Short Term Decisions Equal Long Term Disasters:

Short-Term Decisions Equal Long-Term Disasters Craig Allen, 2003-08 SHORT TERM DECISIONS equal LONG TERM DISASTERS by Craig D Allen CFA CFP CIMA is an instruction manual for dealing with day to day decisions in a structured and constructive manner This book does not espouse one specific solution to any problem Rather it proposes a systematic framework of decision making intended as a guide to help you solve your own problems through deliberate analysis and positive change As the author states I see this book as a life manual intended to guide you in your quest to get what you want out of life and to feel good about yourself in the process Too often our natural tendencies drive us to look for a quick fix solution to a given problem that provides us with the most attractive short term benefit As the author states What I will propose in this book is that human behavior tends to favor making decisions based on obtaining short term benefits which rarely result in the person attaining their true goals This book explores the motivating factors that push us towards these short term decisions and the methods we can use to short circuit this behavior to improve our decision making process and thus the quality of our lives

Holistic Disaster Recovery, 2001-09 This is an all purpose handbook on how to build sustainability into a community during the recovery period after a disaster It has background information practical descriptions and ideas about what sustainability is why it is a good for a community and how it can be applied during disaster recovery to help create a better community The book is intended to be used by local officials staff activists and the disaster recovery experts who help the community during disaster recovery including state planners emergency management professionals mitigation specialists and others It is geared mainly toward small to medium sized communities

Governing for Resilience in Vulnerable Places Elen-Maarja Trell, Britta Restemeyer, Melanie M. Bakema, Bettina van Hoven, 2017-09-22 Governing for Resilience in Vulnerable Places provides an overview and a critical analysis of the ways in which the concept resilience has been addressed in social sciences research In doing so this edited book draws together state of the art research from a variety of disciplines i e spatial planning economic and cultural geography environmental and political sciences sociology and architecture as well as cases and examples across different spatial and geographical contexts e g urban slums in India flood prone communities in the UK coastal Japan The cases present and explore challenges and potentials of resilience thinking for practitioners and academics As such Governing for Resilience in Vulnerable Places aims to provide a scientifically robust overview and to generate some conceptual clarity for researchers students and practitioners interested in the potential of resilience thinking as well as the application of resilience in practice

The Routledge Companion to Environmental Planning Simin Davoudi, Richard Cowell, Iain White, Hilda Blanco, 2019-07-31 This Companion presents a distinctive approach to environmental planning by situating the debate in its social cultural political and institutional context being attentive to depth and breadth of discussions providing up to date accounts of the contemporary practices in environmental planning and their changes over time adopting multiple theoretical and analytical lenses and different disciplinary approaches and drawing on knowledge and expertise of a wide range of leading international scholars from across the social science disciplines and beyond It aims to provide critical reviews of the state of the art theoretical and practical approaches as well as empirical knowledge and understandings of environmental planning encourage dialogue across disciplines and national policy contexts about a wide range of environmental planning themes and engage with and reflect on politics policies practices and decision making tools in environmental planning The Companion provides a deeper understanding of the interdependencies between the themes in the four parts of the book Understanding the environment Environmental governance Critical environmental pressures and responses and Methods and approaches to environmental planning and its 37 chapters It presents critical perspectives on the role of meanings values governance approaches and participations in environmental planning Situating environmental planning debates in the wider ecological political ethical institutional social and cultural debates it aims to shine light on some of the critical journeys that we have traversed and those that we are yet to navigate and their implications for environmental planning research and practice The Companion provides a reference point mapping out the terrain of environmental planning in an international and multidisciplinary context The depth and breadth of discussions by leading international scholars make it relevant to and useful for those who are curious about wish to learn more want to make sense of and care for the environment within the field of environmental planning and beyond

Holistic Disaster Recovery, 2005 This handbook encourages communities to incorporate as many of the principles of sustainability into the recovery process as possible including environmental quality economic vitality quality of life social equity citizen participation and disaster resiliency The revised edition contains new examples of recovery success stories and features a special focus on the Hurricane Katrina recovery

Disasters in World History Benjamin Reilly, 2024-08-27 Disasters in World History surveys the development of disaster studies as a discipline as well as presenting historical case studies and theories used by historians to understand disasters Disasters here defined as

the complex interaction between natural hazards and specific human vulnerabilities have frequently left a mark on human history. Cataclysms have toppled dynasties, fueled massacres and shaped the culture of societies frequently affected by natural hazards. This volume fosters understanding of such events by considering both social science theory and the natural science concepts relevant to disaster studies. In addition, the text makes heavy use of an emerging psychological theory relevant to disaster studies: the behavioral immune system, which helps to explain why xenophobic behavior and even violence often erupt in the aftermath of disasters. Chapters consider specific examples of disasters: earthquakes, tsunamis, volcanic eruptions, climate change, including modern anthropogenic climate change or global warming, and tropical cyclones. This book is an accessible resource ideal for undergraduates and instructors in world history, environmental history, and disaster studies courses.

