Judah in the Neo-Babylonian Period Avraham Faust, 2012-08-29 The Babylonian conquest of Jerusalem in 586 B C E was a watershed event in the history

of Judah the end of the monarchy and the beginning of the exilic period during which many of the biblical texts were probably written. The conquest left clear archaeological marks on many sites in Judah including Jerusalem and the Bible records it as a traumatic event for the population. Less clear is the situation in Judah following the conquest that is in the sixth century a period with archaeological remains the nature and significance of which are disputed. The traditional view is that the land was decimated and the population devastated. In the last two decades archaeologists arguing that the land was not empty and that the exile had little impact on Judah's rural sector have challenged this view. This volume examines the archaeological reality of Judah in the sixth century in order to shed new light on the debate. By expanding research into new avenues and examining new data as well as by applying new methods to older data the author arrives at fresh insights that support the traditional view of sixth century Judah as a land whose population both urban and rural was devastated and whose recovery took centuries.

Literature as Politics, Politics as Literature David S. Vanderhooft, Abraham Winitzer, 2013-11-01 This volume in celebration of Peter Machinist Hancock Professor of Hebrew and Other Oriental Languages at Harvard University includes twenty eight illuminating essays on ancient Near Eastern history and literature which focus especially on the intersection of these fields. Contributors include one of Machinist's teachers several of his students and numerous colleagues and friends. These essays probe topics for which Machinist's work has often set new standards. And in the spirit of the honoree and his interests these comparative studies encompass Babel Bibel and more. In them Assyriologists contend with biblical cruxes and biblicists engage Assyriological research while classicists and Hittitologists participate with considerations of their respective disciplines within a broad cross cultural context. The volume is a must for anyone committed to the ongoing comparative study of the ancient Near East and within that framework the historical study of the Hebrew Bible.

From the Banks of the Euphrates Micah Ross, 2008-01-01 Although Near Eastern languages and the history of the exact sciences are known for being obscure and deliberately arcane to general audiences Alice Slotsky has paradoxically established her legacy by exposing these topics to a wider audience. Brown University Slotsky has taught more students than any previous Assyriologist and successfully brought this discipline to a wider audience than previously imagined possible This volume with articles written by former students as well as colleagues pays tribute to her broad interests The City Besieged Israel Eph'al,2009 *Judah in the Biblical Period* Oded Lipschits,2024-03-18 The collection of essays in this book represents more than twenty years of research on the history and archeology of Judah as well as the study of the Biblical literature written in and about the period that might be called the Age of Empires This 600 year long period when Judah was a vassal Assyrian Egyptian and Babylonian kingdom and then a province under the consecutive rule of the Babylonian Persian Ptolemaic and Seleucid empires was the longest and the most influential in Judean history and historiography The administration that was shaped and developed during this period the rural economy the settlement pattern and the place of Jerusalem as a small temple surrounded by a small settlement of mainly priests Levites and other temple servants characterize Judah during most of its history This is the formative period when most of the Hebrew Bible was written and edited when the main features of Judaism were shaped and when Judean cult and theology were created and developed The 36 papers contained in this book present a broad picture of the Hebrew Bible against the background of the Biblical history and the archeology of Judah throughout the six centuries of the Age of Empires

campaign of Sennacherib against Judah is one of the most widely researched in biblical studies and Ancient Near East studies and one that also poses scholarly challenges Allusion to the event is found in Isaiah Kings and Chronicles but there is no correlation between the Assyrian and biblical descriptions of the same event Dan el Kahn offers a text critical analysis of these biblical passages that allude to the military events Detecting repetitions breaks in the narrative and contradictions and inconsistencies in the texts he traces and reconstructs different and discrete sources Kahn demonstrates that the biblical passages are based on earlier sources that were later edited and revised by a third hand Based on historical events that are found in non biblical texts he also offers new dates for the sources He claims that the narrative was written for the book of Isaiah arguing that it predates the version found in Kings *Lamentations* Adele Berlin,2004-01-01 In this accessible
