Architecture and Urbanism in Modern Korea Inha Jung,2013-07-31 Although modernization in Korea started more than a century later than in the West it has worked as a prominent ideology throughout the past century in particular it has brought radical changes in Korean architecture and cities Traditional structures and ways of life have been thoroughly uprooted in modernity s continuous negation of the past This book presents a comprehensive overview of architectural development and urbanization in Korea within the broad framework of modernization Twentieth century Korean architecture and cities form three distinctive periods The first defined as colonial modern occurred between the early twentieth century and 1945 when Western civilization was transplanted to Korea via Japan and a modern way of life albeit distorted began taking shape The second is the so called developmental dictatorship period Between 1961 and 1988 the explosive growth of urban populations resulted in large scale construction booms and architects delved into modern identity through the locality of traditional architecture The last period began in the mid 1990s and may be defined as one of modernization settlement and a transition to globalization With city populations leveling out urbanization and architecture came to be viewed from new perspectives Inha Jung however contends that what is more significant is the identification of elements that have remained unchanged Jung identifies continuities that have been formed by long standing relationships between humans and their built environment and despite rapid modernization are still deeply rooted in the Korean way of life For this reason in the twentieth century regionalism exerted a great influence on Korean architects Various architectural and urban principles that Koreans

developed over a long period while adapting to the natural environment have provided important foundations for architects works By exploring these sources this carefully researched and amply illustrated book makes an original contribution to defining modern identity in Korea s architecture housing and urbanism **Structures and Architecture** Paulo J. da Sousa Cruz,2016-10-14 Although the disciplines of architecture and structural engineering have both experienced their own historical development their interaction has resulted in many fascinating and delightful structures To take this interaction to a higher level there is a need to stimulate the inventive and creative design of architectural structures and to persuade architects and structural engineers to further collaborate in this process exploiting together new concepts applications and challenges This set of book of abstracts and full paper searchable CD ROM presents selected papers presented at the 3rd International Conference on Structures and Architecture Conference ICSA2016 organized by the School of Architecture of the University of Minho Guimar es Portugal July 2016 to promote the synergy in the collaboration between the disciplines of architecture and structural engineering The set addresses all major aspects of structures and architecture including building envelopes comprehension of complex forms computer and experimental methods concrete and masonry structures educating architects and structural engineers emerging technologies glass structures innovative architectural and structural design lightweight and membrane structures special structures steel and composite structures the borderline between architecture and structural engineering the history of the relationship between architects and structural engineers the tectonics of architectural solutions the use of new materials timber structures and more The contributions on creative and scientific aspects of the conception and construction of structures on advanced technologies and on complex architectural and structural applications represent a fine blend of scientific technical and practical novelties in both fields This set is intended for both researchers and practitioners including architects structural and construction engineers builders and building consultants constructors material suppliers and product manufacturers and other experts and professionals involved in the design and realization of architectural structural and infrastructural projects **Encyclopedia of Twentieth Century Architecture** R. Stephen Sennott,2004 For more information including the introduction a full list of entries and contributors a generous selection of sample pages and more visit the Encyclope dia of 20th Century Architecture website Focusing on architecture from all regions of the world this three volume set profiles the twentieth century s vast chronicle of architectural achievements both within and well beyond the theoretical confines of modernism Unlike existing works this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types movements styles and building practices across traditional geographic and cultural boundaries *The Architectural Forum* ,1920