Architectural Theories of the Environment Ariane Lourie Harrison, 2013-03-05 As architects and designers, we struggle to reconcile ever-increasing environmental, humanitarian, and technological demands placed on our projects. Our new geological era, the Anthropocene, marks humans as the largest environmental force on the planet and suggests that conventional anthropocentric approaches to design must accommodate a more complex understanding of the interrelationship between architecture and environment. Here, for the first time, editor Ariane Lourie Harrison collects the essays of architects, theorists, and sustainable designers that together provide a framework for a posthuman understanding of the design environment. An introductory essay defines the key terms, concepts, and precedents for a posthuman approach to architecture, and nine fully illustrated case studies of buildings from around the globe demonstrate how issues raised in posthuman theory provide rich terrain for contemporary architecture, making theory concrete. By assembling a range of voices across different fields, from urban geography to critical theory to design practitioners, this anthology offers a resource for design professionals, educators, and students seeking to grapple with the ecological mandate of our current period. Case studies include work by Arakawa and Gins, Arons, en Gelauff, Casagrande, The Living, Minifie, van Schaik, R. Sie, n, SCAPE, Studio Gang, and xDesign. Essayists include Gilles Clément, Matthew Gandy, Francesco Gonzalez de Canales, Elizabeth Grosz, Simon Guy, Seth Harrison, N. Katherine Hayles, Ursula Heise, Catherine Ingraham, Bruno Latour, William J. Mitchell, Matteo Pasquinelli, Erik Swyngedouw, Sarah Whatmore, Jennifer Wolch, Cary Wolfe, and Alben Yaneva.

New Perspectives in Healthcare Emerald Group Publishing Limited, 2015-10-30 A mixture of original research and thought leadership pieces combine to examine the changing landscape of the US healthcare system. This book provides researchers, professionals, managers, and policy makers with a summary of how the US healthcare system has evolved and provides food for thought on how to prepare for the challenges of the future.

Brewing Up a Business Sam Calagione, 2005-05-27

Entrepreneurial dreams do come true Starting with nothing more than a home brewing kit Sam Calagione founded Dogfish Head Craft Brewery and made it America's fastest growing independent beer This unconventional business story reveals how Calagione found success by dreaming big working hard and thinking differently and how you can do it too Rarely is a book as good as a beer but this one is It's written with humor humility and passion essential ingredients for any entrepreneur Bob Guccione Jr founder of Spin magazine and Gear magazine Brewing Up a Business will inspire both entrepreneurs and aspiring small business people to have the confidence in following their dreams Jim Davis Chairman and CEO of New Balance Sam Calagione embodies the spirit of a true Delaware entrepreneur Starting out as the smallest brewery in the nation Sam's ambition acute business sense and vision have allowed Dogfish Head Craft Brewery to successfully enter an extremely competitive market as Dogfish Head continues to leave an indelible mark on the beer industry Ruth Ann Minner Governor of Delaware Everything you want to know about succeeding in business you can learn from beer At least you can if it's the remarkable story of Dogfish Head Craft Brewery Brewing Up a Business is like a how to manual for entrepreneurs With humor creativity and wisdom Sam Calagione has crafted a new kind of business book that's as unique as his great beer Joe Calloway author of Becoming a Category of One and Indispensable *Disaster Recovery* Rajib Shaw, 2013-10-30 This book explains key lessons learned from diverse disaster situations and analyzes them within the framework of governance education and technology providing a framework for disaster recovery as a development opportunity In post disaster situations different types of resources are put into the affected region varying according to technical financial intellectual and community resources If properly implemented disaster recovery can change the context of risk reduction approaches if not it can create additional hazards In some countries the post disaster recovery process has even changed the socio economic and political context of the affected region and country The book has 21 chapters and is divided into four parts governance and institutional issues five chapters education and learning issues four chapters technology and innovation issues five chapters and cross cutting issues five chapters The final chapter provides an analysis of the key topics The primary target groups for this book are students and researchers in the fields of environment disaster risk reduction and climate change studies The book provides them with a good idea of the current research trends in the field and furnishes basic knowledge about these vital topics Another target group comprises practitioners and policy makers who will be able to apply the knowledge collected here to policy and decision making *Koenig and Schultz's Disaster Medicine* Kristi L. Koenig, Carl H. Schultz, 2016-02-16 As societies become more complex and interconnected the global risk for catastrophic disasters is increasing Demand for expertise to mitigate the human suffering and damage these events cause is also high A new field of disaster medicine is emerging offering innovative approaches to optimize disaster management Much of the information needed to create the foundation for this growing specialty is not objectively described or is scattered among multiple different sources This definitive work brings together a coherent and comprehensive collection of scientific

