Of Things Egyptian:

Of Things Egyptian Mary Jones-Gaston, 2006-02 The Mind of Egypt Jan Assmann, 2003 The Mind of Egypt presents an account of the mainsprings of Egyptian civilization the ideals values mentalities belief systems and aspirations that shaped the first territorial state in human history Drawing on a range of literary iconographic and archaeological sources Jan Assmann reconstructs a world of unparalleled complexity a culture that long before others possessed an extraordinary degree of awareness and self reflection *Eighteenth-Century Thing Theory in a Global Context* Ileana Baird, Christina Ionescu, 2016-04-29 Exploring Enlightenment attitudes toward things and their relation to human subjects this collection offers a geographically wide ranging perspective on what the eighteenth century looked like beyond British or British colonial borders To highlight trends fashions and cultural imports of truly global significance the contributors draw their case studies from Western Europe Russia Africa Latin America and Oceania This survey underscores the multifarious ways in which new theoretical approaches such as thing theory or material and visual culture studies revise our understanding of the people and objects that inhabit the phenomenological spaces of the eighteenth century Rather than focusing on a particular geographical area or on the global as a juxtaposition of regions with a distinctive cultural footprint this collection draws attention to the unforeseen relational maps drawn by things in their global peregrinations celebrating the logic of serendipity that transforms the object into some thing else when it is placed in a new locale **Wonderful Things** Jason Thompson, 2015 The discovery of ancient Egypt and the development of Egyptology are momentous events in intellectual and cultural history The history of Egyptology is the story of the people famous and obscure who constructed the picture of ancient Egypt that we have today recovered the Egyptian past while inventing it anew and made a lost civilization comprehensible to generations of enchanted readers and viewers thousands of years later U.S. Army Area Handbook for the United Arab Republic (Egypt) American University (Washington, D.C.). The Apology of the Christian Religion James Macgregor, 1891

Beyond Egyptomania Miguel John Versluys, 2020-06-08 The material and intellectual presence of Egypt is at the heart of Western culture religion and art from Antiquity to the present This volume aims to provide a long term and interdisciplinary perspective on Egypt and its mnemohistory taking theories on objects and their agency as its main point of departure The central questions the book addresses are why from the first millennium BC onwards things and concepts Egyptian are to be found in such a great variety of places throughout European history and how we can account for their enduring impact over time By taking a radically object oriented perspective on this question this book is also a major contribution to current debates on the agency of artefacts across archaeology anthropology and art history

Object Worlds in Ancient Egypt Lynn Meskell, 2021-01-07 Egypt looms large in the Western imagination Whether it is our attraction to pharaonic art the pyramids or practices of mummification Egypts unique understanding of materiality speaks to us across space and time Is it because the ancient Egyptians fetishized material objects that we find their culture captivating today And what exactly do Egyptian remains tell us about biography embodiment memory materiality and the self *Object Worlds in Ancient Egypt* takes New Kingdom Egypt 1539 1070 BC as its starting point and considers how excavated objects reveal the complex ways that ancient Egyptians experienced their material world From life to death the material world instantiated reflected and influenced social life and existence for ancient Egyptians Thus in Meskells unique approach to the materiality and sensuousness of subjects and objects we uncover the philosophical spiritual and human meanings embedded in these cultural artefacts Meskells book explores the fundamental existential questions that not only preoccupied ancient Egyptians but continue to fascinate people today What is the essence of persons and things How might we understand the situated experiences of material life the constitution of the object world and its shaping of human experience How might objects successfully mediate between worlds In the final analysis Meskell moves forward through time and examines the consumption and appreciation of these Egyptian material objects in the contemporary world Materiality is our physical engagement with the world our medium for inserting ourselves into the fabric of that world and our way of constituting and shaping culture in an embodied and external sense From that perspective it is very much the domain of anthropology and archaeology Drawing on a wide range of objects artefacts and artwork from Valley of the Kings through to Las Vegas Meskell provides an elegant analysis of the aesthetics of ancient Egyptian material culture

Materialising Roman Histories Astrid Van Oyen, Martin Pitts, 2017-09-30 The Roman period witnessed massive changes in the human material environment from monumentalised cityscapes to standardised low value artefacts like pottery This book explores new perspectives to understand this Roman object boom and its impact on

Roman history In particular the book's international contributors question the traditional dominance of representation in Roman archaeology whereby objects have come to stand for social phenomena such as status facets of group identity or notions like Romanisation and economic growth Drawing upon the recent material turn in anthropology and related disciplines the essays in this volume examine what it means to materialise Roman history focusing on the question of what objects do in history rather than what they represent In challenging the dominance of representation and exploring themes such as the impact of standardisation and the role of material agency *Materialising Roman History* is essential reading for anyone studying material culture from the Roman world and beyond

Egypt James Whidden,2017-06-26 This book is a comprehensive portrait of the British colony in Egypt which also takes a fresh look at the examples of colonial cultures memorably enshrined in Edward W Said s classic Orientalism Arguing that Said s analysis offered only the dominant discourse in imperial and colonial narratives it uses private papers letters memoirs as well as the official texts histories and government reports to reveal both dominant and muted discourses While imperial sentiment certainly set the standards and sealed the image of a ruling caste culture the investigation of colonial sentiment reveals a more diverse colony in temperament and lifestyles often intimately rooted in the Egyptian setting The method involves providing biographical treatments of a wide range of colonials and the sometimes contradictory responses to specific colonial locations historical junctures and seminal events like invasion and war or grand imperial projects including the Alexandria municipality
