## Sidney M Jourard Selected Writings:

**Sidney M. Jourard** Marty Jourard,1994-10-01 *Somatic Psychology* Linda Hartley,2004-08-13 This book brings attention to the interface of psychotherapy and psychological theory with the somatic practices of bodywork and movement therapy To offer a client only psychotherapy or only bodywork may subtly or directly reinforce the body mind split from which so many of us suffer in some cases this will be a reinforcement of a dilemma central to the client s problems Hartley views body psychotherapy and transpersonal psychotherapy as building bridges between the once separated processes of psyche soma and spirit Today the emerging field of somatic psychology is also contributing to the expanded field of psychology a subtle differentiation of bodymind process developed through almost a century and a half of research and practice in somatic therapy and education Originally trained as a dancer movement therapist and bodywork practitioner Hartley continues to use movement and somatic process as an important foundation for her own work Training in Dance Movement Therapy the transpersonal psychotherapy of Psychosynthesis and Process Oriented Psychology have further deepened Hartley s awareness of the relationships between psyche soma and spirit and the need to respond to all levels of experience in therapeutic work Basic Substance Abuse Social Systems, Inc,1978 **Body and Mind in Motion** Glenna Batson,Margaret Wilson,2014-06-01 Western contemporary dance and body mind education have engaged in a pas de deux for more than four decades The rich interchange of somatics and dance has altered both fields but scholarship that substantiates these ideas through the findings of twentieth century scientific advances has been missing This book fills that gap and brings to light contemporary discoveries of neuroscience and somatic education as they relate to dance Drawing from the burgeoning field of embodiment itself an idea at the intersection of the sciences humanities arts and technologies Body and Mind in Motion highlights the relevance of somatic education within dance education dance science and body mind studies Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office,1973 A Transatlantic Political Theology of Psychedelic Aesthetics Roger K. Green,2019-04-02 Arguing that we ought to look to psychedelic aesthetics of the 1960s in relation to current crises in liberal democracy this book emphasizes the intersection of European thought and the psychedelic The first half of the book focuses on philosophical influences of Herbert Marcuse and Antonin Artaud while the second half shifts toward literary and theoretical influences of Aldous Huxley on psychedelic aesthetics Framed within an emergent discourse of political theology it suggests that taking a postsecular approach to psychedelic aesthetics helps us understand deeper connections between aesthetics and politics **Developmental Transitions across the Lifespan** Leo B Hendry,2015-05-08 Choice Recommended Read Leo B Hendry is one of the foremost developmental psychologists of his generation His diverse range of interests have included studies on young people s involvement in competitive sports investigations into teacher and pupil relations in school adolescents leisure pursuits and their family relations parenting styles youth workers and mentoring youth unemployment adolescent health behaviours and transition to

early adulthood His research interests now include work on ageing and retirement Developmental Transitions across the Lifespan is the first collection of Hendry's works and essentially joins the dots to provide an overarching perspective on lifespan development through a dynamic systems theory approach Underpinned by empirical research this collection of journal articles and book chapters is linked by a contemporary commentary which not only contextualises each piece within today's research climate but builds to provide an unorthodox comprehensive but above all compelling perspective on human development from childhood to old age Leo B Hendry's research output has been significant and influential This is an important book that will provide students and researchers in developmental psychology not only with an opportunity to view his contribution holistically but in connecting his range of research interests provides a new contribution to our understanding of lifespan development in its own right

**Qualitative Research Methods for Psychologists** Constance T. Fischer, 2011-04-28 Qualitative Research Methods for Psychologists is a collection of 14 original articles that teaches readers how to conduct qualitative research Instead of characterizing and justifying certain methods the contributors show by means of actual research studies what assumptions procedures and dilemmas they encountered Fischer's introduction which emphasizes the practical nature of qualitative research and the closing chapter which uses a question and answer format to investigate among other subjects what is scientific about qualitative research are complemented by a glossary and other features that increase the book's utility and value Addresses a range of practical examples from different traditions such as phenomenology grounded theory ethnography and discourse analysis through actual case studies Discusses various methodology and combinations of methods like assimilation analysis dialogal approach intuitive inquiry and conceptual encounter Terms are defined within chapters and or in a glossary Helps readers bridge from experimental to qualitative methods Provides in depth philosophically grounded and compelling research findings Includes practical introduction about steps in qualitative research