observations and evidence based recommendations with expert contributors from around the globe This book identifies essential subject matter clarifies nomenclature and outlines necessary areas of proficiency for healthcare professionals handling mass casualty crises It also describes in depth strategies for the rapid diagnosis and treatment of victims suffering from blast injuries or exposure to chemical biological and radiological agents *Natural Hazards* Graham A.

Tobin,1997-03-28 Adopting an integrated approach to natural hazards that incorporates facets of both the physical and social sciences this text examines how different societies have responded to such extremes of nature The authors bring together the behavioural political psychological and economic approaches leading to increased comprehension of a range of natural hazards rather than a detailed analysis of particular events or hazard categories *Risk, Crisis, and Disaster Management in Small and Medium-Sized Tourism Enterprises* Toubes, Diego R.,Araújo-Vila, Noelia,2021-05-21 Tourism destinations are traditionally dominated by small and medium sized enterprises that provide a wide range of products to tourists such as accommodation travel services transportation recreation and entertainment and food and beverage services New knowledge and global risks have emerged and small and medium sized tourism enterprises SMTEs are now highly vulnerable Recently the COVID 19 pandemic has hit the whole world and caused a change in the tourism paradigm Many SMTEs around the world have been severely affected by the need to completely shut down their activities for months and expectations for recovery in the medium term are not optimistic SMTEs do not have the capacity and increased resources financial human operational of large companies to prepare for crisis contingencies planning and respond to the challenges they face They simply do not have the resources or knowledge for risk analysis and the creation of crisis teams or plans This is an area of growing importance and concern both in the public and private sectors where specific research and more in depth knowledge are needed *Risk Crisis and Disaster Management in Small and Medium Sized Tourism Enterprises* connects research in the field of crisis management with the risks affecting small and medium sized tourism enterprises The book presents prevailing research on SME related planning response and recovery during crisis situations further propelling much needed literature on these challenges in today s tourism industry The chapters cover important topics such as terrorism threats disaster management resilient strategies pandemic management and risk analysis The target audience of this book will be composed of professionals working in the tourism and hospitality industries restaurateurs travel agencies hotel executives directors managers crisis and risk planners policymakers government officials researchers and academicians who are interested in the threats to tourism businesses and how small and medium sized enterprises can manage and navigate these risks

Leadership Dispatches Michael Useem,Howard Kunreuther,Erwann Michel-Kerjan,2015-03-11 On February 27 2010 Chile was rocked by a violent earthquake five hundred times more powerful than the one that hit Haiti just six weeks prior The Chilean earthquake devastated schools hospitals roads and homes paralyzing the country for weeks and causing economic damage that was equal to 18 percent of Chile s GDP This calamity hit just as an incumbent political regime was

packing its bags and a new administration was preparing to take office For most countries it would have taken years if not decades to recover from such an event Yet only one year later Chile s economy had reached a six percent annual growth rate In Leadership Dispatches Michael Useem Howard Kunreuther and Erwann Michel Kerjan look at how the nation s leaders in government business religion academia and beyond facilitated Chile s recovery They attribute Chile s remarkable comeback to a two part formula consisting of strong national leadership on the one hand and deeply rooted institutional practices on the other Coupled with strategic deliberative thinking these levers enabled Chile to bounce back quickly and exceed its prior national performance The authors make the case that the Chilean story contains lessons for a broad range of organizations and governments the world over Large scale catastrophes of many kinds from technological meltdowns to disease pandemics have been on the rise in recent years Now is the time to seek ideas and guidance from other leaders who have triumphed in the wake of a disaster In this vein Leadership Dispatches is both a remarkable story of resilience and an instructive look at how those with the greatest responsibility for a country company or community should lead
