Hayes, Richard E. Young, Michele L. Matchett, Maggie McCaffrey, Cynthia Cochran, 2020-10-07 For the most part those who teach writing and administer writing programs do not conduct research on writing Perhaps more significantly they do not often read the research done by others because effective reading of articles on empirical research requires special knowledge and abilities By and large those responsible for maintaining and improving writing instruction cannot without further training access work that could help them carry out their responsibilities more effectively This book is designed as a text in graduate programs that offer instruction in rhetoric and composition Its primary educational purposes are to provide models and critical methods designed to improve the reading of scientific discourse to provide models of effective research designs and projects appropriate to those learning to do empirical research in rhetoric

Aiming to cultivate new attitudes toward empirical research this volume encourages an appreciation of the rhetorical tradition that informs the production and critical reading of empirical studies The book should also reinforce a slowly growing realization in English studies that empirical methods are not inherently alien to the humanities rather that methods extend the power of humanist researchers trying to solve the problems of their discipline

Canon Fanfiction Christine Schott, 2023-01-30 Several scholarly fields investigate the reuse of source texts most relevantly adaptation studies and fanfiction studies The limitation of these two fields is that adaptation studies focuses narrowly on retelling usually in the form of film adaptations but is not as well equipped to treat other uses of source material like prequels sequels and spinoffs On the other hand fanfiction studies has the broad reach adaptation studies lacks but is generally interested in underground production rather than material that goes through the official publication process and thus enters the literary canon This book sits in the gap between these fields discussing published novels and their contribution to the scholarly engagement with their pre and early modern source material as well as applying that creative framework to the teaching of literature in the college classroom
