Comparison of Predicted and Experimental Wall Temperatures for a Cylindrical Ejector Exhaust Nozzle Operated with a Turbojet Gas Generator Arthur Lieberman, 1971 The shroud wall temperatures during operation with and without an afterburner are predicted analytically by using a wall heat balance of hot gas radiation coolant convection internal and external radiation and external free convection The Hatch Papell film cooling correlation predicts an adiabatic wall temperature which is used as the driving temperature for the coolant heat transfer Ejectors with nozzle area ratios from 1.65 to 2.75 and ejector length to primary diameter ratios from 1.63 to 1.95 were tested Tests were conducted at nozzle pressure ratios ranging from 2.0 to 6.3 primary total temperatures from 861 to 1939 K 1550 degree to 3490 degree R and corrected secondary weight flow ratios from 0.027 to 0.088 The predictions yielded reasonably good results throughout the range of conditions tested Space Simulation, 1972 Space simulation conference **NASA Technical Memorandum**, 1982

Post-Dryout Heat Transfer G.F. Hewitt, 2017-10-06 The study of post dryout heat transfer has generated great interest because of its importance in determining maximum clad temperature in nuclear reactor loss of coolant accidents LOCAs An associated phenomenon the deterioration of heat transfer in boiling is significant to other industrial sectors This book provides comprehensive coverage of post dryout heat transfer discussing such essential topics as post dryout heat transfer in dispersed flow interpretation and use of transient data in surface rewetting by reinstatement of flow or by reducing heat flux rod bundles two phase flow occurrences in the post dryout region various methods for predicting inverted annular flow and new experiments for measuring thermodynamic nonequilibrium with probes in the channel The book also presents a basis for independent safety assessment of nuclear reactors and chemical plant systems where post dryout heat transfer may occur Post Dryout Heat Transfer will be a useful reference for researchers and professionals in the nuclear and chemical production industries
