Sierra Club Wetlands Reader:

The Sierra Club Wetlands Reader Sam Wilson, Tom Moritz, 1996 The Sierra Club Wetlands Reader is the second volume in the Sierra Club's new series of literary celebrations of the Earth's biomes the major ecological communities that have shaped the collective human experience From the Everglades to Alaska North America's wetlands comprise irreplaceable habitats for innumerable plants and animals In addition to being a subtle indicator of the health of the entire natural world this delicate ecosystem has inspired an extraordinary amount of fine writing Included in this remarkable collection are works by influential writers and scientists such as John Wesley Powell Jack London Aldo Leopold Frederick Law Olmsted Harriet Beecher Stowe and Edward Ricketts From William Bartram's Revolutionary War era meditation on the wetlands of Florida to Mark Twain's commentary on the flooding of the Mississippi River we encounter varied portraits of these fertile ecosystems In addition to celebrating this ecological community we are reminded of the importance of preservation as the wetlands are a crucial link in maintaining the stability of a global environment Textures of Place Paul C. Adams, Steven D.

Hoelscher, Karen E. Till, 2001 Annotation A fresh and far ranging interpretation of the concept of place this volume begins with a fundamental tension of our day as communications technologies help create a truly global economy the very political economic processes that would seem to homogenize place actually increase the importance of individual localities which are exposed to global flows of investment population goods and pollution Place no less today than in the past is fundamental to how the world works The contributors to this volume distinguished scholars from geography art history philosophy anthropology and American and English literature investigate the ways in which place is embedded in everyday experience its crucial role in the formation of group and individual identity and its ability to reflect and reinforce power relations Their essays draw from a wide array of methodologies and perspectives including feminism ethnography poststructuralism ecocriticism and landscape ichnography to examine themes as diverse as morality and imagination attention and absence personal and group identity social structure home nature and cosmos *National Management Measures to Protect and*

Malone, 2009-11-01 Winner 2010 Peter Neaverson Award Association for Industrial Archaeology Patrick M. Malone demonstrates how innovative engineering helped make Lowell Massachusetts a potent symbol of American industrial prowess in the 19th century Waterpower spurred the industrialization of the early United States and was the principal power for textile manufacturing until well after the Civil War Industrial cities therefore grew alongside many of America's major waterways Ideally located at Pawtucket Falls on the Merrimack River Lowell was one such city a rural village rapidly transformed into a booming center for textile production and machine building Malone explains how engineers created a complex canal and lock system in Lowell which harnessed the river and powered mills throughout the city James B. Francis arguably the finest engineer in 19th century America played

a key role in the history of Lowell's urban industrial development An English immigrant who came to work for Lowell's Proprietors of Locks and Canals as a young man Francis rose to become both the company's chief engineer and its managing executive Linking Francis's life and career with the larger story of waterpower in Lowell Malone offers the only complete history of the design construction and operation of the Lowell canal system Waterpower in Lowell informs broader understanding of urban industrial development American scientific engineering and the environmental impacts of technology Its clear and instructional discussions of hydraulic technology and engineering principles make it a useful resource for a range of courses including the history of technology urban history and American business history *Wetland Design* Robert Lawrence France, 2003 Wetlands combine the beauty of both aesthetic form and ecological function in a way that few other landforms can match *Our National Wetland Heritage* Jon A.
