Of People And Things:

Writing the Lives of People and Things, AD 500-1700 Dr Gemma L. Watson, Dr Robert F.W. Smith, 2016-01-28

Historical biography has a mixed reputation at its best it can reveal much not only about an individual but the wider context of their life and society at worst it can result in a narrowly focused work of hagiography or condemnation Yet in spite of its sometimes inferior status amongst academics biography has remained a popular genre and in recent years has developed into new and intriguing areas As the essays in this volume reveal scholars from an array of different disciplines have embraced what biography can offer them expanding the remit of biography from people to things tracing the life of their chosen object from creation to use to disposal to rediscovery The increasing concern with the physicality of manuscripts and books has also meant an awareness of and interest in the lives of these forms of material culture Historians have also become increasingly interested in groups of individuals resulting in prosopographical studies A book on the diversity of biography is therefore very timely exploring the multi disciplinary application of historical biography in the period 500 1700 It presents fourteen case studies offering new approaches to historical biography written by early career researchers from backgrounds in archaeology English art architectural history and history demonstrating different approaches and techniques Overall the collection is a strong and united statement by a group of early career researchers who insist on the vitality of biography as a central concern of historians across the disciplines of the humanities Contributors believe that the life is a fundamental medium of study for the medieval and early modern periods and thus bolsters the move back towards biography as a primary tool of medieval and early modern scholars as well as a tool for future research for humanities scholars interested in biography *Analysis for Managers of People and Things* Ivon W. Ulrey, 1973 **People and Things from the Cullman,**

Alabama, Tribune 1927 - 1932 Robin Sterling, 2019-01-05 By the turn of the 20th Century Cullman was firmly established as the preeminent settlement in the hill country between the Tennessee Valley and the mineral region surrounding Birmingham The Cullman Alabama Tribune continued to record news of the development of the city county and surrounding region As with the first four books of this series microfilm was obtained from the State Archives in Montgomery and Wallace College at Hanceville and reviewed but the originals from the Cullman County Court House was the primary source A page by page examination of the film and originals was conducted with every birth death marriage obituary and some news items important to the history and development of Cullman County was recorded This book is important to any genealogist or historian with connections to Cullman County and contains many rare accounts and mentions of the earliest settlers of the region [Essays on Marx's Theory of Value](#) Isaak Ilyich Rubin, 2025-02-20 This book is an English translation of *Essays on Marx's Theory of Value* first published by Isaak Illich Rubin in 1923 in the Soviet Union Rubin's book sparked a fierce value controversy with contemporary Soviet economists during the late 1920s As such the present translation is conceived as a variorum edition including for the first time in English all the essential supplementary materials related to this foundational

work in Marx's value theory In addition to Rubin's main work this edition includes his four most important related publications as well as ten debate articles written and published by his contemporary proponents and opponents

T-Kit 6 - Training essentials
Sabine Klocker, Snežana Bačlija Knoch, Stefan Manevski, 2021-12-01 The training of youth workers is one of the main priorities of both the European Commission and the Council of Europe and of their partnership in the field of youth. Youth work is in the spotlight for both institutions and youth workers are essential for the quality of its provision. This revised T Kit aims to equip youth workers and youth trainers with the essentials of non formal education training. It is a practical tool for them to develop training competences and learn more about educational theory, concepts, tools, practices, resources as well as hands on tips as this handbook is written by trainers for trainers and youth workers in the European youth field. Whereas other T Kits focus on one specific area of youth work training, this one emerges from the broader European youth work context and enables trainers and youth workers to reflect on their daily practice as this publication follows the logic of an entire training cycle from beginning to end of any youth training programme with an international dimension. The European youth training field has undergone massive changes since this T Kit was first published in 2002. Especially when it comes to digitalisation, the focus on trainer competences and competence development, training standards and quality criteria for training, recognition of non formal education, accessibility and diverse ability dimensions. Topics such as access, gender, environment and sustainability or the focus on learning environments, emotional management and well being of the trainer have greatly changed non formal education settings. This T Kit offers information, links and resources on how to work with young people in non formal education training settings today and make a difference in their personal lives as well as their peer groups and communities beyond.

The Internet of Things for Smart Urban Ecosystems
Franco Cicirelli, Antonio Guerrieri, Carlo Mastroianni, Giandomenico Spezzano, Andrea Vinci, 2018-08-10 The main objective of this book is to provide a multidisciplinary overview of methodological approaches, architectures, platforms and algorithms for the realization of an Internet of Things (IoT) based Smart Urban Ecosystem (SUE). Moreover, the book details a set of real world applications and case studies related to specific smart infrastructures and smart cities including structural health monitoring, smart urban drainage networks, smart grids, power efficiency, healthcare, city security and emergency management. A Smart Urban Ecosystem (SUE) is a people centric system of systems that involves smart city environments, applications and infrastructures. SUEs require the close integration of cyber and physical components for monitoring, understanding and controlling the urban environment. In this context, the Internet of Things (IoT) offers a valuable enabling technology as it bridges the gap between physical things and software components and empowers cooperation between distributed, pervasive and heterogeneous entities.
