Donald Lafontaine, 1998-01-01 Beautifully illustrated and clearly presented The Butterflies of Canada is an indispensable guide to all aspects of butterfly study Butterfly collecting has long been a popular summer activity and as the growing popularity of butterfly watching and conservatories in Ontario and British Columbia shows butterflies are a continuing source of delight and interest to Canadians The Butterflies of Canada is the first comprehensive guide to all the butterflies found in Canada Based on the national butterfly collection maintained by Agriculture and Agri Food Canada it contains descriptive individual accounts for the close to three hundred butterfly species recorded in Canada including descriptions of early stages subspecies and key features that help distinguish similar species Each species of butterfly has an individual distribution map generated from a database of more than 90 000 location records More than just a field guide to identifying Canadian butterflies however The Butterflies of Canada includes chapters on Canadian geography and butterfly distribution conservation gardening photography and the history of butterfly study in Canada It also contains new and unpublished information on the classification of butterflies their ranges larval food plants abundance flight seasons and noteworthy habits Thirty two colour plates provide diagnostic details for each species and also feature butterflies in their natural habitats There is an extensive bibliography

Millipedes and Moon Tigers Steve Nash, 2007 Millipedes and Moon Tigers explores those uneasy places where scientific research meets public policy making and the resulting human effect on our natural and historical landscapes Steve Nash's eye gravitates toward those specific contemporary stories whose relevance does not diminish with a turn of the calendar's page for they represent larger looming issues The destruction

wrought upon native ecosystems by invasive species such as snakehead fish the drastic and in many cases mysterious reduction in songbird populations in recent decades the blight of a century ago that wiped out four billion chestnut trees which once made up a quarter of the Eastern forest Nash does more than lament the passing of the continent as it once was He reveals the factors that have led to endangerment and extinction from environmental policies that are terribly outdated to technologies that are evolving more quickly than our attitudes and presents possible solutions in both the political and scientific arenas Nash follows an archaeobotanist on her research in the Near East to see what ancient agricultural practices in this now largely arid region can tell us about where the West may be heading He writes of Civil War battlefields that in the wake of new development are being obliterated one by one and along with them a wealth of lost archaeological opportunities Turning to a more modern battlefield he writes of agroterror the intentional introduction of plant and animal diseases into agriculture and nature and suggests what might be done to stop this new threat Focusing on the southeastern United States but addressing issues that affect the whole environment many of the essays explore the intersection of the environment and the most cutting edge technology Nash introduces us to the minnow sized Glofish America's first genetically engineered pet the animal's name is actually trademarked Further advances in our understanding of molecular genetics could even result some believe in the cloning of endangered species All of this is exciting and problematic Nash reports on the controversies over genetically modified pines and poplars science fiction trees and how fears of their escape into wild forests has prompted some environmentalists to go so far as to sabotage corporate laboratories The urgency Nash conveys is real as one of his subjects observes it is much easier to maintain an ecosystem than repair it There is no escaping a feeling of apprehension over the destructive dynamics Nash uncovers Nevertheless the essays collected here stress the opportunity that is still there for policies to be established that serve humankind by better serving nature

The Green Tiger Barbara Goldoftas, 2006 The Philippines was once famous for the beauty of its reef ringed islands white beaches and lush forests In less than a half century its forests were felled its oceans over fished and its coral reefs destroyed The rapid harvest of once abundant resources has brought droughts deadly flash floods and the collapse of vital fisheries As the rural economy weakened and millions migrated to cities they overwhelmed the urban infrastructure Today the Philippines stands as an example of the profound and sweeping consequences of ecological decline In *The Green Tiger* Barbara Goldoftas documents this tragic trajectory But hers is not a story of hopelessness and inevitable defeat In lyrical unflinching prose she traces the struggle for conservation in the Philippines from isolated villages to large cities and in the process illustrates the surprising ways in which conservation and economic growth can effectively co exist
