Siblings In Therapy Life Span And Clinical Issues:

Sibling Relationships Across the Life Span Victor Cicirelli, 2013-03-14 When one begins to examine the existing literature dealing with siblings one soon becomes aware that many separate domains of sibling research exist and that there is little connection between them for example sibling relationships in early childhood genetic and environmental influences on individual differences between siblings dysfunctional sibling relationships adult sibling helping relationships sibling violence and abuse and so on The author's aim in writing this book was to attempt to bring together for the first time studies from diverse areas of sibling research into a single volume The book is a summary and integration of the various domains of sibling studies extending across the life span where studies exist to make this possible Although many gaps in the sibling research literature within and between domains of study and over the life span still exist it is hoped that this book will motivate others to help fill in the gaps by suggesting directions where further research is needed *Sibling Issues in*

Therapy Avidan Milevsky, 2016-01-26 Incorporating the latest research and clinical work in family dynamics this book examines multiple angles of integrating sibling issues which underlie issues at the core of many clinical difficulties presented by adult clients in therapy to improve adulthood emotional and psychological well being **Reassessing Social Work**

Practice with Children John Pardeck, Martha Markward, 1997-07-21 Physical and mental abuse gang related violence homelessness and neglect are just a few of the dangers that a child must face Child welfare officers school social workers and family service providers have been the primary line of defense against these hazards but in order to provide a more effective form of social care these fields must be seen as an integrated whole They must also have the skill to act as multidisciplinary teams Taken from an issue of the journal *Early Child Development and Care* *Reassessing Social Work Practice with Children* provides professionals with a dynamic orientation that offers a holistic approach to social work practice with children This view encompasses any and all measures of practice designed to protect and promote the biopsychosocial development of children including education protective services and substitutive services *Accidental Bond* Susan Scarf

Merrell, 2011-01-05 A fascinating and informative read The Boston Globe A RICH SOURCE OF FASCINATING MATERIAL about the complex realities of siblinghood and a valuable commentary on the impact that these little studied relationships have upon our lives The New Republic Many books have attempted to tackle the complex theme of sibling connection But rather than look at the minutiae of these relationships journalist Susan Scarf Merrell examines the big issues that all siblings wrestle with in their own unique ways in particular the Three Cs Competition Cooperation and Comparison What she discovered was that no matter what kind of relationship we now have with our siblings close or distant loving or hostile our histories with them exert a profound effect on our current relationship with lovers friends coworkers and our own children Drawing on the most current research the work of psychologists psychiatrists and family experts and stories from brothers and sisters themselves Merrell illustrates that through siblings we come to know both the worst and the very best that lurks

within each of us Susan Merrell brilliantly illuminates how the peculiar mix of biology history and intimacy makes our attachments to siblings so essential to knowing ourselves Mary Kay Blakely Author of American Mom [A Casebook of Family Interventions for Psychosis](#) Fiona Lobban,Christine Barrowclough,2009-03-09 A practical guide to implementing family interventions for psychosis which discusses different family needs and illustrates different approaches to offering the interventions Approximately 1 in 100 people experience psychosis which can severely disrupt home and family life and place a heavy burden on carers A practical guide to implementing family interventions for psychosis which discusses different family needs and illustrates different approaches to offering the interventions Shows how to tailor family interventions to meet different needs e g working via interpreter or with families in which multiple members suffer mental health problems No direct competition on family interventions for psychosis **A Group-Analytic Exploration of the Sibling Matrix** Val Parker,2019-11-19 A Group Analytic Exploration of the Sibling Matrix How Siblings Shape our Lives offers a fresh approach to siblings recognising how these relationships are embedded in the framework of the family and how sibling experiences shape our lives influencing relationships with partners friends and colleagues and affecting how we take our place in groups and in society The book is divided into three parts Part One focuses on the sibling life cycle exploring how these relationships shift and change throughout life according to context and circumstances In Part Two Parker uses clinical examples to consider how therapists working with individuals and groups might expand their thinking to incorporate the sibling matrix The final part investigates how the sibling matrix manifests in organisational life and considers how we might develop mutuality and cooperation in our universal sibling matrix Drawing on the author's wealth of experience as a clinician the book incorporates compelling personal stories and clinical examples to bring to life the realities and nuances the good and bad the healthy and supportive and also the potentially damaging aspects of sibling relationships Accessibly written this is a rich and rewarding invitation to reflect on our own experience whether as clinicians researchers or as members of our own sibling matrix **Brothers and Sisters** Henry Abramovitch,2014-11-18 Growing up we typically spend more time with our brothers and sisters than we do with our parents In an age of divorce mobility and alienation the sibling bond is often the only one that really lasts Given that brothers and sisters are such a fundamental aspect of human existence it is remarkable that they have received so little in depth attention in the field of psychology Henry Abramovitch's Brothers and Sisters explores the tension between the myth and reality of brothers and sisters in a variety of cultures and through the poignant brother sister stories in the Bible Abramovitch looks at the developmental sequence in the sibling relationship as brothers or sisters struggle to find their place with each other concluding with a very personal account of his own relationship with his brother and sister **Sibling Relationships in Childhood and Adolescence** Avidan Milevsky,2011 The most long lasting and enduring relationship an individual can develop is with a sibling Considering the closeness in age and early association of siblings they can bond for a lifetime Psychologists are beginning to appreciate the sibling link and its dynamic role in a child

