*Safety, Environmental Impact, and Economic Prospects of Nuclear Fusion* Bruno Brunelli, Heinz Knoepfel, 2012-12-06 This book contains the lectures and the concluding discussion of the Seminar on Safety Environmental Impact and Economic Prospects of Nuclear Fusion which was held at Erice August 6 12 1989 In selecting the contributions to this 9th meeting held by the International School of Fusion Reactor Technology at the E Majorana Center for Scientific Culture in Erice we tried to provide a comprehensive coverage of the many interrelated and interdisciplinary aspects of what ultimately turns out to be the global acceptance criteria of our society with respect to controlled nuclear fusion Consequently this edited collection of the papers presented should provide an overview of these issues We thus hope that this book with its extensive subject index will also be of interest and help to nonfusion specialists and in general to those who from curiosity or by assignment are required to be informed on these aspects of fusion energy
