Markets June Carbone, Naomi Cahn, 2014-04-01 There was a time when the phrase American family conjured up a single specific image a breadwinner dad a homemaker mom and their 2 5 kids living comfortable lives in a middle class suburb Today that image has been shattered due in part to skyrocketing divorce rates single parenthood and increased out of wedlock births But whether it is conservatives bemoaning the wages of moral decline and women's liberation or progressives celebrating the result of women's greater freedom and changing sexual mores most Americans fail to identify the root factor driving the changes economic inequality that is remaking the American family along class lines In *Marriage Markets* June Carbone and Naomi Cahn examine how macroeconomic forces are transforming our most intimate and important spheres and how working class and lower income families have paid the highest price Just like health education and seemingly every other advantage in life a stable two parent home has become a luxury that only the well off can afford The best educated and most prosperous have the most stable families while working class families have seen the greatest increase in relationship instability Why is this so The book provides the answer greater economic inequality has profoundly changed marriage markets the way men and women match up when they search for a life partner It has produced a larger group of high income men than women written off the men at the bottom because of chronic unemployment incarceration and substance abuse and left a larger group of women with a smaller group of comparable men in the middle The failure to see marriage as a market affected by supply and demand has obscured any meaningful analysis of the way that societal changes influence culture Only policies that redress the balance between men and women through greater access to education stable employment and opportunities for social mobility can produce a culture that encourages commitment and investment in family life A rigorous and enlightening account of why American families have changed so much in recent decades *Marriage Markets* cuts through the ideological and moralistic rhetoric that drives our current debate It offers critically needed solutions for a problem that will haunt America for generations to come **The Modern Marriage Market** Corelli, Marie, 1899 Individual views on the institution of marriage as observed by four prominent English women The Modern Marriage Market Marie Corelli, **Of Marriage and the Market** Kate Young, Carol Wolkowitz, Roslyn McCullagh, 1984 **On The Economics Of Marriage** Shoshana Grossbard-schechtman, Shoshana Grossbard-Shechtman, 2019-07-11 Marriage is an institution that plays a central role in most societies As it affects decisions regarding labor supply consumption reproduction and other important decisions marriage receives considerable attention in academic circles Much research has been done about marriage principally by sociologists

The Oxford Handbook of Africa and Economics Célestin Monga,Justin Yifu Lin,2015-07-02 For a long time economic research on Africa was not seen as a profitable venture intellectually or professionally few researchers in top ranked institutions around the world chose to become experts in the field This was understandable the reputation of Africa centered economic research was not enhanced by the well known limitations of economic data across the continent Moreover development economics itself was not always fashionable and the broader discipline of economics has had its ups and downs and has been undergoing a major identity crisis because it failed to predict the Great Recession Times have changed many leading researchers including a few Nobel laureates have taken the subject of Africa and economics seriously enough to devote their expertise and creativity to it They have been amply rewarded the richness complexities and subtleties of African societies civilizations rationalities and ways of living have helped renew the humanities and the social sciences and economics in particular to the point that the continent has become the next major intellectual frontier to researchers from

around the world In collecting some of the most authoritative statements about the science of economics and its concepts in the African context this handbook the first of two volumes opens up the diverse acuity of commentary on exciting topics and in the process challenges and stimulates the quest for knowledge Wide ranging in its scope themes language and approaches this volume explores examines and assesses economic thinking on Africa and Africa s contribution to the discipline The editors bring a set of powerful resources to this endeavor most notably a team of internationally renowned economists whose diverse viewpoints are complemented by the perspectives of philosophers political scientists and anthropologists

Jonung, Inga Persson, 1997-10-16 Economic analysis of the family is a recent but already well established area in economics. This book bears evidence to the lively and relevant research in the area. Essays in this comprehensive collection provide a clear picture of the state of the art of economics of the family and explore theoretical and empirical applications. The contributors: *Handbook of the Economics of International Migration* Barry Chiswick, Paul W. Miller, 2014-11-05. The economic literature on international migration interests policymakers as well as academics throughout the social sciences. These volumes, the first of a new subseries in the Handbooks in Economics, describe and analyze scholarship created since the inception of serious attention began in the late 1970s. This literature appears in the general economics journals in various field journals in economics especially but not exclusively those covering labor market and human resource issues in interdisciplinary immigration journals and in papers by economists published in journals associated with history, sociology, political science, demography and linguistics among others. Covers a range of topics from labor market outcomes and fiscal consequences to the effects of international migration on the level and distribution of income and everything in between. Encompasses a wide range of topics related to migration and is multidisciplinary in some aspects which is crucial on the topic of migration. Appeals to a large community of scholars interested in this topic and for whom no overviews or summaries exist. *Rural Development And Migration* Sally E. Findley, Calvin Goldscheider, 2019-10-16. Perhaps because I grew up on a farm in Ohio I have long been interested in rural development. Although I first became a migrant at the age of 17 when I left the farm to continue my studies in a city college I was not aware of the relation between rural development and migration until many years later when I began studying patterns of urban and rural poverty. This research has grown out of my continuing investigation of the ways that migration has been seen as both a response to chronic conditions of rural poverty and a factor potentially exacerbating urban poverty conditions. If governments wanted to deal with urban poverty they would want to restrict urban immigration yet if they reduced urban immigration this would remove one of the important means available to persons seeking to raise themselves out of rural impoverishment. This would clearly be a no win situation for the rural poor. The only way to deal fairly with both urban and rural poverty would be to foster socio economic development of rural areas. Thus I became interested in studying the patterns of rural development which actually have had an effect on the migration decisions of rural families.
