Injury and Causation in Trade Remedy Law James J. Nedumpara, 2016-11-25 This book addresses injury and causation issues in the context of antidumping countervailing duty CVD and safeguard investigations that are covered under the WTO The book traces the origin and the negotiating history of injury and causation in trade remedy instruments and examines how this requirement evolved in the United States and more specifically in the GATT as part of the Kennedy Code the Tokyo Codes and later the Uruguay Round negotiating texts The book demonstrates that terms such as principal cause substantial cause and a cause in and of itself are not necessarily warranted in such instruments In the light of the experiences of key users of trade remedy instruments and the WTO Doha Round Rules negotiations the book argues that causation determination does not require mathematical precision Econometric or quantitative tools may be suggested but such tools need not undermine the policy laden nature of trade remedy instruments Accordingly the book suggests the use of weak necessity and strong sufficiency test as a potentially viable causative framework with regard to injury and causation in trade remedies

A Handbook of Globalisation and Environmental Policy, Second Edition Frank Wijen, K. Zoeteman, J. Pieters, Paul van Seters, 2012-01-01 Acclaim for the first edition This is undoubtedly a useful collection of essays for environmental policy makers and anyone interested in the relationship between national government and transnational forces the collection brings

together some interesting perspectives and should prove a useful complement to the existing political sociology of the environment

International Sociology Review of Books

The Handbook of Globalisation and Environmental Policy is a very important book. More than 40 experienced authors including some of the most important international thought leaders of our time have confronted a crucial question: How can and should national governments come to grips with the need for global action on a wide range of increasingly urgent environmental challenges that exceed their authority and capability? Through close examination of numerous case studies, a balanced perspective that takes government, business, and civil society into account, and fresh interdisciplinary thinking about a range of policy tools, the Handbook offers a treasure trove of new concepts and new perspectives. The authors conclude that by acknowledging the ongoing erosion of national sovereignty and accepting the growing need to work together in supranational forums, national governments can in fact increase their capacity to shape their own destiny.

Lawrence Susskind, Massachusetts Institute of Technology, US

In an increasingly interdependent world, global forces affect both the design and effectiveness of environmental policy. This Handbook provides an unusually creative and comprehensive guide not only to the nature of these forces and their impacts but also to how a better understanding of these forces can provide a foundation for improving the effectiveness of environmental policy.

Tom Tietenberg, Colby College, US

In the current era of globalisation, national governments are increasingly exposed to international influences that present new constraints and opportunities for domestic environmental policies. This comprehensive revised Handbook pushes the frontiers of theoretical and empirical knowledge and provides a state-of-the-art examination of the multifaceted effects of globalisation on environmental governance. Including substantially revised as well as new contributions from leading authorities, the Handbook offers an insightful overview of recent developments at the intersection of globalisation and national environmental policy. It covers themes including national regimes, trade rules, types of goods, federalism, innovation, standards, citizen consumers, developing countries, policy networks, partnerships, and carbon trading. The Handbook's depth and scope will appeal to a broad and varied readership across academics, students, and policy makers interested in public and private governance, environmental economics, international relations, environmental politics, and law, sociology, and political science.