s social development Beyond the mother child dyad sibling associations are now attributed with determining cognitive faculties emotional balance self sufficiency and peer interactions Clarifying the complex processes of these relationships and the benefit of parental involvement Avidan Milevsky provides a foundational text for a growing area of study Deploying personal narrative theoretical examinations and empirical data he unravels the intricacies of the sibling exchange and their function in overall family structures He identifies the factors that make such bonds successful or harmful and the influence of parents in shaping these outcomes He also evaluates the compensatory possibilities of the sibling bond when faced with the absence of a parent or friend Variables such as age birth order gender and family size are tremendous considerations and parents hoping to enhance the sibling bond gain immensely from understanding these predictors Milevsky shows practitioners how to educate parents and help them apply their knowledge in practice He particularly supplies crucial perspective on deidentification or conscious differentiation in which parents encourage different life paths to minimize sibling comparison and competition A major tool for clinicians social service providers and educators this book clarifies the next frontier in child development research

Sibling Therapy Karen Gail Lewis, 2023 Just mention the word sibling and everyone has a story to share It might be a happy story or a miserable one but they want to tell it And according to the US Census Bureau 2021 with at least 78.3% of Americans having at least one sibling that's a lot of stories

We Grew Up Together Annette Atkins, 2001 Drawing on the insights of Alfred Adler and others Atkins examines the varying dynamics of warm and cool families and shows how siblings tutored each other in friendship authority cooperation and competition dependence and independence

BOOK JACKET *After the Tears* Jane Middleton-Moz, Lorie Dwinell, 2010-09 The trauma and grief of growing up in an alcoholic or addicted family create a lifetime of baggage If you grew up in an addicted family the dysfunction that permeated every aspect of your childhood may have seemed normal and you may not even realize the level of affect alcohol still has on your adult life whether or not you drink If you are one of the millions of Adult Children of Alcoholics ACOAs the cost of your childhood pain can be unbearable You may have learned how to survive but are you living your life Do you fear normal conflict Do you blame yourself when something goes wrong even when it isn't your fault Are you a chaos junkie Or do you just fear relationships because they are too difficult or too painful Having devoted much of their careers to working with ACOAs therapists Jane Middleton-Moz and Lorie Dwinell now take a deeper look into the origin and cost of childhood pain as well as the grief resolution process that is integral to recovery This revised and expanded edition of their groundbreaking 1986 hit *After the Tears* discusses the latest research and offers insights on living a good life despite a dysfunctional childhood by tackling issues such as intimacy sibling relationships codependency breaking the alcoholic pattern building a relationship with the inner child forgiveness and opening a window to spirituality

Generation to Generation John A. Davis, Marion McCollom Hampton, Ivan Lansberg, Gersick Kellin E., 1997-01-01 *Generation to Generation* presents one of the first comprehensive overviews of family business as a specific organizational form Focusing on the inevitable maturing

of families and their firms over time the authors reveal the dynamics and challenges family businesses face as they move through their life cycles The book asks questions such as what is the difference between an entrepreneurial start up and a family business and how does one become the other How does the meaning of the business to the family change as adults and children age How do families move through generational changes in leadership from anticipation to transfer and then separation and retirement This book is divided into three sections that present a multidimensional model of a family business The authors use the model to explore the various stages in the family business life span and extract generalizable lessons about how family businesses should be organized

Shadows in the Sun Betty Davies, 2015-12-22 Shadows in the Sun covers the immediate short and long term responses and subsequent generational effects of sibling bereavement and discusses sibling responses in the context of the variables which influence them The final chapter synthesizes all that has gone before into a comprehensive model of sibling bereavement Practical guidelines are offered for those who seek to help grieving siblings children and families

