Tabak,1993 Reports on recent advances in detecting drugs hormones antibodies and other molecules of diagnostic importance research has been going on in such fields as dentistry clinical chemistry and steroid hormones but the researchers have not been talking to each across the disciplinary back fence A **Salivary Diagnostics** David T. Wong,2009-03-16 Salivary Diagnostics surveys one of the most exciting areas of research in oral biology Regarded as the mirror of the body saliva has immense potential to yield real clinical improvements in our ability to diagnose and hence treat oral and systemic conditions The composition of saliva and other oral fluids reflects the tissue fluid levels of therapeutic hormonal and immunological molecules as well as the presence of markers for systemic and oral disease **Saliva as a Diagnostic Fluid** Martha H. Glock,1992 *Saliva as a Diagnostic Fluid* Daniel Malamud, Lawrence A. Tabak,1993 This volume discusses the use of saliva testing as a non invasive diagnostic aid to monitor drug and hormone levels and to detect oral and systemic disease including AIDS Investigators from the fields of oral biology pharmacology and toxicology and microbiology and immunology present their work on the biochemistry and pharmacokinetics of drugs and hormones in saliva and the clinical applications of such testing The role of saliva in dental caries and periodontal disease is also discussed

Salivary Diagnostics Shruti Gupta, Simarpreet Sandhu, Himanta Bansal,2012-05 Since ages body fluids routinely used for diagnostic purposes are blood urine tears and cerebral spinal fluid but these fluids require more invasive collection procedures potentially causing discomfort and stress to the patient during procurement Since 2002 the National Institute of Dental and Craniofacial Research NIDCR created opportunities to overpower these limitations by investigating oral fluids as a diagnostic tool for assessment of health and disease status In the past 50 years salivary research has picked up the pace with the dawn of new techniques that illuminated the biochemical and physicochemical properties of saliva embracing the multifunctional roles that saliva has in speech lubrication digestion of food and maintaining oral and general health There is an opportunity of enhancing research conducted in the field and expanding the adaptability of using saliva as the diagnostic fluid in point of care diagnostics **Saliva As A Diagnostic Tool** Tharun Varghese Jacob, Sanjaya P.R., Gokul S.,2013 Even though the saliva lacks the drama of blood sincerity of sweat emotions of tears saliva should be used as biomarker to detect pregnancy diabetes mellitus oral pre cancer cancer infectious diseases and also to catch the suspect by eliciting DNA from saliva over the bite marks in forensic odontology This may allow a diagnosis of cancer to be made at an earlier stage giving patients more choice in various treatment options Doctors hope that advancements in salivary diagnostics in the future will replace invasive biopsies and provide new avenues in early detection and diagnosis It is a perfect medium for surveillance of health and disease Saliva is ideal for screening premalignant and malignant oral neoplasms because of its anatomical proximity Saliva contains specific biomarkers associated with either a healthy or diseased state **Explore the Systemic**

div div **Use of Saliva in Diagnosis of Periodontitis: Cumulative Use of Bacterial and Host-Derived Biomarkers** Ulvi Kahraman Gürsoy, Eija Könönen, 2017-03-15 Periodontitis is an infection induced inflammatory disease of the tooth supporting tissues. Treatment of periodontal diseases and regeneration of the effected tissues can be possible only in the early diagnosis of the disease. If left undiagnosed or untreated, periodontitis leads to irreversible soft and hard tissue destruction and finally to tooth loss. Saliva is known to contain inflammatory mediators, host tissue and cell degradation products as well as microbial metabolites and enzymes reflecting the health status of the oral cavity. In this topic, in collaboration with the well known scientists working on the field of salivary diagnostics, we demonstrate evidence on monitoring periodontitis by salivary analysis.