**The Body Social** Anthony Synnott, 2002-09-11 In this captivating book Anthony Synnott explores a subject which has been woefully ignored our bodies He surveys the history for thinking about the body and the senses then focuses on specific themes gender beauty the face hair touch smell and sight He concludes with a review of

classical and contemporary theories of the body and the senses Thinking about the body will never be the same after reading this book

**Erotic Attunement** Cristina L. H. Traina, 2011-12-01 Heightened awareness of the problem of sexual abuse has led to deep anxiety over adults touching children in nearly any context Though our society has moved toward increasingly strict enforcement of this taboo studies have shown that young children need regular human contact and the benefits of breastfeeding have been widely extolled Exploring the complicated history of love desire gender sexuality parenthood and inequality Erotic Attunement probes the disquieting issue of how we can draw a clear line between natural affection toward children and perverse exploitation of them Cristina L H Traina demonstrates that we cannot determine what is wrong about sexual abuse without first understanding what is good about appropriate sensual affection Pondering topics such as the importance of touch in nurturing children the psychology of abuse and victimhood and recent ideologies of motherhood she argues that we must expand our philosophical and theological language of physical love and make a distinction between sexual love and erotic love Taking on theological and ethical arguments over the question of sexuality between unequals she arrives at the provocative conclusion that it can be destructive to completely bar eroticism from these relationships

**Cancer: 100 Ways to Fight** John Roberts, 2010-03-29 Cancer 100 Ways to Fight Your own attitude is your brightest guiding star Some of success is doing what you like to do But more of it is doing the things you don't like to do but must It is too easy to make an excuse and not do it and fail John Roberts As this book goes to press early in 2010 I am 75 and into my fifth year with incurable metastatic prostate cancer which had already spread to the bones before cancer was diagnosed and the prostate removed The statistical prognosis for the current treatments of choice is that one half of these patients will die within three years 75% within five This usually happens after the standard treatments and chemotherapy fail and must be discontinued due to harmful side effects or weakening effectiveness resumed cancer growth and the failure of bones or key organs I am still feeling fine no pain living a normal life and I have completed eight months of chemotherapy with a 63% drop in my PSA prostate cancer blood test without major side effects or rising PSA I have fought this cancer and its personal consequences in more than a hundred ways as described here Above all a lifetime of fitness and my current excellent physical and mental condition supplemented by great medical care and everything else I can learn or think of is partially responsible for my success in living beyond the average life span for my particular fatal disease We cannot know which weapon or how much each one contributes to the extension of life so we must use them all The doctors all say that cancer survival is very unpredictable and I figured that many of the positive outcomes must depend on how comprehensively and how hard the individual fights So I immediately started this book and organized my fight I was extremely unfortunate

most prostate cancer either is so slow growing or eliminated by removal that survivors live for many years In my case it had already spread or metastasized to the bones prior to the operation and that cancer is inoperable and incurable But some people in that condition die very early while others like me live much longer This is highly unpredictable in individual cases due to variation in patient condition treatment effectiveness and other unknowns More than half of all people newly diagnosed with cancer will be cured or given extended remission They will die of something else Of the other half a large number have treatable cancer and they still have many years to live The remainder probably including me have learned that they have incurable cancer that has grown too strong or spread and taken root in such places that it cannot be killed or removed and death is likely in the next few months or years Nevertheless normally incurable cancer and conventional predictability sometimes fail and others may prolong life by fighting with strong mental and physical effort As the disease progresses and is treated and science advances sometimes in great leaps we are rarely sure of which group we are in That uncertainty that hope and the dreadful power of cancer call for great strength of character and effort in both patients and those around them This book is about that The animal instinct to survive is in humans alone expanded in our unique cortex to something much greater the intelligent understanding of self awareness and an intense desire to prolong the experience growth and emotion of life The human spirit beyond the mere motivation of existence is largely responsible for all that our species has conquered and achieved It is an essential quality to be trained treasured and put to use and one of the finest ways is to survive continue and improve our exceptional life through our collective and individual intellect In the last century medical science the visibility of living in distant years and the recognition that we are and can be responsible for increasing our own longevity have ad
