Safe As Houses Housing Inheritance In Britain:

Generational Interdependencies: The Social Implications for Welfare Beverley Searle, 2018-01-15 The issue of generational transfers is growing in importance Populations are ageing placing an increasing burden on provision of pensions health care and other welfare services In many nations the imbalance between a growing older generation supported by a shrinking younger generation has fuelled debates about intergenerational justice The key argument being that political and institutional developments over the last century have been to the advantage of older generations at the expense of current younger and future generations But this only addresses half of the story neglecting the flows of resources through private family channels One key response to the growing fiscal problem of ageing societies has been to focus responsibility on self funding and familial support The growth of asset values particularly housing which are concentrated among the elderly underpin such strategies But this exposes new risks as potentially extractable resources are determined by wider fluctuations in the economy and housing markets in particular Clearly these cohort effects and responses to them play out differently in different national developmental settings depending on long run patterns of economic social and demographic change This collection address these issues and provides original insights across different international contexts The collection focusses on financial and non financial transfers generational interdependencies and the role of labour and housing markets in welfare support set against the changing economic landscape following the Great Financial Crisis of 2007 Although institutional and national differences exist the key emerging issues are the same the financial and welfare challenges of supporting aging in societies inequalities in the availability of assets across individuals families and nations and the extent to which private asset accumulation can support families over the life course Drawing from examples across European countries this collection will nonetheless be relevant to researchers and policy makers in other nations addressing the complexities of providing welfare across the life course in the face of restricted financial resources

Landmark Cases in Property Law Simon Douglas, Robin Hickey, Emma Waring, 2015-06-25 *Landmark Cases in Property Law* explores the development of basic principles of property law in leading cases Each chapter considers a case on land personal property or intangibles discussing what that case contributes to the dominant themes of property jurisprudence How are property rights acquired What is the content of

property rights What are the limits or boundaries of property How are property rights extinguished Individually and collectively the chapters identify a number of important themes for the doctrinal development of property institutions and their broader justification These themes include the obscure and incremental development of seemingly foundational principles the role of instrumentalism in property reasoning the influence of the law of tort on the scope of property doctrines and the impact of Roman legal reasoning on the common law of property One or more of these themes and others is revealed through careful case analysis in each chapter and they are collected and critically explored in the editors introductions This makes for a coherent and provocative collection and ensures that Landmark Cases in Property Law will be lively and essential reading for scholars practitioners and all those interested in the development of property principles at law

Housing and Family Wealth Ray Forrest, Alan Murie, 2025-11-18 Originally published in 1995 this innovative collection provides a multidisciplinary and cross national perspective on the links between housing personal wealth and the family in contemporary society Reasserting the role of the family and informal networks in housing provision it counteracts a tendency to view housing issues in the narrow terms of market and state provision The contributions include analyses from the USA Japan Hong Kong Greece France Sweden and Hungary and this highly international perspective allows the book to address important policy questions and offer new theoretical insights into the way housing is embedded in the wider social structure By moving away from the more usual highly ethnocentric discussion of today's housing issues the book aims to provide a more sociological account of the relationship between housing and wealth and the social structures within which that relationship is founded Today it can be read in its historical context The Anti-Social Family Michèle Barrett, Mary McIntosh, 2015-01-27 Despite much talk of its decline the nuclear family persists as a structure central to contemporary society a fact to be lamented according to the ideas of Michèle Barrett and Mary McIntosh The Anti social Family dissects the network of household kinship and sexual relations that constitute the family form in advanced capitalist societies to show how they reinforce conditions of inequality This classic work explores the personal and social needs that the family promises to meet but more often denies and proposes moral and political practices for more egalitarian caring alternatives Home Equity and Ageing Owners Lorna Fox O'Mahony, 2012-01-06 The growing use of housing equity to support a range of activities and needs raises complex issues particularly for older owners In an environment in which older owners are pushed towards housing equity transactions to meet income and welfare costs they are required to make choices from a complex and sometimes bewildering range of options The transactions which facilitate the use of home equity as a resource to spend in later life from trading down and ordinary secured and unsecured debt to targeted products including reverse lifetime mortgages home reversion plans and sale and rentback agreements raise important legal and regulatory issues This book provides a contextual analysis of the financial transactions that older people enter into using their housing equity It traces the protections afforded to older owners through the ordinary law of property and contract as well as the development of

specific regulatory protections focused on targeted products The book employs the notion of risk to highlight the nature and causes of the situational vulnerabilities to which older people are now subject as consumers of housing equity showing that the older owner's personal situation is crucial in determining whether and why they may seek to release equity the options and products available to them and the impact of harms resulting from adverse transactions The book critically evaluates the extent to which this context is incorporated in the legal frameworks through which these transactions are governed as a measure of the appropriateness of existing legal provision as well as considering the arguments surrounding special protection for older owners in housing equity transactions

