Keller, Astrid Lohöfer, 2011-07-13 Cognitive science is the interdisciplinary study of the

human mind As far as the exact relationship between the cognitive sciences and other fields is concerned however it appears that interdisciplinary exchange often remains unrealized possibly because of the uni directional application of theories concepts and methods which impedes the productive transfer of knowledge in both directions In the course of the cognitive turn in the humanities and social sciences many disciplines have selectively borrowed ideas from core cognitive sciences like psychology and artificial intelligence The day to day practice of interdisciplinarity thus thrives on one directional borrowings Focusing on cognitive approaches in linguistics and literary studies this volume explores bi directionality a genuine transdisciplinary interchange in which both disciplines are borrowing and lending The contributions take different perspectives on bi directionality some extend uni directional borrowing practices and point to avenues and crossroads while others critically discuss obstacles challenges and limitations to bi directional transfer *The Multimedia and CD-ROM*
