The Things We Carry Courtney Adams Wooten,Jacob Babb,Kristi Murray Costello,Kate Navickas,2020-10-01 Emotional labor is not adequately talked about or addressed by writing program administrators The Things We Carry makes this often invisible labor visible demonstrates a variety of practical strategies to navigate it reflectively and opens a path for further research Particularly timely this collection considers how writing program administrators work when their schools or regions experience crisis situations The book is broken into three

sections one emphasizing the WPA's own work identity one on fostering community in writing programs and one on balancing the professional and personal Chapters written by a diverse range of authors in different institutional and WPA contexts examine the roles of WPAs in traumatic events such as mass shootings and natural disasters as well as the emotional labor WPAs perform on a daily basis such as working with students who have been sexually assaulted or endured racist sexist homophobic and otherwise disenfranchising interactions on campus The central thread in this collection focuses on preserving by acknowledging that emotions are neither good nor bad and that they must be continually reflected upon as WPAs consider what to do with emotional labor and how to respond Ultimately this book argues for more visibility of the emotional labor WPAs perform and for WPAs to care for themselves even as they care for others The Things We Carry extends conversations about WPA emotional labor and offers concrete and useful strategies for administrators working in both a large range of traumatic events as well as daily situations that require tactical work to preserve their sense of self and balance It will be invaluable to writing program administrators specifically and of interest to other types of administrators as well as scholars in rhetoric and composition who are interested in emotion more broadly

Death And Trauma Charles R. Figley, Brian E. Bride, Nicholas Mazza, 2022-09-16 First published in 1997 Although the fields of thanatology and traumatology have received robust attention during their parallel development little effort has been made to address their overlapping territory This volume is the first attempt to do so Specifically the purpose of this book is fourfold First is to provide a theoretical bridge between the two fields by providing conceptual terminology such as defining normal versus dysfunctional bereavement and the meaning and range of death related PTSD The second confirms and illustrates the identical patterns of reactions between those who survive the death of a loved one and those who survive other traumatic events Next the book applies the most useful theoretical models to the bereavement experience and in turn acknowledges the utility of generalizing bereavement models to other traumatic experiences in doing so the two fields can enrich each other Similarly the volume's final purpose is to identify and apply the most useful and effective approaches in traumatology literature to the study diagnosis and treatment of traumatic stressors other than death