Focused Genograms Rita DeMaria, Gerald R. Weeks, Larry Hof, 2013-06-17 The interpersonal relationships that make up family life are a complex web between many individuals spanning several generations at one time This web is further complicated by the influence of other factors such as culture and gender It can be a daunting task for a therapist to unravel this tangle and understand the specific dynamics and individual development within the family The Multifocused Family Genogram MFG is a powerful tool that allows the therapist to record and structure these different elements that make up the family system By combining the Basic Genogram the Family Map and several Focused Genograms the MFG provides a clear picture of dynamic family history that aids in individual and family assessment Focused Genograms provides a thorough account of the use of MFGs in family therapy and practice The authors present a clinically useful method for collecting the information in key areas of individual and family functioning needed to create Focused Genograms In addition the authors carefully explain the diagnostic use and therapeutic applications of this tool The book is supplemented by extensive examples of Focused Genograms Family Maps and Time Lines used in MFG construction Suggested readings listed at the close of each chapter provide links between techniques fully described in the book and other therapeutic techniques beyond the scope of this work A thorough presentation of innovative methods for using Focused Genograms makes this an important text for students of marriage and family therapy as well as an indispensable resource for professionals

Handbook of Aging and the Family Rosemary Blieszner, Victoria Hilkevitch Bedford, 1996-07-30 No other reference provides such a comprehensive and timely overview of theory and research on family relationships the contexts of family life and major turning points in late life families It includes many suggestions for theoretical and practical applications for future research on a score of important topics This multidisciplinary survey is an invaluable library reference and teaching resource intended for upper level undergraduate and graduate students teachers and practitioners for gerontologists family scholars psychologists sociologists historians social workers health care providers and policy makers

The Relationship Code David Reiss, Research Professor in Behavioural Genetics Robert Plomin, University of Tennessee, 2009-06-01 The Relationship Code is the report of a longitudinal study conducted over a ten year period of the influence of family relationships and genetic factors on competence and psychopathology in adolescent development The sample for this landmark study included 720 pairs of same sex adolescent siblings including twins half siblings and genetically unrelated siblings and their parents Using a clear expressive style David Reiss and his coinvestigators identify specific mechanisms that link genetic factors and the social environment in psychological development They propose a striking hypothesis family relationships are crucial to the expression of genetic influences on a broad array of complex behaviors in adolescents Moreover this role of family relationships may be very specific some genetic factors are linked to mother child relationships others to father child relations some to relationship warmth while others are linked to relationship conflict or control The specificity of these links suggests that family relationships may constitute a code for translating genetic influences into the ontogeny of behaviors a code every bit as important for behavior as DNA RNA

Social Work Practice with Children, Third Edition Nancy Boyd Webb, 2011-11-15 This book has been replaced by Social Work Practice with Children Fourth Edition ISBN 978 1 4625 3755 6 **Families in Troubled Times** Rand Conger, 2020-11-25 This book documents the experiences of rural Iowa families who lived through the farm crisis years of the 1980s in a fashion that might help families of the future cope more successfully with economic reversals The documentation could be used to fashion more effective social policies **International Review of Research in Mental Retardation**, 2011-09-06 International Review of Research in Mental Retardation is an ongoing scholarly look at research into the causes effects classification systems syndromes etc of mental retardation Contributors come from wide ranging perspectives including genetics psychology education and other health and behavioral sciences Volume 36 of the series offers chapters on newborn screening for intellectual disability responsive parenting Trisomy 21 Alzheimer s disease in adults with Down Syndrome foolish action in adults with intellectual disabilities animal models of self injurious behavior theoretical and methodological issues in sibling research understanding individual differences in adaptation in parents of children with intellectual disability and What Do You Think If using vignettes to study attitudes toward adult sibling caregiving and competence of parents of children with disabilities The wide range of topics covered in these chapters make Volume 36 of the International Review of Research in Mental Retardation a particularly valuable resource for academic researchers in developmental and cognitive psychology as well as those in neuropsychology Provides the most recent scholarly research in the study of mental retardation A vast range of perspectives is offered and many topics are covered An excellent resource for academic researchers **Families and Mental Retardation** Diane Marsh, 1992-05-27 Traditional pathology models do not provide a satisfactory framework for professional practice with families of people with mental retardation Families and Mental Retardation is written from the perspective of a competence paradigm for professional practice which offers a

constructive alternative to the more prevalent pathology models of the past The goal of professional practice is to empower families in coping with the catastrophic stressor of mental retardation Such an approach recognizes the strengths and resources of families which have often been minimized in the past and fosters new collaborative modes of family professional relationships Unique features include a consideration of life span and family system and subsystem perspectives as well as the inclusion of powerful personal accounts of family members The volume is likely to be of special value to mental health and health care professionals who often receive little training in mental retardation or family professional relations and who tend to apply a pathology model In contrast a competence paradigm is more prevalent in education
