Havlick, 2018-04-11 When viewed from space the Korean Peninsula is crossed by a thin green ribbon On the ground its mix of dense vegetation and cleared borderlands serves as home to dozens of species that are extinct or endangered elsewhere on the peninsula This is Korea s demilitarized zone one of the most dangerous places on earth for humans and paradoxically one of the safest for wildlife Although this zone was not intentionally created for conservation across the globe hundreds of millions of acres of former military zones and bases are being converted to restoration areas refuges and conservation lands David G Havlick has traveled the world visiting these spaces of military to wildlife transition and in *Bombs Away* he explores both the challenges physical historical and cultural and fascinating ecological possibilities of military site conversions Looking at particular international sites of transition from Indiana s Big Oaks National Wildlife Refuge to Cold War remnants along the former Iron Curtain Havlick argues that these new frontiers of conservation must accomplish seemingly antithetical aims rebuilding and protecting ecosystems or restoring life while also commemorating the historical and cultural legacies of warfare and militarization Developing these ideas

further he shows that despite the ecological devastation often wrought by military testing and training these activities need not be inconsistent with environmental goals and in some cases can even complement them a concept he calls ecological militarization A profound clear explication of landscapes both fraught and fecund marked by death but also reservoirs of life Bombs Away shows us how military activities conservation goals and ecological restoration efforts are made to work together to create new kinds of places and new conceptions of place *The Red Star and the Crescent* James

Bush Defense Program** Stephen J. Cimbala,2010 The events of 9 11 and the wars in Iraq and

Afghanistan make an obvious case for expert study of the George W Bush defense program During the Bush administration the rise and fall of governments the fates of peoples and the very definitions of war and victory were up for discussion The United States with its unprecedented global military power at the dawn of the twenty first century created new opportunities for using foreign policy and military strategy on behalf of national and allied interests But this power was limited and its use against unconventional or otherwise unorthodox enemies required careful calibration of its various instruments In this insightful series of essays edited by Stephen Cimbala eleven academic experts prominent in the defense and security think tank communities assess Bush s defense program Many also have past or current experience in the U S government or the American armed forces They examine Bush s defense policy and strategy across several critical issues including Iraq Afghanistan terrorism nuclear arms control and foreign military sales In addition special chapters are devoted to the leadership style of former defense secretary Donald Rumsfeld to the idea of victory as it might apply to Bush s defense decisions and to the best exit strategy from Iraq for the United States The lessons learned from the successes and failures in Bush s defense policy clearly presented in *The George W Bush Defense Program* can also be applied to the appraisal of all presidents *The Government-industrial Complex* Paul Charles Light,2019 The Government Industrial Complex analyzes

of the promises of high tech warfare How best to navigate the broader debates about changing gender and sexual norms in American society Pulled in different directions the Army struggled to put forward a compelling vision of who and what the American soldier should be In *Uncertain Warriors* David Fitzgerald reveals how in response to this uncertainty they eventually fell back on an older vision of martial masculinity embracing a warrior ethos that was meant to define the contemporary American soldier