The New Generational Contract Alan Walker University of Sheffield, 2013-11-05 This authoritative text offers the first comprehensive analysis of intergenerational relations and social welfare It examines both the micro sociological relations within the family and the social contract which forms the backbone of the welfare state This book is intended to appeal to undergraduates and postgraduates in sociology social policy and medicine and it will also be particularly useful for professional courses such as nursing social work and gerontology

The New Generational Contract Alan Walker, 1996 This authoritative text offers the first comprehensive analysis of intergenerational relations and social welfare It examines both the micro sociological relations within the family and the social contract which forms the backbone of the welfare state This book is intended to appeal to undergraduates and postgraduates in sociology social policy and medicine and it will also be particularly useful for professional courses such as nursing social work and gerontology

The UK Regional-National Economic Problem Philip McCann, 2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain's regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK's economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government

Great Debates in Land Law David

Cowan, Lorna Fox O'Mahony, Neil Cobb, 2023-04-20 While there are plenty of land law textbooks on the market there is in general an absence of critical texts designed for law students to deepen their understanding of the subject *Great Debates in Land Law* provides students with the contextual and critical aspects of this exciting topic Each chapter introduces topics for debate such as Is tenancy a property or a personal right and goes on to include features such as boxed discursive notes from the authors important cases and suggestions for further reading The *Great Debates* series provides engaging and accessible analysis of the more advanced legal concepts For books in the major taught subjects such as land law the series is designed for use by ambitious students alongside a main course textbook For books addressing subjects that are less often taught such as family law the series provides a clear and critical exposition of the key areas of debate By focussing on particular questions and tensions underlying a subject *Great Debates* titles encourage students to think critically analyse a topic and gain additional insights These skills and the discursive nature of the series with an emphasis on contentious topics are also useful for students when preparing their dissertations

Sharing the Wealth Andrew Mason, Georges Tapinos, 2000-09-07 This book is a collection of papers by leading scholars whose research concerns economic transfers between generations The issues addressed have great relevance to demographic issues particularly the determination of fertility to economic issues including equity and growth and to public policy especially social security reform Part I focuses on intergenerational features of the macroeconomy Advances in the construction of generational accounts are described and used to examine how the magnitude and direction of intergenerational transfers influences demographic behaviour the distribution of income and the accumulation of wealth Studies presented in Part II consider the role of the state as a provider of economic security for the elderly The authors draw on international experience and discuss many of the issues that must be confronted if efforts to reform public pension programs are to be successful Part III considers the intergenerational behaviour of the family The authors examine competing theories in both industrialized and developing country settings to consider how demographic change the development of financial institutions public policy and other economic forces influence the amount form and timing of intergenerational transfers

Safe as Houses Chris Hamnett, Michael Harmer, Peter Williams, 1991-01-28 The forty years since the war have seen a revolution in housing tenure in Britain In 1945 almost two thirds of households rented their accommodation from private landlords Only a quarter owned their own homes By 1987 almost two thirds of households owned or were buying their own homes Since 1960 the number of home owners has more than doubled to 14 million and Britain has changed from a nation of tenants to a nation of home owners The expansion of home ownership and rapid house price inflation have together led to dramatic changes in the role of owner occupied housing in the composition distribution and inheritance of wealth in Britain This book explores these changes and some of their important economic and social consequences The authors provide unique data on housing inheritance based on an ESRC and Housing Research Foundation funded project carried out at The Open University and the University of Wales College of Cardiff They provide details of the

occupational income and demographic background of beneficiaries of the use to which housing wealth has been put and the impact of housing inheritance on the housing market The authors also explore issues such as bequesting behaviour the role of taxation in regulating the effects of inheritance and the extent to which the rapid growth of home ownership and house price inflation makes Britain unique amongst Western countries

