Marine Physiology Down East: The Story of the Mt. Desert Island Biological Laboratory David H.

Evans, 2015-08-13 This volume offers a comprehensive history of the Mount Desert Island Biological Laboratory MDIBL one of the major marine laboratories in the United States and a leader in using marine organisms to study fundamental physiological concepts Beginning with its founding as the Harpswell Laboratory of Tufts University in 1898 David H Evans follows its evolution from a teaching facility to a research center for distinguished renal and epithelial physiologists He also describes how it became the site of major advances in cytokinesis regeneration cardiac and vascular physiology hepatic physiology endocrinology and toxicology as well as studies of the comparative physiology of marine organisms Fundamental physiological concepts in the context of the discoveries made at the MDIBL are explained and the social and administrative history of this renowned facility is described Medicine Women Jim Kristofic, 2019-04-15 After the Indian wars many Americans still believed that the only good Indian was a dead Indian But at Ganado Mission in the Navajo country of northern Arizona a group of missionaries and doctors who cared less about saving souls and more about saving lives chose a different way and persuaded the local parents and medicine men to allow them to educate their daughters as nurses The young women struggled to step into the world of modern medicine but they knew they might become nurses who could build a bridge between the old ways and the new In this detailed history Jim Kristofic traces the story of Ganado Mission on the Navajo Indian Reservation Kristofic's personal connection with the community creates a nuanced historical understanding that blends engaging narrative with careful scholarship to share the stories of the people and their commitment to this place
