Safety in Academic Chemistry Laboratories American Chemical Society. Committee on Chemical Safety, 2017 **Safety in academic chemistry laboratories** Jay A. Young, 2003 This book contains volume 1 of 2 and describes safety guidelines for academic chemistry laboratories to prevent accidents for college and university students Contents include 1 Your Responsibility for Accident Prevention 2 Guide to Chemical Hazards 3 Recommended Laboratory Techniques and 4 Safety Equipment and Emergency Procedures Appendices include the Web as a source of safety information and incompatible chemicals **Safe Science** National Research Council, Division of Behavioral and Social Sciences and Education, Board on Human-Systems Integration, Division on Earth and Life Studies, Board on Chemical Sciences and Technology, Committee on Establishing and Promoting a Culture of Safety in Academic Laboratory Research, 2014-10-08 Recent serious and sometimes fatal accidents in chemical research laboratories at United States universities have driven government agencies professional societies industries and universities themselves to examine the culture of safety in research laboratories These incidents have triggered a broader discussion of how serious incidents can be prevented in the future and how best to train researchers and emergency personnel to respond appropriately when incidents do occur As the priority placed on safety increases many institutions have expressed a desire to go beyond simple compliance with regulations to work toward fostering a strong positive safety culture affirming a constant commitment to safety throughout their institutions while integrating safety as an essential element in the daily work of laboratory researchers Safe Science takes on this challenge This report examines the culture of safety in research institutions and makes recommendations for university leadership laboratory researchers and environmental health and safety professionals to support safety as a core value of their institutions The report discusses ways to fulfill that commitment through prioritizing funding for safety equipment and training as well as making safety an ongoing operational priority A strong positive safety culture arises not because of a set of rules but because of a constant commitment to safety throughout an organization Such a culture supports the free exchange of safety information emphasizes learning and improvement and assigns greater importance to solving problems than to placing blame High importance is assigned to safety at all times not just when it is convenient or does not threaten personal or institutional productivity goals Safe Science will be a guide to make the changes needed at all levels to protect students researchers and staff Safety in Academic Chemistry Laboratories American Chemical Society. Committee on Chemical Safety, 1979 **Laboratory Safety for Chemistry Students** Robert H. Hill, Jr., David C. Finster, 2016-04-21 Provides knowledge and models of good practice needed by students to work safely in the laboratory as they progress through four years of undergraduate laboratory work Aligns with the revised safety instruction requirements from the ACS Committee on Professional Training 2015 Guidelines and Evaluation Procedures for Bachelor's Degree Programs Provides a systematic approach to incorporating safety and health into the chemistry curriculum Topics are divided into layers of progressively more advanced and appropriate safety

issues so that some topics are covered 2 3 times at increasing levels of depth Develops a strong safety ethic by continuous reinforcement of safety to recognize assess and manage laboratory hazards and to plan for response to laboratory emergencies Covers a thorough exposure to chemical health and safety so that students will have the proper education and training when they enter the workforce or graduate school **Safety in Academic Chemistry Laboratories** ,1985