Winners And Losers Chris Hamnett, 2005-07-15 First published in 1998 The growth of home ownership since the end of the Second World War marks one of the most fundamental social changes to have taken place in Britain From being a nation of renters at the end of war Britain has been converted into a nation of home owners In 1945 approximately 25% of households in Britain owned their own homes Today the proportion is just over two thirds In the process the proportion of households renting from private landlords has fallen from 65% to about 8% As a result the home ownership market in Britain plays a far more important role today than hitherto both in housing the population and as a potential source of capital gains and losses In addition the home ownership market plays a significant role in the overall health of the economy This is not to deny the importance of social and private rented housing or the major problems of homelessness It is simply to assert that the home ownership market now affects two out of three households in Britain and many more who wish to gain access to it This book is about the dramatic booms and busts of the home ownership market in Britain during the last twenty years and their causes and consequences both for the individuals involved and for the economy as a whole It argues that the home ownership market in Britain particularly in southern Britain where the booms and slumps have been experienced most sharply has been akin to a casino There have been big winners but there have also been big losers The last thirty years have been a roller coaster ride for owners exhilarating but potentially highly dangerous not least for those who fell off or were thrown off in the slump of the early 1990s

Housing Finance and Subsidies in Britain Duncan MacLennan, Kenneth Gibb, 1993 A dozen papers from an April 1991 conference of the Housing Studies Association presumably held somewhere in Britain The sections cover regional patterns the independent rented sector local authority rent regimes inheritance older people and mobility and future prospects No index Acidic paper Distributed in the US by Ashgate Annotation copyright by Book News Inc Portland OR

Changing Britain Susan McRae, 1999 Major changes have happened in households and people's lives in most countries in the developed world Marriage rates have fallen divorce has risen women are having fewer children and later in life and there has been a rise in childbearing outside marriage One in four families is headed by a lone parent We are all getting older These changes have significance that goes beyond the individual families with implications for housing demand social security benefits labour force participation health and social services Changing Britain provides a comprehensive portrait of British families and households at the end of the 20th Century The book examines more generally the nature of economic and labour market change Britain's place in Europe and changing attitudes towards family life Specifically the book also deals with issues such as older people's lives non heterosexual families one person households young mothers and single parents and divorce

Urban Fortunes Jon Stobart, Alastair Owens, 2017-03-02 Property is central to any historical analyses of production reproduction and consumption It lies at the heart of discussions of material culture class relations and the household economy Recent work has begun to look beyond the acquisition and possession of goods to examine what the disposal transmission and giving of property might tell us about changing society and culture This landmark collection of articles represents a wide range of approaches to and perspectives on the ownership use and transmission of property in eighteenth and nineteenth century towns An introductory essay highlights the importance of property and inheritance in shaping social cultural economic and political structures and interactions within and between towns and cities Writing from a variety of disciplinary backgrounds the contributors then explore in detail the changing meaning of property to households and individuals the social economic and geographical contexts of inheritance practices the geography of wealth the role of gender in shaping property relations and perhaps above all the enduring link between property the family and the household in urban contexts

The Formulation of Local Housing Strategies Chris Nicol, 2017-05-15 Housing provision is a major dilemma for local authorities There is currently a huge demand for more housing while increasing environmental economic and political pressures must be considered when local authorities develop their policies This remarkable volume investigates how local authorities formulate their housing strategies It questions whether the local authority can be seen as a single entity in terms of housing or whether it is fragmented into separate departments Incorporating in depth empirical research from England and Wales the book discusses whether the process of developing housing policy and allocating land needs to be more integrated and whether key players such as speculative house builders should be involved in the development of policy Analyzing which information sources influence the local authority's land allocations and housing strategies the volume debates whether they provide the most useful data and suggests alternative information sources that may assist in better land allocation policies

Squatting and the State Lorna Fox O'Mahony, Marc L. Roark, 2022-08-25 This book offers a fresh theoretical approach and methodology for tackling the most pressing property problems of our time

Migration in Comparative Perspective Margaret Byron, Stéphanie Condon, 2008-01-07 This book presents a comparative perspective on post war Caribbean migration to Britain and France Both migrations were responses to the link between former colonies and colonial powers However the movements of labor occurred within separately and differently evolving political contexts affecting the migration outcomes Today Caribbean communities in Europe display complex features of continuity and change Condon and Byron examine trends in migration patterns household and family structures social fields employment and housing trajectories in detail This systematic comparison with its innovative focus on gender and life course is an excellent addition to the existing literature on the Caribbean diaspora
