Maritime Disputes and International Law Constantinos Yiallourides, 2019-05-20 The settlement of the maritime boundary disputes between China and Japan in the East China Sea and between Greece and Turkey in the Aegean Sea is politically deadlocked While diplomatic settlement efforts have been ongoing for the past several decades neither side in each case appears prepared to back down from its respective maritime and territorial claims Several incidents at sea have occurred prompting diplomatic protests military standoffs even exchange of fire The existing status quo is inherently unstable and does not favour either side to the extent that it holds hostage the multiple benefits that could otherwise be generated from the exploitation of the seabed energy and mineral resources in the disputed waters creating an urgent need for a meaningful discussion on finding a practical way forward This monograph undertakes a comprehensive analysis of these disputes based on the rules and principles of international law critically evaluating possible institutional designs of inter

State cooperation over seabed activities in disputed maritime areas and makes recommendations for the prospect of realising joint development regimes in the East China Sea and the Aegean to coordinate the exploration for and exploitation of resources without having resorted previously to boundary delimitation settlement **The World Factbook** United States. Foreign Office. Historical Section,1920 Agency and Archaeology of the French Maritime Empire Marijo Gauthier-Bérubé,Annaliese Dempsey,2023-12-08 The French maritime empire enabled the continued colonization of territories all over the world from the 17th to the 19th centuries and was built upon the backs of those in lower socioeconomic classes These classes were heavily impacted by social political and economic structures Detailed archaeological case studies using an agency perspective indicate that these lower socioeconomic classes were extremely diverse and dynamic groups that constantly negotiated their identities These stories are not about the kings military leaders and politicians but rather an exploration of the perspective of those who provided the fuel both willingly and unwillingly for the French maritime empire
